A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. The value of investments may be affected, inter-alia, by changes in the market, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures; the NAV is also exposed to Price/Interest-Rate Risk and Credit Risk and may be affected inter-alia, by government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Quantum Tax Saving Fund is the name of scheme. The name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns. Investors are therefore urged to study the terms of offer carefully and consult their Investment Advisor before they invest in the Scheme.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of ₹ 1,00,000/- made by it towards setting up the Fund.
- As with any investment in securities, the NAV of the units issued under the Scheme can go up or down depending on the various factors and forces affecting the capital markets and money markets
- The present scheme is not a guaranteed or an assured return scheme

Scheme Specific Risk Factors

Risk Factors related to Equity Investments

By virtue of requirements under the ELSS, Units issued under the QTSF will not be redeemed until the expiry of 3 (three) years from the date of their allotment. The ability of an investor to realise returns on investments in QTSF is consequently restricted for the first three years. Redemption will be made prior to the expiry of the aforesaid 3 (three) year period only in the event of the death of a Unit Holder, subject to the Units having been held for a period of 1 (one) year from the date of their allotment.

The Scheme proposes to invest primarily in equity and equity related securities. Equity Securities and equity-related Securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made by the Scheme may be restricted by trading volumes and settlement periods. This may impact the ability of the Unit Holders to redeem their Units. In view of this, the Trustee has the right, in its sole discretion to limit Redemptions (including suspending Redemption) under certain circumstances. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended Securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell Securities held in the Scheme's portfolio could result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of Securities held in the Scheme's portfolio. Investments in equity and equity related Securities involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date for disinvestment. Securities which are not quoted on the stock exchanges are inherently illiquid in nature

and carry a larger liquidity risk in comparison with Securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted Securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio

Risk Factors Associated with Fixed Income and Money Market Instruments:

Interest Rate Risk/Market Risk: Changes in interest rate may affect the Scheme's net asset value. Generally the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk or Default Risk:

Credit risk or Default risk refers to the risk that an issuer of a debt instrument may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk, bonds issued by non-government agencies are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a debt instrument will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Liquidity and Settlement Risks

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.

Different segments of the financial markets have different settlement cycle/periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio

Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk refers to the fall in the rate for reinvestment of interim cash flows.

Performance Risk: The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme shall be in a position to maintain the model percentage of investment pattern

particularly under exceptional circumstances. The Scheme will endeavour to invest in highly researched securities offering relative yield for the commensurate risks. However the erosion in the value of the investments/portfolio in the case of the debt markets passing through a bearish phase is a distinct possibility.

Risks associated with Securities Lending and Short Selling

Securities Lending: It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can also be temporary illiquidity of the securities that are lent out and the Scheme will not be able to sell such lent out securities until they are returned.

Short selling: Scheme may enter into short selling transactions, subject to SEBI and RBI regulations in the matter. This will be done if the fund management team is of the view that there exists an opportunity to make trading gains. Calls for short selling will be taken after considering the liquidity and volatility of the security as well as the interest rate view of the fund management team. There can be a loss in such a transaction if the price of the security goes up instead of falling down.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (Mutual Funds) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Schemes' investments include, but are not limited to, fluctuations in the capital markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes, etc.

The past performance of the Sponsors and their affiliates/associates is not indicative of the future performance of the Scheme. Investment decisions made by the AMC may not always be profitable.

From time to time and subject to the Regulations, the Sponsors, the mutual funds and investment companies managed by them, their affiliates, their associate companies, subsidiaries of the Sponsors

and the AMC may invest either directly or indirectly in the Scheme. The funds managed by these affiliates, associates, the sponsors, subsidiaries of the Sponsors and/or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major Investor in the Scheme. Accordingly, Repurchase/Redemption of Units held by such funds, affiliates/associates and Sponsors may have an adverse impact on the Units of the Scheme because the timing of such Repurchase/Redemption may impact the ability of the other Unitholders to redeem their Units.

The Scheme has the power to invest in securities which are not quoted on a stock exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Schemes will realise its investments in unlisted securities at a fair value. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges.

Given that the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for Repurchase/Redemption of Units may be significant in the event of an inordinately large number of Repurchase/Redemption requests or a restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit Repurchase/Redemptions (including suspending Repurchases/Redemptions) under certain circumstances.

In case the Scheme undertakes stock lending under the SEBI Regulations, the Scheme may, at times, be exposed to counter party risk.

Certain focus areas are already enjoying favourable tax treatment by Government of India and the Scheme may also receive favourable tax treatment in other focus areas. If these tax benefits are removed or amended, it is possible that the changes may have a material adverse impact on the companies' revenue and earnings.

The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the Scheme is wound up for the reasons and in the manner provided for in the SAI.

Repurchase/Redemption by the Unitholder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise.

The tax benefits described in this SID are as available as on the date of issue of this SID under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advise received by the AMC regarding the law and practice currently in force in India and the Unitholders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unitholder is advised to consult his/her/their own professional tax advisor.

Unitholders in the Scheme are not being offered any guaranteed/assured returns and Investors are advised to consult their Legal/Tax and other Professional Advisors in regard to tax/legal implications relating to their investments in the Scheme and before making decision to invest in or Repurchase the Units.

The above asset allocation is only indicative and may change from time to time, keeping in view the market conditions and applicable rules and regulations.

CHANGE IN INVESTMENT PATTERN

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, depending on liquidity

considerations or on account of high levels of subscriptions or Repurchase / Redemptions relative to fund size, or upon considerations that optimize returns of the Scheme through investment opportunities or upon various defensive considerations including market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions may vary substantially depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and only for defensive considerations.

D. WHERE WILL THE SCHEME INVEST?

The Scheme may invest in the following asset classes, other than foreign securitized debt:

- Equity and equity-related Securities as stated above.

Limits for stock lending are:

"Currently the Fund shall not be engaged in stock lending and borrowing and investment in securitized debt. It may do so only and as and when permitted under the ELSS/SEBI Regulations/Guidelines".

E. WHAT ARE THE INVESTMENT STRATEGIES?

Investment Philosophy/Strategy

The investment strategy of the Mutual Fund will be to invest in companies it believes are attractively priced in the market when compared to the Investment Manager's valuation of the company. The Investment Manager's valuation will be based on a number of factors, including the Investment Manager's assessment of the skill and expertise of the company's management team and the long term potential for both the company and the sectors in which it operates. Such opportunities may arise for a variety of reasons ranging from the belief that the markets have undervalued a company, to an assessment that there is opportunity for significant profit or market share growth given the dynamics of the sector a company operates in, or as a result of the company's competitive or proprietary advantages.

The investment strategy of the Scheme will be to invest in a basket of stocks after using intensive fundamental analysis, both quantitative and qualitative, monitor the portfolio actively but not so as to engage in excessive trading, and control risk by keeping the portfolio adequately diversified (both in terms of the sectors included in the portfolio as well as with respect to the level of concentration of any particular investment).

The primary focus of the Scheme will be on companies that will typically be included in the BSE 200 Index. Valuations will be developed based on the business of the company, the environment in which it operates, the skills and resources of its management, the

strength of its balance sheet and cash flow relative to its long term goals, and other fundamental sector criteria. Investments will be made in companies whose shares are undervalued when compared to long term valuation expectations. Investments will be sold when the Investment Manager believes the market price of the shares has exceeded its assessment of the long term value of that company, or if there are adverse changes to that company's management, prospects or the markets in which that company operates. This evaluation against market prices will tend to be based on fundamental criteria (dividend yields, price to earnings, price to cash flow, price to book value, and other different measures of share price ratios), relative to a company's peer group, its history and the overall equity markets.

Market liquidity will be an important tool to mitigate investment risk. Accordingly, a number of the companies in the portfolio may be included in the BSE-30 Total Return Index that the Investment Manager will use as a benchmark, but this will not be a criterion for including a company in the Scheme's portfolio and the portfolio will generally not include many of the companies in the BSE-30 TRI Index. There may, however, be situations where other factors make an investment attractive enough to cause the Investment Manager to purchase a stock despite a relatively low level of liquidity in that stock. In addition, as noted above, the Scheme may invest in unlisted companies where the Investment Manager believes that a listing is likely within 3 years from the date of the investment.

Investment Portfolio

The Scheme's investment portfolio typically will consist of investments made in shares of "Indian companies" (defined as a company that is listed on a stock exchange in India or elsewhere and, if not located in India, has over 50% of its assets, revenues, or profits generated from operations in India). The Scheme will invest primarily in equity securities of Indian issuers listed on an Indian stock exchange, or on an approved over-the-counter exchange, including in the form of Depository Receipts. From time to time the Scheme may also invest in the shares of companies that are expected to be listed within three years of the investment. The Board of the AMC will from time to time review and approve the overall investment policy and strategy of the portfolio held by the Scheme. The Scheme will be subject to the investment restrictions prescribed under the SEBI (Mutual Fund) Regulations 1996 and the ELSS..

While the majority of the assets will be invested in the equity securities of Indian companies, the Scheme may also invest in debt and money market instruments for the purpose of having liquidity.

Generally speaking, the portfolio will tend to include shares of 25 to 40 different companies, and the investment in shares of any one company will tend to be in the range of 2% to 6% of the Scheme's net assets. Particular sectors or industries will not be a significant factor in the decision to add a company to the Scheme's portfolio.

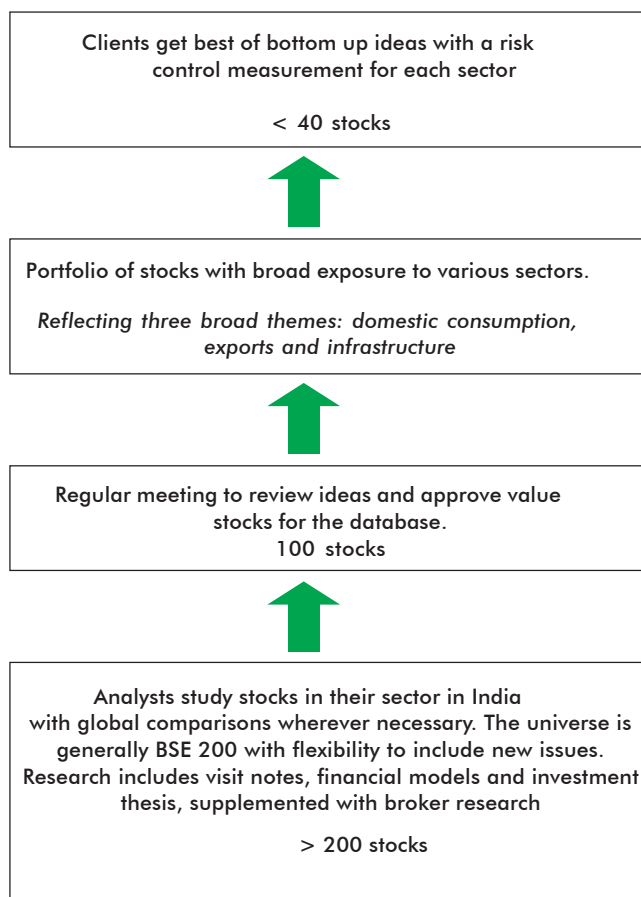

INVESTMENT PROCESS AND RECORDING OF INVESTMENT DECISIONS

INVESTMENT PROCESS

The investment process consists of:

1. Stock selection
2. Portfolio construction

The AMC's stock selection approach is basically bottom up and is depicted below:

2. PORTFOLIO CONSTRUCTION

1. Stock has to be under active and current coverage
2. Every stock in the AMC's database has a pre - assigned Buy / Sell Limit. This is an INR price based on underlying fundamental sector criteria.
3. The AMC generally buys a new stock at the pre-determined Buy price (or below) and generally sells an existing stock at the pre-determined Sell price or above. Generally it may add to a stock the Scheme already owns if it is between the pre-determined Buy and Sell price.
4. For the sake of a benchmark the AMC uses the BSE - 30 Total Return Index. The AMC is indifferent to whether a stock, the Scheme owns, is in the BSE - 30 Total Return Index or not - although it recognizes its effect on liquidity.
5. The AMC does not make sector calls. It makes stock calls.
6. With a range of 25 to 40 stocks the Schemes average holding is likely to be 2.5% to 4.0% per stock and the portfolio turnover is expected to be 40% suggesting a 2.5-year average holding period.

RISK CONTROL/ RISK MANAGEMENT STRATEGY

Risk is an important part of the investment functions. Effective Risk Management is critical to Fund Management for achieving financial goals. Investments made by the Scheme shall be made in accordance with Investment Objective of the Scheme and provisions of SEBI (Mutual Funds) Regulations.

For deciding the valuation of the companies various tools is considered such as history of the companies, peers over 5-10 year periods, quantitative analysis.
Concentration risk	The investments are made in stocks across a number of sectors to ensure the diversification. There is stock wise limit is that no investment is made more than 6% of portfolio.
Liquidity risk: High impact cost	The Investments are made only in such stocks which has high trading volume in the market.
Volatility risk: price volatility due to company or portfolio specific factors	For hedging the portfolio generally cash is used and when the stocks / markets go up sharply above the comfort level at that time stock has been sold and cash has been retained to invest for further good opportunity.

Nor will it include changes to the Scheme made in order to comply with changes in Regulations with which the Scheme has been required to comply.

G. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE ?

The scheme would be benchmarked to the BSE 30 Total Return Index (TRI). It appropriately represents the returns from the BSE 30 Sensex since it includes the dividend received from the BSE 30 companies. Therefore, the aforesaid benchmark is most suited for comparing performance of the Scheme. The Scheme's portfolio has a bias towards high liquidity stocks. BSE 30 TRI, therefore makes a good benchmark as it comprises large cap stocks which are highly liquid.

Performance comparisons for the Scheme will be made vis-à-vis the Benchmark. However, the Scheme's performance may not be strictly comparable with the performance of the Benchmark, due to the inherent differences in the construction of the portfolios.

The Trustee reserves the right to change benchmark in future for measuring performance of the scheme in conformity with investment objective of the scheme subject to SEBI Regulations.
