<b>Investment Objective</b>	The investment objective of the scheme is to invest in stocks of companies comprising Nifty 50 Index and endeavour to achieve returns equivalent to the Nifty by "passive" investment. The scheme will be managed by replicating the index in the same weightage as in the Nifty 50 Index with the intention of minimizing the performance differences between the scheme and the Nifty 50 Index in capital terms, subject to market liquidity, costs of trading, management expenses and other factors which may cause tracking error.

<b>Investment Strategy</b>	<p>The AMC uses a "passive" or indexing approach to try and achieve Schemes Investment objective. Unlike other funds, the Scheme does not try to "beat" the markets they track and do not seek temporary defensive positions when markets decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks with regard to over/ underperformance vis-à-vis a benchmark. The scheme would alter the scrips/weights as and when the same are altered in the Nifty 50 Index. As long as a Scheme invests at least 95% of its total assets in the stocks of its Underlying Index, it may also invest in Money Market Instruments.</p> <p><b>Investment Process</b></p> <p>The Scheme will track Nifty 50 Index and is a passively managed scheme. The investment decisions will be determined as per the Nifty 50 Index. Unlike other Fund, the Scheme does not try to "beat" the markets they track and do not seek temporary defensive positions when markets decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks in regard to over / underperformance vis-à-vis a benchmark. In case of any change in the index due to corporate actions or change in the constituents of Nifty 50 Index (as communicated by NSEIL), relevant investment decisions will be determined considering such changes.</p>															
<b>Risk Profile of the Scheme</b>	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors and other details before investment. Scheme specific Risks Factors are summarized below:</p> <ul style="list-style-type: none"> <li>• Risk associated with investments in Equity, Debt and Money Market Instruments which involve Liquidity &amp; Settlement Risks, Investment Risks, Interest Rate Risk, Credit Risk, Re-investment Risk, Risk Associated with Securitized Debt etc.</li> <li>• The scheme is subject to passive investment risk and tracking error risk.</li> <li>• The Scheme's NAV will react to the stock market movements. The investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices market movements, and over longer periods during market downturns.</li> <li>• Trading in Q Nifty Units on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange Authorities or SEBI. In addition, trading in Q Nifty Units is subject to trading halts caused by extraordinary market volatility and pursuant to NSE and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Q Nifty Units will continue to be met or will remain unchanged.</li> <li>• The units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Q Nifty Units will fluctuate in accordance with changes in their NAV as well as market supply and demand for Q Nifty Units. However, given that Q Nifty Units can be created and redeemed in Creation Unit Size directly with the fund, it is expected that large discounts or premiums to the NAV of Q Nifty Units will not sustain due to arbitrage possibility available.</li> </ul>															

- The market price of ETF units, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV), and (2) demand and supply of units in the market. Sizeable demand or supply of the units in Exchange may lead to market price of the units to quote at premium or discount to NAV. Hence the price of Q Nifty units is less likely to hold significant variance (large premium or discount) from the latest declared NAV all the time.
- a) Expenditure incurred by the fund.
  - b) The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions of securities in the index.
  - c) Securities trading may halt temporarily due to circuit filters.
  - d) Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
  - e) Rounding off quantity of shares underlying the index.
  - f) Payout of Income Distribution cum Capital Withdrawal.
  - g) NSEIL undertakes a periodical review of the scrips that comprise the Underlying Index and may either drop or include new scrips. In such an event, the Fund will try to reallocate its portfolio but the available investment / reinvestment opportunity may not permit absolute mirroring immediately.
