PRODUCT LABEL

Name of the Scheme	This product is suitable for investors who are seeking*	Riskometer
Quantum Gold Fund (An Open-ended Exchange Traded Fund- Gold)	 Long term returns Investments in physical gold. 	Low HIGH Investors understand that their principal will be at Moderately High Risk

^{*} Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

The Investment Objective of the Scheme is to generate returns that are in line with the performance of gold and gold related instruments subject to tracking errors. However, investments in gold related instruments will be made if and when SEBI permits mutual funds to invest, in gold related instruments. The Scheme is designed to provide returns that before expenses, closely correspond to the returns provided by gold.

Asset Allocation Pattern of the scheme

Types of Instruments	Normal allocation (% of Net Assets)				
	Minimum allocation (% of Net Assets)	Maximum allocation (% of Net Assets)	Risk Profile		
Physical Gold	90%	100%*	Medium to High		
Money Market instruments, Short-term Corporate debt securities, CBLO and units of Debt and Liquid Schemes of Mutual Funds	0%	10%	Low		

^{*}As the scheme invests 90% to 100% of the net assets into Gold, the scheme will, by and large, be passively managed fund. However, if and when permitted under SEBI regulations, the scheme may invest in gold related securities including derivatives.

Note: Investment in warehouse receipts and other permitted instruments linked to Gold Prices and units of international gold linked ETFs would be made as and when, and to the extent permitted by regulatory authorities.

It may be clearly understood that the percentages above are only indicative and not absolute.

The Scheme would invest in money market instruments, short-term corporate debt securities, CBLO and units of debt and liquid schemes of mutual funds, in order to meet the liquidity requirements of the Scheme.

Investment Strategy

The AMC uses 'passive' approach to try and achieve the Scheme's investment objective. The Scheme does not try to "beat" the markets they track and do not seek temporary defensive positions when markets decline or appear over valued. The AMC does not make any judgments about the investment merit of a particular gold investment nor will it attempt to apply any economic, financial or market analysis. Passive approach eliminates active management risks in regard to over/underperformance vis-à-vis the benchmark.

Mutual Fund units involve investment risks including possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors and other details before investment. Scheme specific Risk Factors are summarized below:

The Scheme's NAV will react to the gold price movements. The investor may lose money over short or long period due to fluctuation in scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in bullion prices, market movement and over longer periods during market downturns.

Any changes in trading regulations by the stack exchange (s) or SEBI may affect the ability of Authorised Participant to arbitrage resulting into wider premium/ discount to NAV. Any changes in the regulations relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the scheme to buy/sell gold against the purchase and redemption requests received.

The units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of QGF units will fluctuate in accordance with changes in their NAV as well as market supply and demand for the units. However, given that QGF units can be created and redeemed in Creation Units Size directly with the Fund, it is expected that large discounts or premiums to the NAV of QGF units will not sustain due to arbitrage opportunity available.

Risk is an important part of the investment functions. Effective Risk Management is critical to Fund Management for achieving financial goals. Investments made by the Scheme shall be made in accordance with Investment Objective of the Scheme and provisions of SEBI (Mutual Funds) Regulations.

The Fund has identified following Risk and designed Risk Management Strategies which is the part of the Investment Process to manage

Type of Risks	Risk Mitigation / Management Strategies
Tracking Error Risk — Risk of deviating away from the investment objective of tracking gold prices	The Fund follows a passive investment approach. The Fund does not try to time the market. It endeavors to stay near fully invested at all times.
Quality and Purity Risk — Risk of sub standard quality of gold	Gold purchased by the Fund is 0.995 purity and above. Gold sourced shall be from an LBMA accredited refiner only. The Fund has a well defined and specific good delivery norms policy to be followed by the custodian for acceptance of Gold.
Custody risk—There is a risk that part or all of the scheme's gold could be lost, damaged or stolen.	To ensure the highest safety Gold is stored with renowned vaulting agencies in their professional vaults. Gold held by the Fund is fully insured.

SEBI Regulations have made it mandatory for investors to mention the Bank Name & address of branch and Bank Account Number in their Investment application form in order to protect the interest of investors from fraudulent encashment of cheques.

In case the investor is a minor, the bank account details for redemption purpose should be of the minor i.e. the minor should be an account holder in the bank account.

PAYMENT OF REDEMPTION /DIVIDEND: Investors are requested to provide the following details along with the mandatory requirement of bank account details (bank, branch address, account type and account no,) in the application form for electronic fund transfer (EFT) of dividend / redemption amount to the unit holders bank account. Quantum AMC will automatically extend this facility to all unit holders in case the bank account as communicated by the unit holder is with any of the bank providing EFT facility.

The 11 digit IFSC (Indian Financial System Code). The 9-digit MICR (Magnetic Ink Character Recognition) number appearing next to the cheque number in the cheque leaf is to be mandatorily given.

Based on the above information AMC will enable secure transfer of your redemption and dividend payouts via the various electronic mode of transfers (RTGS/NEFT/Direct Credit mode that are available in the banking system).

This facility of EFT is safe and fast and eliminates the potential risk of loss of instruments in transit through physical mode. The Mutual Fund, however, reserves the right to issue a cheque / demand draft to unit holders residing at locations where this facility is not available. "If the remittance is delayed or not affected for reasons of incomplete or incorrect information, Quantum AMC cannot be held responsible".
