BENEFITS OF INVESTING IN QUANTUM GOLD SAVINGS FUND (FUND OF FUND SCHEME)

- (i) **"Open door for non-demat a/c holders:** Investors can invest in this Scheme through the physical mode across the country thereby making it easily available and convenient for non demat a/c holders"
- (ii) **Systematic Investment Plan (SIP):** a long term disciplined investment technique under which you invest a fixed sum of money on a daily / weekly/monthly/ quarterly basis in the Scheme at the prevailing NAV. This allows the investor to save and invest regularly.
- This investment technique enables the investor the following benefits:
- Small, regular investments: A simple way to enter the market by investing small amounts. Small but regular investments go a long way in creating wealth over time.
 - Rupee cost averaging: Fewer units during rising markets and more units during falling markets, thereby reduces the average cost per unit
 - No need for 'timing the markets': No need to select the right time and quantity to buy and sell as timing the market is time consuming and risky. It eliminates the need to actively track the markets.
- (iii) **Availability of add-on facilities:** Ease of availing add on facilities like Systematic Transfer Plan/ Systematic Withdrawal Plan / Systematic Investment Plan/ auto switch /trigger facility etc.
- (iv) **Liquidity:** An investor of Gold Savings Fund can subscribe and redeem units on all Business Days directly from the AMC, while purchase and sale of gold ETF units is a factor of liquidity on the stock exchange.
- (v) **Ease of investing:** Investing in gold through Quantum Gold Savings Fund, the investor can directly subscribe/ redeem units through the physical mode at the various designated investor service centre across the country/ investing online thereby making it easily accessible and convenient.
- (vi) **Cost Effective:** Investing in gold through the Quantum Gold Savings Fund in physical application mode enables the investor to invest in a low cost manner as the investor does not have to incur the following charges applicable for investing through the dematerialized mode.

Example if an investor subscribing ₹ 50,000/- each in Gold ETF through the dematerialized mode and Gold Savings Fund through physical application would incur following charges :-

Charges	Gold ETF through Demat Mode	Gold Savings Fund through Physical Application Mode
Account Opening Charges	Nil	Nil
Annual Maintenance charges of Demat Account	₹ 0 - ₹ 1200	Nil
Delivery brokerage charges	₹ 25 - ₹ 175	Nil
Transaction charges	₹ 25	Nil
Annual Scheme Recurring Expenses*	₹ 500	₹ 625**
Total	₹ 550 - ₹ 1900	₹ 625

Delivery brokerage in the above example is in the range of 0.05% to 0.35% .The above charges may vary as per different brokers. Charges like trading account opening charges, service tax, education cess, exchange levy and stamp duty is applicable on the transactions in dematerialized mode.

* Annual Scheme Recurring Expenses as shown above is as per the expense levied to Quantum Gold Fund ETF which is 1% p.a. as on May 31, 2011, thereby the expense charged to Quantum Gold Savings Fund would be 0.25% as the total expense under both the schemes would not exceed 1.25% p.a.

** Investment in QGSF 50000*0.25%+ QGSF Investing in QGF - ETF 50000*1%= 125+500=625

A. RISK FACTORS

Standard Risk Factors

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Quantum Gold Savings Fund is the name of the Scheme. The name of the Scheme does not in any manner indicate either the quality of the scheme or its future prospects and the returns. Investors are therefore urged to study the terms of offer carefully and consult their Investment Advisor before they invest in the Scheme.
- The sponsor is not responsible or liable for any loss or shortfall resulting from the operation of the scheme beyond the initial contribution of ₹ 1,00,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or an assured return scheme.

Scheme Specific Risk Factors

- The Scheme will invest predominantly in the units of Quantum Gold Fund (QGF), a mutual fund scheme in the form of Exchange Traded Fund. The Scheme's performance may depend upon the performance of QGF. Any change in the investment policy or the fundamental attributes of QGF could affect the performance of the Scheme. All risks associated with underlying scheme, including performance of their underlying physical gold, asset class risk, passive investment risk, indirect taxation risk, etc., will therefore be applicable in this Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying scheme.
- The Scheme's NAV will react to the gold price movements and movements in the NAV of Quantum Gold Fund. The factor that may affect the price of gold, among other things include demand and supply for gold in India and in the global market, Indian and foreign exchange rates, inflation trends, trading in gold as commodity, legal restriction on movement / trade of gold that may be imposed by RBI, Government of India or countries that supply or purchase gold to / from India, trends and restrictions on export / import of gold in and out of India, etc
- The portfolio disclosure of the scheme will be limited to providing the particulars of the Quantum Gold Fund where the scheme has invested and will not include the investments made by Quantum Gold Fund. However, as the scheme proposes to invest only in underlying scheme, the underlying assets will by and large be physical gold.
- The investors of the scheme will bear dual loads i.e. those of the scheme and those of Quantum Gold Fund. Hence, the investor under the scheme may receive lower pre-tax returns than what they could have received if they had invested directly in underlying scheme in the same proportions.
- Although the units of Quantum Gold Fund are listed on the

stock exchange, there can be no assurance that an active secondary market for Quantum Gold Fund will develop or be maintained.

- Trading in units of Quantum Gold Fund on the stock exchanges may be halted because of market conditions or for reasons that in view of stock exchange authorities or SEBI, trading in the units of Quantum Gold Fund is not advisable. In addition, trading of units of Quantum Gold Fund is subject to trading halts caused by extraordinary market volatility and pursuant to circuit filter rules of the stock exchanges and SEBI. There can be no assurance that the requirements of stock exchanges necessary to maintain the listing of the units of Quantum Gold Fund will continue to be met or will remain unchanged.
- The units of Quantum Gold Fund may trade above or below their NAV. The NAV of Quantum Gold Fund will fluctuate with changes in the market value of its holdings. The trading prices of the units of Quantum Gold Fund will fluctuate in accordance with changes in its NAV as well as market supply and demand for the units of Quantum Gold Fund. However, given that units of Quantum Gold Fund can be created and redeemed in Creation Units Size directly with Fund, it is expected that large discounts or premiums to the NAV of Quantum Gold Fund will not sustain due to arbitrage opportunity available.
- Any changes in trading regulations by the stock exchanges or SEBI may affect the ability of market maker to arbitrage resulting into wider premium / discount to NAV of Quantum Gold Fund.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Schemes' investments include, but are not limited to, fluctuations in the capital markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes, etc.

The past performance of the Sponsors and their affiliates/associates is not indicative of the future performance of the Scheme. Investment decisions made by the AMC may not always be profitable.

From time to time and subject to the Regulations, the Sponsor, the mutual funds and investment companies managed by them, their

affiliates, their associate companies, subsidiaries of the Sponsor and the AMC may invest either directly or indirectly in the Scheme. The funds managed by these affiliates, associates, the Sponsor, subsidiaries of the Sponsor and/or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major Investor in the Scheme. Accordingly, Repurchase/Redemption of Units held by such funds, affiliates/associates and Sponsors may have an adverse impact on the Units of the Scheme because the timing of such Repurchase/Redemption may impact the ability of the other Unitholders to redeem their Units.

Given that the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for Repurchase/Redemption of Units may be significant in the event of an inordinately large number of Repurchase/Redemption requests or a restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit Repurchase/Redemptions (including suspending Repurchases/Redemptions) under certain circumstances.

In case the Scheme undertakes stock lending under the SEBI Regulations, the Scheme may, at times, be exposed to counter party risk.

The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the Scheme is wound up for the reasons and in the manner provided for in the SAI.

Repurchase/Redemption by the Unitholder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise.

The tax benefits described in this SID are as available as on the date of issue of this SID under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unitholder is advised to consult his/her/their own professional tax advisor.

Unitholders in the Scheme are not being offered any guaranteed/assured returns and Investors are advised to consult their Legal/Tax and other Professional Advisors in regard to tax/legal implications relating to their investments in the Scheme and before making decision to invest in or Repurchase the Units.

Neither this SID nor the Units have been registered in any jurisdiction.

This SID is meant for circulation only in India and therefore has not been registered in any other jurisdiction. These securities may be those listed on the various stock exchanges recognized by SEBI or unlisted securities and the investment will be in conformity with the pertinent rules and regulations, internal restrictions applicable at the time of making the investment.

- Pending deployments of funds of a scheme in securities in terms of investment objectives of the Scheme, the AMC can invest the funds of the scheme in short-term deposits of scheduled commercial banks in accordance with SEBI Guidelines.

The AMC uses a "passive" approach to try and achieve the scheme's investment objective.

E. WHAT ARE THE INVESTMENT STRATEGIES?

Investment Strategy / Philosophy

The AMC uses 'passive' approach to try and achieve the Scheme's investment objective. The Scheme would predominantly invest in the units of Quantum Gold Fund. The AMC does not make any judgments about the investment merit of a Quantum Gold Fund nor will it attempt to apply any economic, financial or market analysis. Passive approach eliminates active management risks in regards to over / underperformance vis-à-vis the benchmark.

The Scheme would endeavor to stay invested in the underlying practically to the maximum extent possible at all times. However, the Scheme would also maintain some funds for meeting expenses and redemption purposes, in order to meet the liquidity requirements of the Scheme as prescribed in the Asset Allocation.

Quantum Gold Fund which is the underlying investment of this Scheme endeavors to track domestic prices of gold by investments in physical gold. It is also a passively managed scheme. On an average the Quantum Gold Fund has been 99.98% invested in gold since its inception in February 2008. This track record in terms of the investment allocation to physical gold evidences the extent to which the fund attempts to track the underlying.

Tracking error means the variance between returns of the underlying benchmark (gold ETF units in this case) and the NAV of the Scheme for any given period.

Tracking Error means the extent to which the NAV of the Scheme moves in a manner inconsistent with the movements of the benchmark on any given day or over any given period of time due to any cause or reason whatsoever including but not limited to expenditure incurred by the scheme, dividend payouts if any, whole cash not invested at all times as it may keep a portion of funds in cash to meet redemption etc. Tracking error quantifies how closely a managers return pattern follows that of a benchmark index, and is defined as the standard deviation of the funds excess return over the underlying / benchmark index return.

Given the structure of Quantum Gold Fund, the AMC expects the tracking error to be lower. The AMC will endeavor to keep the tracking error as low as possible. Under normal circumstances, such tracking errors (with respect to the underlying i.e. Quantum Gold Fund) are not expected to exceed 2% per annum. However this may vary when the markets are very volatile and also when the inflows / outflows in the fund are too excessive.

Rebalancing

The deviation from the underlying ETF as specified above shall mainly be on account of the receipt of cash flows which on an average takes 5 days given the existing operational procedures.

The table shows below the impact that could happen on the Scheme performance as a result of delay in receipt of money over previous six months ending on May 31, 2011.

% change in prices between 'n' days	2 Days	3 Days	4 Days	5 Days	6 Days	7 Days
Average	0.2%	0.3%	0.3%	0.4%	0.5%	0.6%
Max	4.2%	4.3%	4.1%	3.9%	5.5%	6.4%
Min	-2.7%	-3.7%	-3.5%	-3.6%	-3.8%	-3.5%

The Scheme would endeavor to maintain the indicated asset allocation. However there could be a variance in the asset allocation on account of receipt of cash flows as mentioned above, which on an average takes 5 business days to clear given the existing operational procedure.

INVESTMENT PROCESS AND RECORDING OF DECISIONS

Investment Process

The Scheme will endeavor to track the domestic prices of gold by investing in units of Quantum Gold Fund (ETF).

The investments could be made either directly with the underlying fund or through the secondary market.

The AMC will analyze from time to time different ways of taking exposure to units of Quantum Gold Fund from the perspective of risk and return and decide the same in the best interest of investors.

Location/Mode of clearing	RTGS	NEFT	ECS (RBI locations)	ECS (Non RBI locations)	MICR (RBI locations)	MICR (Non RBI locations)
Tier I	T day	T day upto 5.00pm, Otherwise T+1	T+3 days	NA	T+2 days	NA
Tier II	T day	T day upto 5.00pm, Otherwise T+1	T+3 days	T+3 days	T+2 days	T+3 days
Tier III	T day	T day upto 5.00pm, Otherwise T+1	NA	T+4 days	NA	T+4 days
Tier IV	T day	T day upto 5.00pm, Otherwise T+1	NA	T+5 days	NA	T+5 days

On the prima facie, the number of days taken for actual deployment may seem to be on a higher side. This would be the maximum number of days taken, but the actual days may be much lower. The AMC will endeavor to deploy the fund within seven days. The delay in the deployments of the funds may happen on account of non ordinary circumstances like non availability of gold on account of temporary shortage, lower liquidity on exchange, non trading on exchange, delay in receipt of gold, etc. In such circumstances, even procurement of gold for transacting directly with the Quantum Gold Fund through in kind creation process should be treated equivalent of funds deployed in the underlying. Here the trade for buying gold gets executed i.e. the price gets fixed and the settlement of the same would happen at a subsequent date. Here, the price of the gold which is the underlying of the Gold ETF has been fixed and therefore any movement in the gold prices would not impact the tracking error.

(ii) In case of Redemptions

During Redemptions, there are two ways to generate cash flows to meet redemptions. The Scheme can sell the underlying units on the exchange or can surrender the underlying units directly to Quantum Gold Fund and receive gold which in turn can be sold to generate cash.

(a) Selling underlying units on the exchange:

T day – receipt of redemption request

(a) Managing the fund flows:

(i) In case of Subscription

The asset allocation pattern mandates 95-100% allocation to the underlying units of Quantum Gold Fund.. New subscriptions received would be deployed immediately in the underlying units such that the new funds received get deployed to the minimum level of the indicated asset allocation in not more than 7 days.

The following would be indicative timelines from the day of receipt of application and the deployment of the same in the underlying units of Quantum Gold Fund.

T day – Receipt of Application

T+1 -T+5 days - Availability of clear funds for deployment

T+3 - T+7 days – Deployment of funds either buying the units of Quantum Gold Fund on the exchange or by transacting directly with the Quantum Gold Fund through in kind creation process.

The table below highlights the Clearing Mechanism of the funds based on various modes of payments based on different types of location for lump sum investments:

T - T+2 days –Underlying units would be sold on the exchange

T+2 - T+ 4 days – Receipt of cash on account of sale following the normal T+2 settlement cycle

T+3 - T +7 days –investor receives the redemption proceeds

(b) Transacting directly with the Quantum Gold Fund:

T day – receipt of redemption request

T+ 1 day – Redemption request would be made to the underlying fund

T +2 days – Receipt of gold on account of redemption in the underlying gold ETF

T+2 - T+5 days – sale of gold and receipt of cash proceeds

T+3 - T+ 7 days - investor receives the redemption proceeds

As mentioned above, there is a time lag involved between the allotment of NAV based on receipt of transaction request and actual deployment of funds on account of the various procedures involved and time for clearance of funds through the banking channel. This would have an impact on the NAV and result in the tracking error on account of changes in price.

EXAMPLE OF IMPACT ON NAV:

(a) In Case of Subscriptions

(i) If the Quantum Gold Fund Units prices increases due to increase in the prices of physical gold:

	Ongoing	Subscription	Deployment
AMOUNT (₹)	10,000,000.00	100,000.00	100,000.00
QGF Price (₹)	900.00	900.00	918.00
Change in QGF price (%)	-	0.00	2.00
QGF Opening balance (Units)	-	11,111.00	11,111.00
QGF purchased / (sold) (Units)	11,111.00	-	108.00
QGF closing balance (Units)	11,111.00	11,111.00	11,219.00
QGSF Portfolio Value (₹)	9,999,900.00	9,999,900.00	10,299,042.00
QGSF - Cash (₹)	100.00	100,100.00	956.00
QGSF AUM (₹)	10,000,000.00	10,100,000.00	10,299,998.00
QGSF NAV (₹)	10.00	10.00	10.1980
Change in NAV (%)	-	-	1.98
QGSF outstanding (Units)	1,000,000.00	1,010,000.00	1,010,000.00

When the Scheme receives new subscriptions and the price of the underlying gold ETF increases due to increase in gold prices, the Scheme would be able to buy less units of the underlying fund than it should ideally do. This would lead to a negative tracking error to the extent of price movement.

(ii) If the Quantum Gold Fund units price decreases due to decrease in the prices of physical gold:

	Ongoing	Subscription	Deployment
AMOUNT (₹)	10,000,000.00	100,000.00	100,000.00
QGF Price (₹)	900.00	900.00	882.00
Change in QGF price (%)	-	0.00	-2.00
QGF Opening balance (Units)	-	11,111.00	11,111.00
QGF purchased / (sold) (Units)	11,111.00	-	113.00
QGF closing balance (Units)	11,111.00	11,111.00	11,224.00
QGSF Portfolio Value (₹)	9,999,900.00	9,999,900.00	9,899,568.00
QGSF -Cash (₹)	100.00	100,100.00	434.00
QGSF AUM(₹)	10,000,000.00	10,100,000.00	9,900,002.00
QGSF NAV(₹)	10.00	10.00	9.8020
Change in NAV (%)	-	-	-1.98
QGSF outstanding (Units)	1,000,000.00	1,010,000.00	1,010,000.00

When the Scheme receives new subscriptions and the price of the underlying gold ETF decreases due to decrease in gold prices, the Scheme would be able to buy more units of the underlying than it should ideally do. This would lead to a positive tracking error to the extent of price movement.

(b) In case of Redemptions

(i) If the Quantum Gold Fund units price increases due to increase in the prices of physical gold

	Ongoing	Redemption	Deployment
AMOUNT (₹)	10,000,000.00	(100,000.00)	(100,000.00)
QGF Price (₹)	900.00	900.00	918.00
Change in QGF price (%)	-	0.00	2.00
QGF Opening balance (Units)	-	11,111.00	11,111.00
QGF purchased / (sold) (Units)	11,111.00	-	(109.00)
QGF closing balance (Units)	11,111.00	11,111.00	11,002.00
QGSF Portfolio Value (₹)	9,999,900.00	9,999,900.00	10,099,836.00
QGSF -Cash (₹)	100.00	(99,900.00)	162.00
QGSF AUM (₹)	10,000,000.00	9,900,000.00	10,099,998.00
QGSF NAV (₹)	10.00	10.00	10.2020
Change in NAV (%)	-	-	2.02
QGSF outstanding (Units)	1,000,000.00	90,000.00	990,000.00

When the Scheme receives redemptions and the price of the underlying gold ETF increases due to increase in gold prices, the Scheme would have to sell less units of the underlying to raise cash for redemption payments. This would lead to a positive tracking error to the extent of price movement.

(ii) If the Quantum Gold Fund units price decreases due to decrease in the prices of physical gold

	Ongoing	Redemption	Deployment
AMOUNT (₹)	10,000,000.00	(100,000.00)	(100,000.00)
QGF Price (₹)	900.00	900.00	882.00
Change in QGF price (%)	-	0.00	-2.00
QGF Opening balance (Units)	-	11,111.00	11,111.00
QGF purchased / (sold) (Units)	11,111.00	-	(114.00)
QGF closing balance (Units)	11,111.00	11,111.00	10,997.00
QGSF Portfolio Value (₹)	9,999,900.00	9,999,900.00	9,699,354.00
QGSF - Cash (₹)	100.00	(99,900.00)	648.00
QGSF AUM (₹)	10,000,000.00	9,900,000.00	9,700,002.00
QGSF NAV (₹)	10.00	10.00	9.7980
Change in NAV (%)	-	-	-2.02
QGSF Outstanding (Units)	1,000,000.00	990,000.00	990,000.00

When the Scheme receives redemptions and the price of the underlying gold ETF decreases due to decrease in gold prices, the Scheme would have to sell more units of the underlying to raise cash for redemption payments. This would lead to a negative tracking error to the extent of price movement.

As mentioned in the above example, there is an equal probability of both the outcomes of having a positive or negative tracking error. It could be likely that such alternate outcomes would even out overtime resulting in a neutral effect over the long term.

As discussed, despite the attempt to closely track the underlying, a tracking error may result due to conditions that are beyond the control of the fund manager:

- The Scheme would buy the underlying units on the exchange platform. The price at which the Scheme buys underlying units and its NAV (based on London AM fix and RBI reference rate) are likely to be different thereby causing deviation and creating tracking error.
- The underlying units bought will incur a brokerage cost which would again lead to deviation in the Scheme and the underlying NAVs.
- Tracking error would also arise on account of time lag between allotment of NAV to the investor and availability of actual funds for deployment as explained in above para. On account of this time lag, the procurement price of the underlying units would be different than the NAV at which allotment is made leading to tracking errors.

RISK CONTROL / RISK MANAGEMENT STRATEGY

Risk is an important part of investment function. Effective risk management is critical to fund management for achieving financial goals. Investment made by the Scheme shall be made in accordance with investment objective of the Scheme and provisions of SEBI (Mutual Funds) Regulations, 1996.

The Fund has identified following risks and designed risk management strategy which is the part of the investment process to manage such risks.

Type of Risks	Risk Management Strategy
Risk of deviating away from the investment objective of tracking gold prices through investments in units of Quantum Gold Fund (ETF)	<p>The approach adapted to managing the Scheme would be a passive investment approach. The Scheme endeavors to stay near fully invested at all times.</p> <p>Brokerage paid for buying units on the exchange may also lead to increase in deviation. To mitigate the same, the Scheme will analyze from time to time different ways of taking exposure to units of Quantum Gold Fund from the perspective of risk and return and decide the same in the best interest of investors. For e.g. : Investing directly with the fund by purchasing and delivering physical gold to create / purchase new units whenever possible will help to avoid payment of any brokerage charges.</p> <p>However, the bid ask spreads in the underlying units and time lag for availability of fund for deployment may lead to small deviations.</p>
Price Risk	<p>Buying / selling on the exchange:</p> <p>On account of the usual bid-ask spread, the Scheme may pay / receive premium / discount while purchasing / selling the underlying units on the exchange.</p> <p>Buying / selling directly through the Quantum Gold Fund</p> <p>The fair value of the units of the Quantum Gold ETF would be calculated on a real time basis and orders would be placed near the real time fair value to avoid overpaying while purchases or receiving less while selling other than a reasonable bid ask spread.</p> <p>Buying / selling directly through the Quantum Gold Fund</p> <p>There is price risk involved when buying physical gold for purchase of units on account of the possibility of the difference between the purchase price of gold and the gold price computed by the underlying fund for valuation purposes. The Scheme may choose to buy gold by placing the order to buy at London AM Fixing price which is used for valuation for the underlying fund and thereby avoid price risk to a greater extent.</p> <p>In case of redeeming units directly with the fund, the fund would deliver gold on a T+1 basis which causes time lag and also the same would have to be sold on the open market which can be at a premium / discount. However, the Scheme would usually sell the units on the exchange.</p>
Liquidity Risk	<p>It is found that sufficient liquidity is provided by the authorized participants of Quantum Gold Fund.</p> <p>In case of liquidity issues, the fund can opt for the alternative way of buying/ selling units in exchange of the underlying. The underlying can then be bought/ sold in order to deploy funds or to raise cash for redemptions.</p>

RECORDING OF INVESTMENT DECISIONS

The Investment Decisions are made by the AMC's portfolio team. The Portfolio Team comprised of the Fund Manager, who head the team, and the Associate Fund Manager as and when appointed by the AMC. The Investment decisions of the Scheme will be carried out by the designated Fund Manager.

The Chief Executive Officer is not involved in the investment decision making process.

Record of all investment decisions will be maintained with justifications for the same as required under the regulations.

In respect of investment in units of Quantum Gold Fund, record of each investment decision mentioning the number of units,

average rate of purchase, total amount invested, date of purchase and date of settlement will be maintained.

It is the responsibility of the AMC to ensure that the investments are made as per the internal / Regulatory guidelines, Scheme's investment objective and in the best interest of the Unit holders of the Scheme.

All investment decisions shall be recorded in terms of SEBI Circular no MFD/CIR/6/73/2000 dated July 27, 2000 or as may be revised by SEBI from time to time.

PERFORMANCE MEASUREMENT AND REPORTING

The Investment Committee at its regular meeting shall review performance of the Scheme, compliance of the various

investment restrictions and compliance with the investment objectives stipulated in the Scheme Information Document and all other applicable SEBI Regulations. The AMC and Trustees shall also review the performance of the scheme at their periodical Board Meetings. The CEO/Fund Manager will make presentations to the Board of the AMC and the Trustees periodically, indicating the performance of the Scheme. The Scheme will benchmark its performance against domestic prices of gold. Among other things, the Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark. The Trustees reserve the right to change the benchmark for evaluation of performance of the Scheme from time to time in conformity with the Investment objectives and appropriateness of the benchmark subject to SEBI Regulations, and other prevailing guidelines, if any.

The CEO/Fund Manager will bring to the notice of the AMC Board, specific factors if any, which are impacting the performance of the Scheme. The Board on consideration of all relevant factors may, if necessary, give appropriate directions to the AMC. Similarly, the performance of the Scheme will be submitted to the Trustees. The CEO/Fund Manager will explain to the Trustees, the details on the Schemes' performance vis-à-vis the benchmark returns. The Trustees and the AMC Board may also review the performance of the schemes in the light of performance of the mutual funds industry as published from time to time by independent research agencies and financial newspapers and journals and may take corrective action in case of unsatisfactory performance. The Scheme performance would also be measured on a risk adjusted basis against its peers.

PORTFOLIO TURNOVER

The scheme is an open-ended scheme. It is therefore expected that there would be a number of subscriptions and redemption on a daily basis that may require purchase and sale of the securities. Therefore, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

INVESTMENT BY AMC IN THE SCHEME

AMC may invest in the Scheme at any time during the continuous offer period subject to the SEBI Regulations & circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time. As per the existing SEBI Regulations, the AMC will not charge investment management and advisory fee on the investment made by it in the Scheme.

K. INTRODUCTION TO GOLD FUNDS

Since the beginning of civilization, gold has been associated with wealth, prestige and power. It is a highly sought-after precious metal which, for many centuries, has been used as money, a store of value and in jewellery.

Even today, after gold has been officially delinked from currencies, it has a huge role to play in the global economy. Gold is still widely considered to be an asset whose intrinsic value and purchasing power will not be widely subjected to the vagaries of inflation. So, during times of high inflation or depreciating currencies, people have turned to gold as a store of value. As the economic factors

which influence the value of gold is often contrarian to their impact on other financial assets, gold is used as an effective asset-allocation and diversification tool.

It comes as no surprise that gold is much sought after in today's uncertain times given its time tested history of being an effective portfolio diversifier and a store of value.

L. INTRODUCTION TO GOLD EXCHANGE TRADED FUND (ETF)

Gold ETFs are investment vehicles that provide exposure to physical gold. The underlying asset for the ETF is physical gold. So, the value of the ETF unit depends on the underlying value of the gold. They offer investors a smart way of investing in the gold bullion without the necessity of actually physically holding gold and storing it. It is akin to buying gold in demat form. The ETFs are passively managed, resulting in lower expenses, which translates to better returns for the investors. As the ETFs are listed on a stock exchange, any investor can buy it like an equity share through the broker.

Gold ETFs are essentially passively managed mutual fund schemes which follow an "in kind" creation / redemption mechanism. This "in kind" mechanism means that units are created and redeemed for exchange of physical gold. In other words, large investors/institutions can purchase units of Gold ETF by depositing the underlying physical gold with the mutual fund/AMC. Also, large investor/institutions on

redemption would receive the physical gold in exchange of units. This "in Kind" mechanism helps to track gold prices efficiently and limits the tracking error.

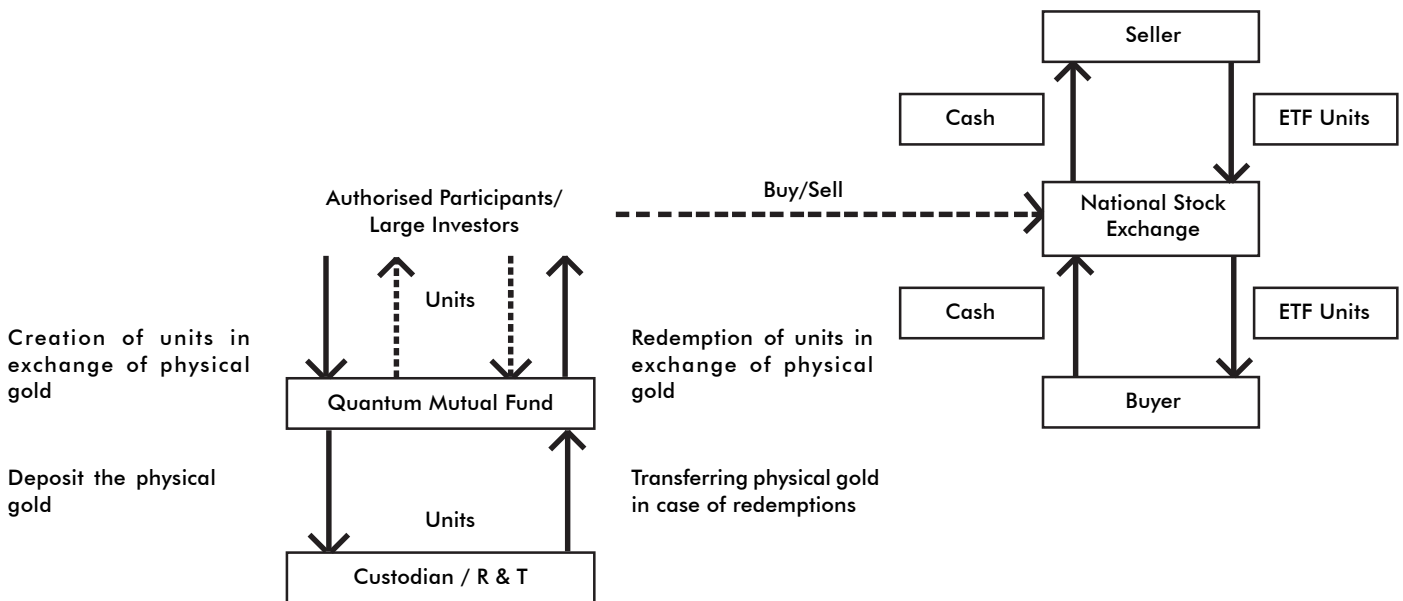

Long-term investors can diversify their portfolio at a low cost and be insulated from the impact of short-term trading activity. As the security is exchange traded, the fund does not incur extra transaction cost for buying/selling the underlying on account of frequent subscriptions and redemptions. Shorter-term investors can also avail of ETFs to improve their liquidity - they can trade intra-day at near NAV quotes.

The ETFs are also more economical for the investor. Apart from being highly transparent investment vehicles, The ETFs charge lower annual expenses. Over the long term, these cost advantages can compound into a significant difference for the investor.

M. QUANTUM GOLD FUND

Quantum Gold Fund is an open ended Exchange Traded mutual fund scheme tracking domestic market prices of gold through investments in physical Gold. The investment objective of the scheme is to generate returns that are in line with the performance of gold and gold related instruments, subject to tracking errors. The scheme invests at least 90% of its net assets in physical gold.

N. HOW QUANTUM GOLD FUND WORKS

Quantum Gold Fund is available in denominations corresponding to as low as 1/2 gram of gold per unit.

Quantum Gold Fund units can be bought and sold like an equity share on the exchange through any broker member's terminal. Units purchased will get credited to investor's demat account.

Units can be bought/ sold at real time prices closely corresponding with the movement in gold prices as opposed to end of the day prices.
