Investment Objective	The investment objective of the Scheme is to achieve long-term capital appreciation by investing primarily in shares of companies that will typically be included in the BSE 200 Index and are in a position to benefit from the anticipated growth and development of the Indian economy and its markets.	The primary investment objective of the Scheme is to provide optimal returns with low to moderate levels of risk and high liquidity through judicious investments in money market and debt instruments.	The Investment Objective of the Scheme is to generate returns that are in line with the performance of gold and gold related instruments subject to tracking errors. However, investment in gold related instruments will be made if and when SEBI permits mutual funds to invest, in gold related instruments. The Scheme is designed to provide returns that before expenses, closely correspond to the returns provided by gold.	The investment objective of the scheme is to invest in stocks of companies comprising S & P CNX Nifty Index and endeavour to achieve return equivalent to Nifty by "Passive" investment. The Scheme will be managed by replicating the index in the same weightage as in the S & P CNX Nifty with the intention of minimizing the performance differences between the scheme and the S & P CNX Nifty Index in capital terms, subject to market liquidity, costs of trading, managing expenses and other factors which may cause tracking error.	The investment objective of the Scheme is to achieve long-term capital appreciation by investing primarily in shares of companies that will typically be included in the BSE 200 Index and are in a position to benefit from the anticipated growth and development of the Indian economy and its markets.	The investment objective of the scheme is to generate long-term capital appreciation by investing in a portfolio of open-ended diversified equity schemes of mutual funds registered with SEBI. There can be no assurance of positive returns from following the stated investment strategy.

**Source for 5-Star rating:** Value Research Fund Ratings are a composite measure of historical risk-adjusted returns. In the case of equity funds, this rating is based on the average monthly returns for the last 3-year and 5-year periods. These ratings do not take into account any entry or exit load. Five-stars indicate that a fund is in the top 10 per cent of its category in terms of historical risk adjusted returns. 179 open-ended Equity: Diversified Funds were rated as on May 31, 2010. Value Research Fund Ratings are subject to change every month. The rating is based on primary data provided by respective funds; Value Research does not guarantee the accuracy.
