<b>Quantum Index Fund</b>	Quantum Index Fund (QIF) is an Open Ended Fund, listed on the National Stock Exchange of India Limited in the form of an Exchange Traded Fund (ETF) tracking the S&P CNX Nifty Index.
<b>Investment objective</b>	The investment objective of the scheme is to invest in stocks of companies comprising S&P CNX Nifty Index and endeavour to achieve returns equivalent to the Nifty by "passive" investment. The scheme will be managed by replicating the Index in the same weightage as in the S&P CNX Nifty Index with the intention of minimizing the performance differences between the scheme and the S&P CNX Nifty Index in capital terms, subject to market liquidity, costs of trading, management expenses and other factors which may cause tracking error.
<b>Liquidity</b>	The units of the Scheme can be bought / sold like any other stock on the National Stock Exchange of India Limited (NSE).  The Authorized Participants and Eligible Investors can directly buy / sell units with the Fund in Creation Unit Size at NAV based prices.
<b>Benchmark</b>	The Scheme's performance will be benchmarked against S&P CNX Nifty Index.
<b>Transparency / NAV Disclosure</b>	NAV shall be declared and announced on all Business Days and uploaded on AMFI's website (www.amfiindia.com) by 9.00 p.m. and the same will also be uploaded on the Fund's website www.QuantumAMC.com / www.QuantumMF.com on every Business Day and will also be released in two newspapers for publication.  Investors may obtain NAV information on any Working Day by calling the office of the AMC or any of the Investor Service Centres.
<b>Load Structure</b>	Entry Load : Not Applicable  In terms of SEBI circular no. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009 it has been notified that, w.e.f. August 01, 2009 there will be no entry load charged to the schemes of the Mutual Fund and the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.  <b>Quantum Mutual Fund does not charge Entry Load since inception.</b>  Exit Load : Nil
<b>Option/Plan</b>	The Scheme offers only one option - Growth Option.  Presently, the Scheme does not offer any Plan.
<b>Minimum Application Amount / No. of units</b>	<b>Directly with Fund:</b> The investors can create / redeem in exchange of Portfolio Deposit and Cash Component in creation unit size at NAV based Price.  <b>On the Exchange:</b> At prices which may be close to the NAV of QIF Units. On NSE, the units can be purchased / sold in minimum lot of 1 unit and in multiples thereof.  The units of QIF issued under the scheme will be approximately equal to the price of 1/10 (one-tenth) of the S&P CNX Nifty Index.

### A. RISK FACTORS

#### Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risk such as trading volumes, settlement risk, and liquidity risk, default risk including the possible loss of principal.
- As the price/ value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price / Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee.
- Past performance of the Sponsor /AMC /Mutual Fund does not guarantee future performance of the Scheme.
- Quantum Index Fund is the name of the Scheme. The name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns. Investors are therefore urged to study the terms of offer carefully and consult their Investment Advisor before they invest in the Scheme. Investors are therefore urged to study the terms of offer carefully and consult their Investment Advisor before they invest in the Scheme.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of ₹ 1,00,000/- made by it towards setting up the fund.
- The present scheme is not a guaranteed or assured return scheme.

#### Scheme Specific Risk Factors

**The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives.**

- The Scheme's NAV will react to the stock market movements. The investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices market movements, and over longer periods during market downturns.
- Although QIF Units described in this Scheme Information Document is listed on the Stock Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- Trading in QIF Units on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange Authorities or SEBI, trading in QIF Units is not advisable. In addition, trading in QIF Units is subject to trading halts caused by extraordinary market volatility and pursuant to NSE and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of QIF Units will continue to be met or will remain unchanged.
- The units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of QIF Units will fluctuate in accordance with changes in their NAV as well as market supply and demand for QIF Units. However, given that QIF Units can be created and redeemed in Creation Unit Size directly with the fund, it is expected that large discounts or premiums to the NAV of QIF Units will not sustain due to arbitrage possibility available.
- The market price of ETF units, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV), and (2) demand and supply of units in the market. Sizeable demand or supply of the units in Exchange may lead to market price of the units to quote at premium or discount to NAV. Hence the price of QIF units is less likely to hold significant variance (large premium or discount) from the latest declared NAV all the time.

- Any changes in trading regulations by the Stock Exchange/s or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV.
- The units will be issued only in dematerialized form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the mutual fund during liquidity window depend upon the confirmations to be received from depository (ies) on which the mutual fund has no control.
- The Trustee, in the general interest of the unit holders of the Scheme offered under this Scheme Information Document and keeping in view the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day.
- Investors may note that even though this is an open-ended scheme, the scheme would only in case of authorized participants and eligible investors repurchase units and that too only in Creation Unit Size. Thus unit holdings less than the Creation Unit Size can only be sold through the secondary market on the exchange.
- The returns from the types of securities in which the Scheme invests may under perform returns from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under performance in comparison of the general securities markets.
- Buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/broker, payment of brokerage, securities transactions tax and such other costs.
- The Scheme is not actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its Underlying Index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

#### Risks attached with the use of derivatives

As and when the Schemes trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of derivatives requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

**Tracking Error Risk Factors** such as the fees and expenses of the Scheme, Corporate Actions, Cash balance, changes to the Underlying Index and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The Scheme's returns may therefore deviate from those of its Underlying Index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the index and the NAV of the Scheme. Tracking Error may arise due to the following reasons: -

- Expenditure incurred by the fund.
- The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions of securities in the index.
- Securities trading may halt temporarily due to circuit filters.
- Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.

- e. Rounding off quantity of shares underlying the index.
- f. Dividend payout.
- g. IISL undertakes a periodical review of the scrips that comprise the Underlying Index and may either drop or include new scrips. In such an event, the Fund will try to reallocate its portfolio but the available investment / reinvestment opportunity may not permit absolute mirroring immediately.

Given the structure of QIF Units, the AMC expects the tracking error to be lower.

The Securities lending activity by the Scheme will have the inherent probability of collateral value drastically falling in time of strong downward market trends or due to it being comprised of tainted/forged securities, resulting in inadequate value of collateral until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and / or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Also the risk could be in the form of non-availability of ready stock for sale during the period stock is lent.

The Scheme may use various S & P CNX Nifty related derivative products in an attempt to protect the value of portfolio and enhance the unit holder interest. As and when the Scheme trades in derivative market, there are risk factors and issues concerning the use of derivatives that the investors should understand. Derivative products are specialized instruments that require investment technique and risk analysis different from those associated with stocks. The use of derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivative requires the maintenance of adequate controls to monitor the transactions entered into, the ability to access the risk that a derivative adds to the portfolio and the ability to forecast price. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "Counter Party") to comply with the terms of the derivative contract. Other risks in using derivative include the risk of mis-pricing or improper valuation of derivative and the inability of derivative to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. The risk of loss associated with future contracts is potentially unlimited due to the low margin deposits required and the extremely high degree of leverage involved in future pricing. As a result a relatively small price movement in a futures contract may result in an immediate and substantial loss or gain. However, the Scheme will not use derivative instruments for speculative purposes or to leverage its net assets. There may be a cost attached to buying index futures or other derivative instrument. Further there could be an element of settlement risk, which could be different from the risk in settling physical shares. The possible lack of liquid secondary market for futures contract or listed option may result in inability to close futures or listed position prior to these maturity date.

The Scheme may also invest in overseas financial assets as currently permitted by the concerned regulatory authorities in India after obtaining necessary regulatory approvals. To the extent that the assets of the scheme are invested in securities denominated in foreign currencies, the Indian rupee equivalent of the net assets, distribution and income may be adversely affected by changes in the value of respective foreign currencies relative to the Indian Rupee. The repatriation of Capital to India may also be hampered by changes in the regulations concerning exchange controls or political circumstances as well as the application to it of other restriction on investment.

Whereas the Indian Market was formerly restrictive a process of deregulation has been taking place over recent years. This process has involved removable trade barriers and protectionist measures, which could adversely affect the value of investments. It is possible that the future changes in the Indian political situation, including political, social or economic instability, diplomatic developments and changes in tax laws, Changes in SEBI/Stock Exchange/ RBI regulations an other applicable laws/ regulations could have an effect on such investments and valuation thereof, Expropriation, confiscatory taxation or other relevant developments could affect

the value of investments.

The Scheme proposes to invest up to 10% of its net assets in debt and money market instruments. Trading volumes, settlement periods and transfer procedure may restrict the liquidity of such investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and transfer procedures and such periods may be extended significantly by unforeseen circumstances leading to delays in receipts of proceeds from sale of securities. The inability of the Scheme to make intended investments due to its inability to liquidate cash equivalents in time could cause the Scheme to miss investment opportunities resulting, at times in potential losses to the Scheme.

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted securities that have the potential to generate attractive yields. This may increase the risk of the portfolio.

While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the over all trading volume on the stock exchanges.

Repurchase / Redemption by the unit holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise.

#### **Common Risks Associated with Investments in Debt and Money Market Instruments**

Given below are some of the common risks associated with investments in fixed income and money market securities. These risks include but are not restricted to:

##### **Liquidity and Settlement Risks**

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market.

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain debt securities of certain companies, industries, sectors, etc. based on its investment objectives and policies as outlined in this Scheme Information Document. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio.

##### **Investment Risks**

The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of debt securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Different types of securities in which the Scheme would invest as stated in the Scheme Information document carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even amongst corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated. The Scheme will endeavour to invest in highly researched securities offering relative yield for the commensurate risks. However the erosion in the value of the investments/portfolio in the case of the capital and financial markets passing through a bearish phase is a distinct possibility.

### **Interest Rate Risk**

Changes in interest rate may affect the Scheme's net asset value. Generally the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

### **Credit Risk**

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk, debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

### **Re-investment Risk**

Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk refers to the fall in the rate for reinvestment of interim cash flows.

### **Risk Associated with Securitized Debt**

The Scheme may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage backed securities (MBS). ABS are securitized debts where the underlying assets are receivables arising from automobile loans, personal loans, loans against consumer durables, etc. MBS are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential/commercial properties. ABS/MBS instruments reflect the undivided interest in the underlying pool of assets and do not represent the obligation of the issuer of ABS/MBS or the originator of the underlying receivables. The ABS/MBS holders have a limited recourse to the extent of credit enhancement provided. If the delinquencies and credit losses in the underlying pool exceed the credit enhancement provided, ABS/MBS holders will suffer credit losses. ABS/MBS are also normally exposed to a higher level of prepayment, reinvestment and revaluation risks as compared to the normal corporate or sovereign debt.

At present in Indian market, following types of loans are amortised:

- \* Auto Loans (cars/commercial vehicles/two wheeler vehicles)
- \* Residential Mortgages or Housing Loans
- \* Consumer Durable Loans
- \* Personal Loans
- \* Corporate Loans

The main risks pertaining to each of the asset classes above are described below:

#### **Auto Loans (cars/commercial vehicles/two wheeler vehicles)**

- \* The underlying assets (cars etc) are susceptible to depreciation in value whereas the loans are given at high loan to value ratios. Thus, after a few months, the value of asset becomes lower than the loan outstanding. The borrowers, therefore, may sometimes tend to default on loans and allow the vehicle to be repossessed.
- \* These loans are also subject to model risk. i.e. if a particular automobile model does not become popular, loans given for financing that model have a much higher likelihood of turning bad. In such cases, loss on sale of repossession vehicles is higher than usual.

- \* Commercial vehicle loans are susceptible to the cyclical nature in the economy. In a downturn in economy, freight rates drop leading to higher defaults in commercial vehicle loans. Further, the second hand prices of these vehicles also decline in such economic environment.

### **Housing Loans**

Housing loans in India have shown very low default rates historically. However, in recent years, loans have been given at high loan to value ratios and to a much younger borrower class. The loans have not yet gone through the full economic cycle and have not yet seen a period of declining property prices. Thus the performance of these housing loans is yet to be tested and it need not conform to the historical experience of low default rates.

### **Consumer Durable Loans**

- \* The underlying security for such loans is easily transferable without the bank's knowledge and hence repossession is difficult.
- \* The underlying security for such loans is also susceptible to quick depreciation in value. This gives the borrowers a high incentive to default.

### **Personal Loans**

- \* These are unsecured loans. In case of a default, the bank has no security to fall back on.
- \* The lender has no control over how the borrower has used the borrowed money. Further, all the above categories of loans have the following common risks:
- \* All the above loans are retail, relatively small value loans. There is a possibility that the borrower takes different loans using the same income proof and thus the income is not sufficient to meet the debt service obligations of all these loans.
- \* In India, there is no ready database available regarding past credit record of borrowers. Thus, loans may be given to borrowers with poor credit record.
- \* In retail loans, the risks due to frauds are high.

### **Corporate Loans**

- \* These are loans given to single or multiple Corporates. The receivables from a pool of loans to corporate are assigned to a trust that issues Pass through certificates in turn. The credit risk in such certificates is on the underlying pool of loans to the corporate. The credit risk of the underlying loans to corporate would in turn depend on economic cycles.

## **B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

As the Scheme is an Exchange Traded Scheme, the provisions of minimum number of investors and maximum holding of the investors are not applicable as per SEBI Regulations and Circulars.

## **C. SPECIAL CONSIDERATIONS**

Performance of the S&P CNX Nifty Index will have a direct bearing on the performance of the Scheme. In the event the S&P CNX Nifty Index is dissolved or is withdrawn by IISL, the Trustee reserves a right to modify the Scheme so as to track a different and suitable index and the procedure stipulated in the Regulations shall be complied with.

"The QIF units are not sponsored, endorsed, sold or promoted by Indian Index Services & products Limited ("IISL") or Standard & Poor's division of the McGraw-Hill Companies In., ("S&P") Neither IISL nor S&P makes any representation or warranty, express or implied to the Unit holders of the QIF Units or any member of the public regarding the advisability of investing in securities generally or in the QIF Units particularly or the ability of the S&P CNX Nifty Index to track general stock market performance in India. The relationship of S&P and IISL to Quantum Asset Management Company Private Limited is only in respect of the licensing of certain trademarks and trade names of their Index, which is determined, composed and calculated by IISL without regard to the Quantum Asset Management Company Private Limited or the QIF Units. Neither IISL nor S&P has any obligations to take the needs of the Quantum Asset Management Company Private Limited or the Unit holders of the QIF Units into

consideration in determining, composing or calculating the S&P CNX Nifty Index. Neither IISL nor S&P is responsible for or has participated in the determination of the timing of, price at, or quantities of the QIF Units to be issued or in the determination or calculation of the equation by which the QIF Units is to be converted into Cash. Neither S&P IISL has any obligation or liability in connection with the administration or marketing or trading of the QIF Units."

"S&P and IISL do not guarantee the accuracy and / or the completeness of the S&P CNX Nifty or any data included therein and they shall have no liability for any errors, omissions, or interruptions therein. Neither IISL nor S&P makes any warranty, express or implied, as to the results to be obtained by the Quantum Asset Management Company Private Limited, Unit holders of the QIF units or any other persons or entities from the use of the S&P CNX Nifty or any data included therein. IISL and S&P make no express or implied warranties and expressly disclaim all warranties of merchantability or fitness for a particular or use with respect to the Index or any data included therein. Without limiting any of the foregoing, in no event shall IISL or S&P have any liability for any special, punitive, indirect or consequential damages (including lost profits) even if notified of the possibility of such damages."

"Standard & Poor's and S&P are trademarks of the The McGraw - Hill Companies, Inc and have been licensed for use by India Index Services & Products Limited in connection with the S&P CNX Nifty. Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Schemes' investments include, but are not limited to, fluctuations in the capital markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes, etc.

The past performance of the Sponsors and their affiliates/associates is not indicative of the future performance of the Scheme. Investment decisions made by the AMC may not always be profitable.

From time to time and subject to the Regulations, the Sponsors, the mutual funds and investment companies managed by them, their affiliates, their associate companies, subsidiaries of the Sponsors and the AMC may invest either directly or indirectly in the Scheme. The funds managed by these affiliates, associates, the sponsors, subsidiaries of the Sponsors and/or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major Investor in the Scheme. Accordingly, Repurchase/Redemption of Units held by such funds, affiliates/associates and Sponsors may have an adverse impact on the Units of the Scheme because the timing of such Repurchase/Redemption may impact the ability of the other Unitholders to redeem their Units.

Given that the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual fund for Repurchase / Redemption requests or re-structuring of the scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit Repurchase / Redemption (including suspending Repurchase / Redemptions) under certain circumstances, as described in the SAL.

Certain focus areas are already enjoying favourable tax treatment by government of India and the Scheme may also receive favourable tax treatment in other focus areas. If these tax benefits are removed

or amended, it is possible that the changes may have a material adverse impact on the entire revenue and earnings of Companies engaged in business in such focus areas.

Unit holders in the Scheme are not being offered any guaranteed/assured returns and investors are advised to consult their Legal/ Tax and other Professional Advisors in regard to tax/ legal implications relating to their investments in the Scheme and before making decision to invest in or Repurchase the Units.

### A. TYPE OF THE SCHEME

An Open Ended Exchange Traded Fund

### B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?

The principal investment objective of the scheme is to invest in stocks of companies comprising S & P CNX Nifty Index and endeavour to achieve return equivalent to Nifty by "Passive" investment. The Scheme will be managed by replicating the index in the same weightage as in the S & P CNX Nifty with the intention of minimizing the performance differences between the scheme and the S & P CNX Nifty Index in capital terms, subject to market liquidity, costs of trading, managing expenses and other factors which may cause tracking error.

### C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

The net assets of the scheme will be invested predominantly in stocks constituting the S&P CNX Nifty and / or in S&P CNX Nifty exchange traded derivatives. This would be done by investing in almost all the stocks comprising the S&P CNX Nifty in approximately the same weightage that they represent in the S&P CNX Nifty Index and / or investing in S&P CNX Nifty exchange traded derivatives. A small portion of the net assets may be invested in Money Market Instruments, CBLO, Corporate Debt Securities, Other Debt Instruments, including MIBOR linked instruments, Securitized Debt Instruments, and Liquid Schemes of Mutual Funds to meet the liquidity requirements of the schemes.

The investment policies of the Scheme shall be as per SEBI (Mutual Funds) Regulations, 1996, and within the following guideline. The asset allocation under the Scheme, under normal circumstances, will be as follows: -

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	
Securities covered by the S & P CNX Nifty	90%	100%	High
Money Market Instruments, other short term debt instruments as permitted under SEBI (Mutual Funds) Regulations, 1996 and Liquid Schemes of Mutual Funds	0%	10%	Low

Investments in securitized debt instruments can be made by the scheme up to 5% of the total net assets of the Scheme.

Pending deployment of funds of the Scheme in securities in terms of the investment objectives of the Scheme, the AMC can invest the funds of the Scheme in short-term deposits of scheduled commercial banks. The investments in short term deposits of scheduled commercial banks will be reported to the trustees along with the reasons for the investment which, inter alia, would include comparison with the interest rates offered by other scheduled commercial banks. Further, Quantum AMC will ensure that the reasons for such investments are recorded in the manner prescribed in SEBI Circular MFD/CIR/6/73/2000 dated July 27, 2000 and such investments in short term deposits are made in line with SEBI Circular. SEBI/IMD/CIR No 1/91171/07 dated April 16, 2007 and Circular dated June 23, 2008.

The above asset allocation is only indicative and may change from time to time, keeping in view the market conditions and applicable rules and regulations.

### CHANGE IN INVESTMENT PATTERN

As an index linked scheme, the investment policy is primarily passive management. However, the above mentioned investment pattern is indicative and may change for short duration. In the event the S&P CNX Nifty is dissolved or is withdrawn by India Index Services Limited (IISL) or is not published due to any reason whatsoever, the Trustee reserves the right to modify the schemes so as to track a different suitable index and/or to suspend tracking the S&P CNX Nifty and appropriate intimation of the same will be sent to the unitholders of the schemes. In such a case, the investment pattern will be suitably modified to bring it in line with the composition of the securities that are included in the new index to be tracked and the performance of the schemes will be subject to tracking errors during the intervening period.

Subject to the Regulations, the asset allocation pattern indicated above may also change from time to time, keeping in view market conditions, market opportunities and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unitholders. Such changes in the investment pattern will be for short term and defensive considerations.

### D. WHERE WILL THE SCHEME INVEST?

The Scheme may invest in the following asset class

- Securities covered by the S & P CNX Nifty as stated above.
- Money market instruments.

Investments other than in equity will be made for managing liquidity. The preferred instruments will be money market instruments. Money market instruments include commercial papers, commercial bills, treasury bills, government Securities having an unexpired maturity up to one year, call or notice money, certificates of deposit, usance bills and any other like instruments as specified by the RBI from time to time.

- Any other Securities / asset class / instruments as permitted under SEBI Regulations.

### Investment in S & P CNX Nifty related Derivatives

The Fund may use derivative instruments related to the S&P CNX Nifty up to a maximum of 10% of the net assets of the scheme.

### E. WHAT ARE THE INVESTMENT STRATEGIES?

The AMC uses a "passive" or indexing approach to try and achieve Schemes Investment objective. Unlike other funds, the Scheme does not try to "beat" the markets they track and do not seek temporary defensive positions when markets decline or appear over valued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks with regard to over/underperformance vis-à-vis a benchmark. The scheme would alter the scrips/weights as and when the same are altered in the S&P CNX-Nifty Index. As long as a Scheme invests at least 90% of its total assets in the stocks of its Underlying Index, it may also in other assets in Money Market Instruments, Other Short term Debt Instruments as permitted under SEBI (Mutual Funds) Regulations, 1996 and Liquid Schemes of Mutual Funds.

## INVESTMENT PROCESS AND RECORDING OF DECISIONS

### INVESTMENT PROCESS

The Scheme will track S&P CNX Nifty Index and is a passively managed scheme. The investment decisions will be determined as per the S&P CNX Nifty Index. Unlike other Fund, the Scheme does not try to "beat" the markets they track and do not seek temporary defensive positions when markets decline or appear over valued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks in regard to over / underperformance vis-à-vis a benchmark. In case of any change in the index due to corporate actions or change in the constituents of S&P CNX Nifty Index (as communicated by IISL), relevant investment decisions will be determined considering such changes.

### Recording of Investment Decisions

The investment decisions will be taken by the Scheme keeping in view the market conditions, investment objective of the Scheme and all the relevant aspects. The AMC will review all the investments made by the Scheme. The investment decisions of the Scheme will be made by the AMC's Portfolio Team and carried out by the designated Fund Manager. The Portfolio Team shall comprise of the Fund Manager who leads the portfolio team and the Associate Fund Manager. The final responsibility for the investment decisions rests with the portfolio team. All investment decisions of the scheme will be recorded in accordance with SEBI Regulations. It is the responsibility of the AMC to ensure that the investments are made as per the internal/Regulatory guidelines, Scheme investment objectives and in the best interest of the Unitholders of the Scheme.

The Chief Executive Officer is not involved in the investment decision making process.

All investment decisions shall be recorded in terms of SEBI Circular no MFD/CIR/6/73/2000 dated July 27, 2000 or as may be revised by SEBI from time to time.

### RISK CONTROL / RISK MANAGEMENT STRATEGY

Risk is an important part of the investment functions. Effective Risk Management is critical to Fund Management for achieving financial goals. Investments made by the Scheme shall be made in accordance with Investment Objective of the Scheme and provisions of SEBI (MF) Regulations.

The Fund has identified following Risk and designed Risk Management Strategies which is the part of the Investment Process to manage such risks.

Type of Risks	Risk Management Strategies
Tracking Error Risk - Risk of deviating away from the investment objective of tracking S&P CNX Nifty Index	The Fund follows a passive investment approach and invests as per the S&P Nifty Index. The Fund does not try to beat the markets and do not seek temporary defensive positions when markets decline or appear over valued.
Liquidity risk - High impact cost	At the time of rebalancing of the portfolio of the scheme in case required quantity of stocks are not available due to low volume in some stocks in such cases the quantity of stocks will be broken down across proportionally in all stocks comprises in S&P CNX Nifty Index so that no stock will have more weightage than the required at such time.

Type of Risks	Risk Management Strategies
Changes in composition: Addition / deletion of stocks in S&P CNX Nifty Index	The rebalancing of stocks shall be done at the appropriate time so that tracking error can be minimized.
Changes in weightage of stock due to corporate action like merger, demerger or issue of QIP	The rebalancing of stocks shall be done at the appropriate time so that tracking error can be minimized.

### Performance Measurement & Reporting

The Investment Committee at its regular meeting shall review performance of the Scheme, compliance of the various investment restrictions and compliance with the investment objectives stipulated in the SID and all other applicable SEBI Regulations. The AMC and the Trustees shall also review the performance of the scheme at their periodical Board Meetings. The performance would be compared with the performance of the Benchmark and with peer group in the industry.

The CEO / Fund Manager will make presentations to the Board of the AMC and the Trustees periodically, indicating the performance of the Scheme. The Fund will adopt S&P CNX Nifty Index as the benchmark for the Scheme. Among other things, the Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark. The Trustees reserve the right to change the benchmark for evaluation of performance of the Scheme from time to time in conformity with the Investment objectives and appropriateness of the benchmark subject to SEBI Regulations, and other prevailing guidelines, if any.

The CEO / the Fund Manager will bring to the notice of the AMC Board, specific factors if any, which are impacting the performance of the Scheme. The Board may after consideration of all relevant factors, if necessary, give appropriate directions to the AMC. Similarly, the performance of the Scheme will be submitted to the Trustees. The CEO / the Fund Manager will explain to the Trustees, the details on the Scheme's performance vis-à-vis the benchmark returns. The Trustees and the AMC Board may also review the performance of the scheme in the light of performance of the mutual fund industry as published from time to time by independent research agencies and financial newspapers and journals and may take corrective action in case of unsatisfactory performance. The Scheme performance would also be measured on a risk adjusted basis against its peers.

### PORTFOLIO TURNOVER

As the Scheme will follow a passive investment strategy the endeavor will be to minimize portfolio turnover subject to the exigencies and needs of the schemes. Generally, as the scheme is open - ended, turnover will be confined to rebalancing of portfolio on account of new subscriptions, redemptions and change in the composition of the S & P CNX Nifty Index. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

### INVESTMENT BY AMC IN THE SCHEME

The AMC may invest in the Scheme at any time during the continuous offer period subject to the SEBI Regulations & circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time. As per the existing SEBI Regulations, the AMC will not charge investment management and advisory fee on the investment made by it in the Scheme. The AMC may in the interest of the unit-holders of the scheme also consider buying the QIF Units from the market to enhance the value of the Scheme as permitted under the SEBI (Mutual Funds) Regulations, 1996.

## F. FUNDAMENTAL ATTRIBUTES:

Following are the Fundamental Attributes of the scheme, in terms of Regulation 18 (15A) of the SEBI (MF) Regulations:

### (i) Type of scheme

An Open ended Exchange Traded Fund

### (ii) Investment Objective

The Scheme may also use various S & P CNX Nifty related derivative products from time to time, as are available and permitted by SEBI and this Scheme Information Document, in an attempt to protect and enhance the interests of the Unitholders at all times. Derivatives are contractual instruments whose performance is derived from that of an underlying asset.
16. The Scheme shall not make any investment in a Fund of Fund's Scheme.
17. The Scheme will not enter into any transaction, which exposes it to unlimited liabilities or results in the encumbering of its assets in any way so as to expose them to unlimited liability.
18. The Scheme shall not invest more than 15% of its NAV in debt instruments issued by a single issuer rated not below investment grade by a credit rating agency authorised to carry out such activity under the Securities and Exchange Board of India Act, 1992 and this limit may be extended to 20% of the NAV of the Scheme subject to prior approval of the Board of the AMC and the Trustee. Investments within such limits can be made in mortgage backed securitized debts which are rated not below investment grade by a credit rating agency registered with SEBI.
 

Provided that such limit shall not be applicable for investment in Government Securities and Money Market Instruments.

Provided that in case of investment in money market instruments, the Scheme shall not invest more than 30% of its net assets in Money Market Instruments issued by a single issuer. The limit shall not be applicable to investment in CBLOs.
19. The Scheme shall not invest more than 10% of its NAV in unrated debt instruments issued by a single issuer and such total investments shall not exceed 25% of the NAV of the Scheme.
20. The Scheme will not enter into any transaction, which exposes it to unlimited liabilities or results in the encumbering of its assets in any way so as to expose them to unlimited liability. These investment limitations/parameters as expressed/linked to the net asset/net asset value/capital, shall in the ordinary course, apply as at the date of the most recent transaction or commitment to invest. Changes do not have to be effected merely because of appreciation or depreciation in value or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or Redemption or other reason outside the control of the Fund,

in case any such limits would thereby be breached due to such an event. If these limits are exceeded for reasons beyond its control, AMC shall adopt as a priority objective the remedying of that situation, taking due account of the interests of the Unitholders.

All such investments shall be subject to the prior approval of the Board of the AMC and the Trustee.

Note: Debentures, irrespective of any residual maturity period (above or below 91 days), shall attract the investment restrictions as applicable for debt instruments. Further, it is clarified that the investment limits mentioned in (19) and (20) above are applicable to all debt securities which are issued by public bodies/institutions such as electricity boards, municipal corporations, state transport corporations etc. guaranteed by either Central or State Government. Government securities issued by central/state government or on its behalf by RBI are exempt from the above referred investment limits.

These investment limitations/parameters as expressed/linked to the net asset/net asset value/capital, shall in the ordinary course, apply as at the date of the most recent transaction or commitment to invest. Changes do not have to be effected merely because of appreciation or depreciation in value or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or Redemption or other reason outside the control of the Fund, in case any such limits would thereby be breached due to such an event. If these limits are exceeded for reasons beyond its control, AMC shall adopt as a priority objective the remedying of that situation, taking due account of the interests of the Unitholders.

The Scheme will comply with SEBI regulations and any other Regulations applicable to the investments of Mutual Funds from time to time. The AMC/Trustees may alter the above restrictions from time to time to the extent that changes in the Regulations may allow and/or as deemed fit in the general interest of the Unitholders.

All the above investment restrictions shall be applicable at the time of making the investment.

## K. INTRODUCTION TO EXCHANGE TRADED FUND

### Background of Exchange Traded Funds

Exchange Traded Funds or ETFs are investment schemes that are listed on stock exchanges and can be traded like equity shares. An ETF would have some underlying security or group of securities like an index, sector stocks or commodities. These underlying securities determine the ETF's value. Investors can buy or sell these ETF units. Globally, ETFs are increasingly finding favour with retail as well as institutional investors. They aid investors to diversify their risks by taking a broad exposure to entire markets or specific sectors in different countries with relative ease, on a real-time basis and at a lower cost than many other forms of investing. ETFs are attractive to investors as they offer the diversification of mutual funds combined with the flexibilities of stock trading.

ETFs are not to be confused with futures. Even though both ETFs and Futures allow investors exposure to an underlying asset, they are different in many ways. Futures contracts are derivative products and trades are settled at a pre-determined time in the future. ETFs are a cash market product and can be held for as long as the investor wants.

### History

The first exchange-traded fund began trading on the Toronto Stock Exchange in 1989. Some of the most popular ETFs are QQQs (Cubes) based on the Nasdaq-100 Index, SPDRs (Spiders) based on the S&P 500 Index, iSHARES based on MSCI Indices and TRAHK (Tracks) based on the Hang Seng Index. In the commodities segment, StreetTRACKS and iShares are extremely popular.

Initially, the response to ETFs was very limited. But over time, trade volumes boomed. As at the end of 2005, the Assets under Management by all ETFs were estimated to be over \$550 Bn. The Financial Research Corporation predicts that by the year 2007 total ETF assets will reach up to \$1 trillion.

Salient Features - ETFs can be bought and sold throughout the trading day at real time prices. An investor can take advantage of price rises and declines that take place during the day.

ETFs are also more economical for the investor. Most ETFs charge lower annual expenses. Over the long term, these cost advantages can compound into a significant difference for the investor.

### Advantages of ETFs

**Diversification:** As each ETF is comprised of a basket of securities, it inherently provides diversification across an entire index. The range and breadth of ETFs is ever expanding. ETFs today are not just about stock indices. In addition to stock indices in emerging (E.g.: - China, Malaysia, Brazil) as well as developed markets (E.g.: - U.S., U.K.), an investor can take positions in specific sectors like healthcare, telecom, biotech etc. Commodity, Bond, Currency and Real Estate ETFs are also available. Even for institutional investors, ETFs facilitate easy asset allocation, hedging facilities and options to equitise cash.

**Affordability:** The unit cost of an ETF can be very low when compared to the prices of its constituents. These lower prices are attractive for retail investors, who otherwise might not have been able to afford the basket.

**Transparency:** The investor has a better idea beforehand about where his money will be invested. The performances of ETFs generally corresponds to the performance and yield of their underlying security.

### About the Index

The S&P CNX Nifty comprises of 50 stocks and is a market capitalization weighted index. Stocks are selected based on their market capitalization and liquidity. An important aspect of S&P CNX Nifty is that the impact cost (cost of executing the entire set of S&P CNX Nifty securities) is low. Nifty stocks represent about 63% of the Free Float Market Capitalization as on December 31, 2009. The S&P CNX Nifty has a base date of November 03, 1995 with a base index value of 1000. The index is reviewed quarterly.

### Attributes of the Index

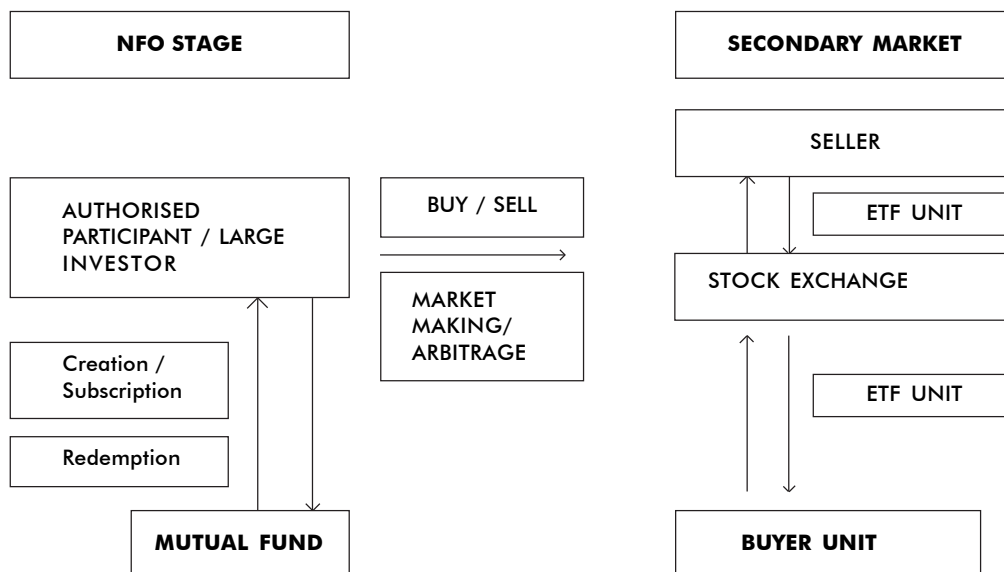

The S&P CNX Nifty Index is a broad based diversified index.

### Index Service Provider

India Index Services & Products Ltd. (IISL) is a joint venture between the National Stock Exchange of India Ltd. (NSEIL) and the CRISIL Ltd. IISL has been formed with the objective of providing a variety of indices and index related services and products for the capital market.

IISL has a Consulting and License Agreement with Standard and Poor's, a division of The McGraw Hill Companies Inc., (S&P), the world's leading provider of investable equity indices, for co-branding certain equity indices of IISL.

<b>Listing</b>	The units of the Scheme are listed on the capital market segment of NSE. The AMC reserves the right to list the units of the Scheme on any other recognized Stock Exchange.
<b>Minimum balance to be maintained and consequences of non maintenance</b>	Not Applicable
<b>Dividend Policy</b>	<p>The Trustee proposes to follow the following dividend distribution policy:</p> <p>In terms of SEBI Circular No. 1/64057/06 dated April 4, 2006, the Trustees shall fix the quantum of dividend and the record date. The AMC shall, within one calendar day of the decision by the Trustee, issue notice to the public, communicating the decision, including the record date. The record date shall be 5 calendar days after the issue of notice and issued in accordance with the terms of the Circular. Declaration of dividend is subject to the availability of distributable surplus. It must be distinctly understood that the actual declaration of dividends under the Scheme and the frequency thereof will, inter-alia, depend upon the distributable surplus of the Scheme. There is no assurance or guarantee to Unitholders as to the rate of dividend distribution nor will that dividend be regularly paid. The dividend that may be paid out of the net surplus of the Scheme will be paid only to those Unitholders whose names appear in the register of Unitholders on the notified record date. Unitholders are entitled to receive dividend within 30 days of the date of declaration of the dividend. However, the Mutual Fund will endeavour to make dividend payments sooner to Unitholders. On distribution of dividends, the NAV will stand reduced by the amount of dividend distributed and statutory levy, if any, at the close of business hours on record date.</p>

<b>Delay in payment of redemption/ repurchase proceeds</b>	The Fund shall dispatch the Redemption/ Repurchase proceeds to the Unitholders within 10 Business Days from the date of redemption or repurchase. The AMC shall be liable to pay interest to the unitholders at such rate as may be specified by SEBI for the period of such delay (presently @15% per annum)

#### Example of Creation and Redemption of Units

As explained earlier, the Creation Unit is made up of 2 components i.e. the Portfolio Deposit and the Cash Component. The Portfolio Deposit will be determined by the Fund as per the weightages of each security in the Underlying Index. The value of this Portfolio Deposit will change due to change in prices during the day. The number of shares of each security that constitute the portfolio deposit will remain constant unless there is any corporate action in the Underlying Index.

NAV of QIF units as on May 31, 2011 = 561.1042.

So total NAV consideration for 2000 units (creation size) = 2000\* 561.1042 = 1,122,208.4.

Portfolio Basket is calculated based on previous day's Nifty (closing) \* 200 \* scripwise weightage, On May 31, 2011 Nifty closed at 5560.15 = 1,111,647.65.

Cash component for creation = NAV - Value of Portfolio Basket + (other charges + Taxes)

Cash component for redemption = Value of Portfolio Basket - NAV - (other charges + Taxes)

#### D. COMPUTATION OF NAV

Market or Fair Value of Scheme's investments + Current Assets - Current Liabilities and Provisions divided by Number of Units outstanding under Scheme on the valuation date.

The NAV will be calculated and announced as of the close of every Business Day upto 4 decimal places. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and subject to such regulations as may be prescribed by SEBI from time to time.

This section outlines the expenses that will be charged to the schemes.

**A. NEW FUND OFFER (NFO) EXPENSES**

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationery, bank charges etc. The NFO Expenses were borne by the AMC.

**B. ANNUAL SCHEME RECURRING EXPENSES**

These are the fees and expenses for operating the scheme. These expenses include investment Management and Advisory Fee Charged by the AMC, Registrar and transfer Agents fee, marketing and selling costs etc., as given in the table below:

The AMC has estimated that upto 0.75% of the weekly or daily average net assets of the scheme will be charged to the scheme as expenses for the actual current being charged, the Investor should refer to the website of the mutual fund.

Particulars	% of Net Assets
Investment Management & Advisory Fees	0.25
Custodial Fees	0.10
Registrar & Transfer Agent Fees including cost relating to providing accounts statement, dividend/redemption cheques/warrants etc.	0.04
Marketing & Selling Expenses including Agents Commission and statutory advertisement	-
Brokerage & Transaction Cost pertaining to the distribution of units	-
Audit Fees / Fees and expenses of trustees	0.27
Costs related to Investor communications	-
Costs of fund transfer from location to location	-
Other Expenses *	0.09
<b>Total Annual Recurring Expenses</b>	<b>0.75</b>

(\* To be specified as permitted under the Regulation 52 of SEBI (Mutual Funds) Regulations)

For the actual expenses being charged, the investor should refer to the website of the Mutual Fund. The current expense ratios will be updated on the Mutual Fund website viz. [www.QuantumAMC.com](http://www.QuantumAMC.com) / [www.QuantumMF.com](http://www.QuantumMF.com) within two working days mentioning the effective date of the change.

There will be no entry/exit load on QIF units bought or sold through the secondary market on the NSE. However, an investor would be paying cost in the form of a bid and ask spread and brokerage, as charged by his broker, for buying / selling QIF Units.

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per the SEBI (Mutual Funds) Regulations.

As per the SEBI Regulations, the maximum recurring expenses, including the Investment management and advisory fee, that can be charged to the Scheme shall be subject to a percentage limit of average weekly net assets as given in the table below. Subject to the SEBI Regulations and the Scheme Information Document, expenses over and above the prescribed ceiling will be borne by the AMC.

average weekly / daily net assets	% limit
First ₹ 100 Crores	2.50%
Next ₹ 300 Crores	2.25%
Next ₹ 300 Crores	2.00%
Over ₹ 700 Crores	1.75%

Provided however that in case of an Index Fund Scheme, the total expenses of the scheme including the investment advisory fees shall not exceed 1.50% of the weekly or daily average net assets. The investment and advisory fees shall not exceed 0.75% of the weekly/ daily average net assets.

The AMC reserves the right to calculate Investment Management Fees and recurring expenses on the basis of daily or weekly average net assets depending on the periodicity of publication of NAV.

However, the following expenses cannot be charged to the Scheme:

- Penalties and fines for infraction of laws.
- Interest on delayed payment to the Unitholders.
- Legal, marketing, publication and other general expenses not attributable to the Scheme.
- Expenses on investment/general management.
- Expenses on general administration, corporate advertising and infrastructure costs.
- Depreciation on fixed assets and software development expenses.
- Such other costs as may be prohibited by SEBI.

The recurring expenses of the Scheme(s), and the management fee, if any, shall be as per the limit prescribed under Sub-regulation (6) of Regulations 52 of the Regulations and shall not exceed the limit prescribed thereunder.

As per SEBI Regulations, the AMC is entitled to an Invest Management and Advisory Fee at the rate of 1.25% per annum on the weekly or daily average net assets outstanding in each accounting year for the Scheme(s), as long as the net assets do not exceed ₹ 100 Crore and 1% of the excess amount over ₹ 100 Crore, where net assets so calculated exceed ₹ 100 Crore.

**C. LOAD STRUCTURE**

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. This amount may be used by the AMC to take care of marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC ([www.QuantumAMC.com](http://www.QuantumAMC.com) / [www.QuantumMF.com](http://www.QuantumMF.com)) or may call at (toll free no. 1 800 223 163).

Type of Load	Load chargeable (as %age of NAV)
Entry Load	<p>Not Applicable</p> <p>In terms of SEBI circular no. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009 has notified that, w.e.f. August 01, 2009 there will be no entry load charged to the schemes of the Mutual Fund and the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.</p> <p><b>Quantum Mutual Fund does not charge Entry Load since inception.</b></p>
Exit Load	Nil

The investor is requested to check the prevailing load structure of the scheme before investing. Any imposition or enhancement in the load shall be applicable on prospective investments only. However the AMC shall not charge any load on issue of bonus units and units allotted on reinvestment of dividend for existing as well as prospective investors. For any change in load structure AMC will issue an addendum which shall be attached to the SID and Key Information Memorandum (KIM) and display it on the website / Investor Service Centres. The introduction of Exit load alongwith the details may be stamped in the acknowledgement slip issued to the investors on

submission of the application form and may also be disclosed in the statement of accounts issued after introduction of such loads. Further a public notice shall be given in respect of such changes in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language or the region where the headoffice of the mutual fund is situated.

In terms of SEBI Circular No SEBI / IMD / CIR No.4 / 168230 / 09 dated June 30, 2009 with effect from August 01, 2009, of the Exit load / Contingent Deferred Sales Charge (CDSC) charged to the investor a maximum of 1% of the redemption proceeds shall be maintained in a separate account which can be used by the AMC to pay commissions to the distributors and to meet marketing and selling expenses of the Scheme Any balance shall be credited to the Scheme immediately.

However, Quantum Mutual Fund does not pay any commissions to the distributors and amount from Exit Load / Contingent Deferred Sales Charges collected by the Scheme is credited to the revenue account of the Scheme since inception.

The Mutual Fund may charge the load within the stipulated limit of 7% and without any discrimination to any specific group of unit holders. However, any change at a later stage shall not affect the existing unit holders adversely.

#### D. WAIVER OF LOAD FOR DIRECT APPLICATIONS :

Not Applicable

Pursuant to SEBI circular no. SEBI/IMD/CIR No.4/ 168230/09 dated June 30, 2009 no entry load shall be charged for all mutual fund schemes. Therefore, the procedure for waiver of load for direct applications is no longer applicable.

Please refer to SAI for details.
