6. Minimum commitment of 60 instalments shall be required at the time of registration; however, early withdrawal shall not be restricted but will be subject to Exit Load as per the SID of the Scheme.
7. In case any investor has investments in any Scheme of any Mutual Fund or any SIP investment other than Choti SIP or a lumpsum investment across any Scheme of any Mutual Fund, the said investor shall be considered ineligible under this facility.
8. SIP frequency under this facility shall be only Monthly.
9. The date for Choti SIP can be any date between 1st to 28th of a month.
10. In case an investor who has provided the application under this facility, does not qualify for the said facility, the SIP shall continue and be treated as a regular SIP.
11. The investor to provide mobile number to the AMC for sending Statutory Disclosures.

- **SIP Pause Facility**

The SIP Pause Facility is available for investors to pause their existing SIP for a temporary period without discontinuing it. The SIP would restart from the immediate next instalment after completion of the pause period specified by the investor. Investors can pause SIPs with a monthly frequency for either 3 months or 6 months, for SIP amounts of ₹500 and above. This facility is available only for ongoing SIPs and is not available for SIPs categorized as Choti SIP. Once the request for opting the pause facility is submitted, investor will not be able to cancel the same.

A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

The asset allocation under the Scheme, under normal circumstances, will be as follows:

Instruments	Indicative allocations (% of total assets)	
	Minimum	Maximum
Units of Quantum Nifty 50 ETF	95	100
Government Securities & Treasury Bill Maturity upto 91 days, Tri Party Repo and Liquid Schemes of Mutual Funds	0	5

The cumulative gross exposure through investments in the units of underlying scheme i.e. Quantum Nifty 50 ETF and Government Securities & Treasury Bill Maturity upto 91 days, Tri Party Repo and Liquid Schemes of Mutual Funds should not exceed 100% of the net assets of the scheme.

Cash and cash equivalents as per SEBI letter no. SEBI/HO/ IMD-II/DOF3/ OW/P/ 2021/ 31487 / 1 dated November 03, 2021, which includes T-bills, Government Securities and Repo on Government Securities having residual maturity of less than 91 Days, shall not be considered for the purpose of calculating gross exposure limit.

Portfolio Rebalancing in case of deviation from Asset Allocation Under Defensive Consideration

The asset allocation pattern indicated above may change from time to time, depending on liquidity considerations or on account of high levels of subscriptions or Repurchase / Redemptions relative to Scheme size, or upon various defensive considerations including market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary substantially depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and only for defensive considerations. In the

event of deviations from the above asset allocation table, the Fund Manager will carry out rebalancing within 30 Calendar Days in accordance to para-No. 2.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. However, at all the times the portfolio will adhere to the overall investment objectives of the Scheme.

Portfolio Rebalancing in case of Passive Breach

Pursuant to para-No. 2.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, in the event of deviation from the above asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the rebalancing shall be done within 30 Business Days. In case the rebalancing is not done within 30 Business Days, then justification in writing including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desires, can extend the timelines upto 60 Business Days from the date of completion of 30 Business Days rebalancing period.

In case the portfolio of scheme is not rebalanced within the aforementioned mandated plus extended timelines, the AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- ii. not to levy exit load, if any, on the investors exiting from the scheme.

AMC shall report the deviation to Trustees at each stage. Further, in case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme:

1. AMCs shall immediately disclose the same to the investors through SMS and email / letter including details of portfolio not rebalanced.
2. AMCs shall also immediately communicate to investors through SMS and email / letter when the portfolio is rebalanced.

AMCs shall also disclose any deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.

B. WHERE WILL THE SCHEME INVEST?

Subject to the Regulations and the disclosures as made under the Section “HOW WILL THE SCHEME ALLOCATE ITS ASSETS?”, the corpus of the Scheme can be invested in any (but not exclusive) of the following securities / instruments:

1. Units of Quantum Nifty 50 ETF: The investments could be made either directly with the underlying fund or through the secondary market.
2. Government Securities & Treasury Bill Maturity upto 91 days, Tri Party Repo and Liquid Schemes of Mutual Funds for liquidity purpose.
3. Any other Securities / asset class / instruments as permitted under SEBI Regulations in line with the investment objective of the scheme subject to regulatory approval, if required.

C. WHAT ARE THE INVESTMENT STRATEGIES?

Investment Philosophy / Strategy

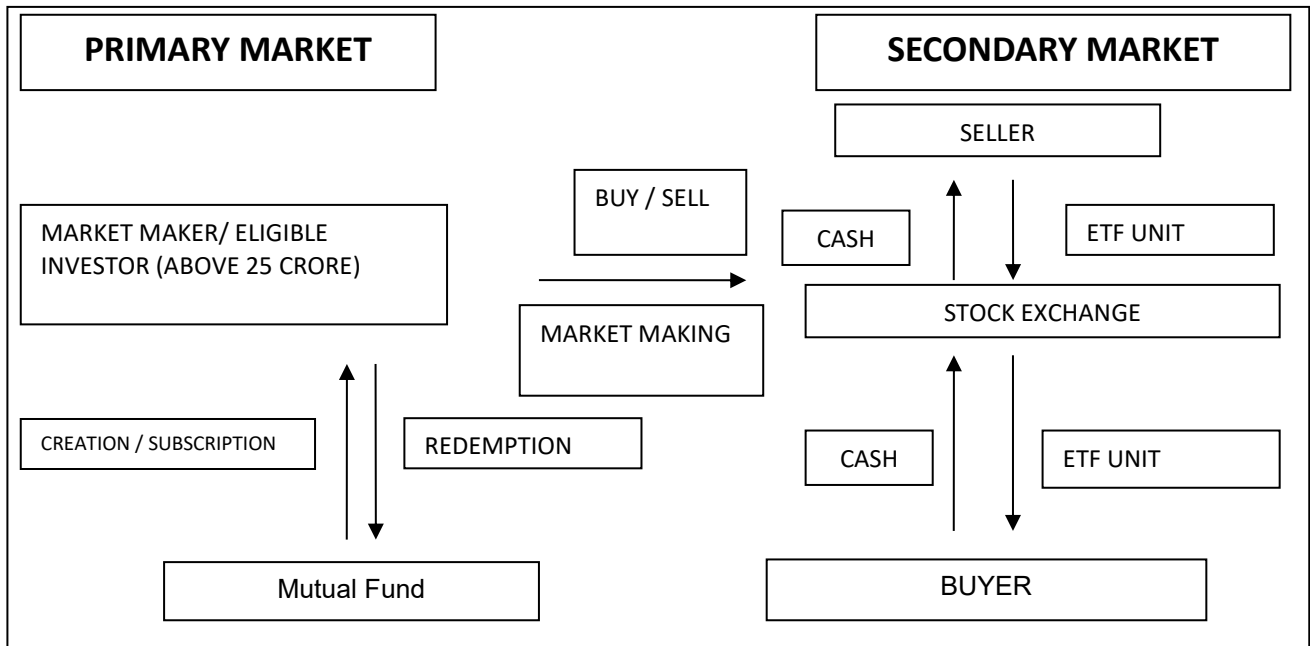

The AMC uses ‘passive’ approach to try and achieve the Scheme’s investment objective. The Scheme would invest in the units of Quantum Nifty 50 ETF. The AMC does not make any judgments about the investment merit of Quantum Nifty 50 ETF nor will it attempt to apply any economic, financial or market analysis. Passive approach eliminates active management risks in regard to over / underperformance vis-à-vis the benchmark.

The Scheme will buy / sell units from the underlying scheme i.e. Quantum Nifty 50 ETF in Creation of Unit Size or through the secondary market through stock exchange route to achieve the investment objective. The Scheme would endeavor to stay invested in the underlying scheme practically to the maximum extent possible, at all times. However, the Scheme would also maintain some funds for meeting expenses and redemption purposes, in order to meet the liquidity requirements of the Scheme as prescribed in the Asset Allocation.

The AMC shall endeavor that the returns of Quantum Nifty 50 ETF Fund of Fund will replicate the returns generated by the underlying ETF subject to tracking error and expense of the Scheme. The AMC shall endeavor to keep the tracking error as low as possible following the passive approach of the scheme.

Portfolio Turnover measures the volume of trading that occurs in a Scheme’s portfolio during a given time period. The Scheme is an open-ended Scheme. It is expected that there would be a number of subscriptions and redemptions on a daily basis. It is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

How Quantum Nifty 50 ETF works:

Quantum Nifty 50 ETF can be bought and sold like an equity share of the stock exchange. A unit of Q Nifty represents approximately equal to the price of 1/10 (one-tenth) of the Nifty 50 Index.

PROCEDURE AND RECORDING OF INVESTMENT DECISIONS:

The investment decisions for the scheme will be carried out by the designated fund manager.

The Chief Executive Officer is not involved in the investment decision making process.

Record of all investment decisions will be maintained with justifications for the same as required under the regulations.

It is the responsibility of the AMC to ensure that the investments are made as per the internal / Regulatory guidelines, Scheme's investment objective and in the best interest of the Unit holders of the Scheme.

All investment decisions shall be recorded pursuant to para-No 12.23 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, or as may be revised by SEBI from time to time.

PERFORMANCE MEASUREMENT AND REPORTING:

The Investment Committee of the AMC at its regular meeting shall review performance of the Scheme, compliance of the various investment restrictions and compliance with the investment objective stipulated in the Scheme Information Document and all other applicable SEBI Regulations. The AMC and Trustees shall also review the performance of the scheme at their periodical Board Meetings. The performance would be compared with the performance of the Benchmark and with peer group in the industry.

The CEO/Fund Manager will make presentations to the Board of the AMC and the Trustees periodically, indicating the performance of the Scheme. The Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark.

The CEO/Fund Manager will bring to the notice of the AMC Board, specific factors if any, which are impacting the performance of the Scheme. The Board on consideration of all relevant factors may, if necessary, give appropriate directions to the AMC. Similarly, the performance of the Scheme will be submitted to the Trustees. The CEO/Fund Manager will explain to the Trustees, the details on the Schemes' performance vis-à-vis the benchmark returns. The Trustees and the AMC Board may also review the performance of the schemes vis-à-vis the benchmark and may take corrective action in case of unsatisfactory performance.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Tier I Benchmark – NIFTY 50 TRI

The benchmark is representative of Fund's Investment Objectives and Asset Allocation and most suited for comparison for performance of the scheme.

The Trustee/AMC reserves the right to change the benchmark for the evaluation of the performance of the Scheme from time to time, keeping in mind the Investment Objective & Asset Allocation of the Scheme and the appropriateness of the benchmark.

The AMC may invest in the Scheme at any time during the continuous offer period subject to the SEBI Regulations & Circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time. As per the existing SEBI Regulations, the AMC will not charge investment management and advisory fees on the investment made by it in the Scheme.

Further, the AMC shall, based on the risk value assigned to the scheme, invest minimum amount as a percentage of assets under management of the scheme, pursuant to para-No. 6.9.2 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. For details of such investments, please refer the link: <https://www.quantumamc.com/downloads/AMC-Investment-in-schemes-of-Quantum-MF.pdf>

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit will be computed by dividing the net assets of the Scheme/Plan/Option by the number of units outstanding under the Scheme/Plan/Option on the valuation date.

The Net Assets Value (NAV) per unit under the Scheme/Plan/Option shall be calculated as follows:

NAV (₹) = Market or Fair Value of Scheme's Investments + Current Assets including accrued income –
Current Liabilities and Provisions including accrued expenses

No. of Units outstanding under Scheme/Plan/Option

The numerical illustration of the above method is provided below:

Market or Fair Value of Scheme's investments (Rs.) = 15,00,000

Current Assets (Rs.) = 7,00,000

Current Liabilities and Provisions (Rs.) = 5,00,000

No. of Units outstanding under the Scheme = 1,30,000

$$\text{NAV per unit (Rs.)} = \frac{15,00,000 + 7,00,000 - 5,00,000}{1,30,000} = \frac{17,00,000}{1,30,000} = 13.0769$$

The NAV will be calculated and announced by next Business Day up to 10.00 A.M. The repurchase price shall not be lower than 95% of the NAV subject to SEBI regulation as amended from time to time. For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Sale (Subscription) and Repurchase (Redemption) Price Illustration:

Assumed NAV Rs.11.00 Per Unit, Entry Load – Nil, Exit Load – 1%

Sale Price = NAV + (Entry Load (%) (if any) * NAV)

Sale Price = 11 + (0% * 11)

Sale Price = 11 + 0

Sale Price = Rs.11/-

Repurchase Price = NAV – (Exit Load (%) * NAV)

Repurchase Price = 11 – (1% * 11)

Repurchase Price = 11 – 0.11

Repurchase Price = Rs.10.89

B. NEW FUND OFFER (NFO) EXPENSES

This section does not apply to the Scheme covered in this SID, as the ongoing offer of the Scheme has commenced after the NFO and the Units are available for continuous subscription and redemption.

C. ANNUAL SCHEME RECURRING EXPENSE

These are the fees and expenses for operating the scheme. These expenses include, Registrar and Transfer Agent fee, marketing and selling costs, custody fees etc.

Additional expenses under regulation 52 (6A) (c)	NIL

*as permitted under the Regulations.

[^]Pursuant to para-No. 10.1.16 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the Scheme being Fund of Funds scheme investing more than 80% of its NAV in the underlying domestic fund shall not be required to set aside 2 bps of the daily net assets towards investor education and awareness initiatives.

The Total Expense Ratio of Direct Plan will be lower to the extent of the distribution expenses / commission which is charged to the Regular Plan.

Goods & Service Tax (GST) / Statutory Levies if any, on Investment Management and Advisory Fees will be charged as permitted under the SEBI Regulations.

The AMC has estimated that the above expense will be charged to the Scheme as permitted under Regulation 52 of SEBI (Mutual Funds) Regulations, 1996. The Fund will disclose the Total Expense Ratio (TER) of the Scheme on a daily basis on the website of the AMC (www.QuantumAMC.com) and of AMFI (www.amfiindia.com). Any change in the base TER charged to any scheme/plan will be communicated to investors of the scheme/plan through notice via email or SMS at least three working days prior to effecting such change. Investors can refer the aforesaid notice on the AMC website at the link: <https://www.quantumamc.com/total-expense-ratio>.

Brokerage and transaction cost incurred for the purpose of execution of trade will be expensed out in the scheme to the extent of 0.12% for cash market transactions. Brokerage and transaction costs exceeding of 0.12% for cash market transactions if any may be charged to the scheme within the maximum limit of TER as prescribed under regulation 52 of the Regulations.

No additional expenses which are allowed to be charged in terms of SEBI Regulations 52 (6A) (b) & (c) shall be charged to the Scheme.

As per Regulation 52 (6) (a)(i), the total expense ratio of the scheme including weighted average of the total expense ratio levied by the underlying schemes shall not exceed 1.00 per cent of the daily net assets of the Scheme.

Provided that the total expense ratio to be charged over and above the weighted average of the total expense ratio of the underlying scheme shall not exceed two times the weighted average of the total expense ratio levied by the underlying scheme(s), subject to the overall ceiling of 1.00 percent as stated above.

As maximum recurring expenses of the Scheme, including the investment management and advisory fee, together with additional expenses if any, shall not exceed the limits prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations 1996 read with the SEBI Master Circular dated June 27, 2024.

Investors may please note that investors will be bearing the recurring expenses of the Scheme in addition to the expenses of the underlying schemes in which the Scheme makes investment.

Expense Ratio of Underlying Schemes as on September 30, 2025:

Underlying Scheme	Expense Ratio (p.a.)
Quantum Nifty 50 ETF	0.09%

ILLUSTRATION OF IMPACT OF EXPENSE RATIO ON SCHEME'S RETURN:

Particular	Regular Plan	Direct Plan
Opening NAV at the beginning of the year (Rs.) (a)	100	100
Closing NAV before charging expense at the end of the year (b)	112	112
Scheme's gross returns for the year	12%	12%
Expense Charged during the year (other than Distribution Expenses/ Commission) (Rs.) (c)	1	1
Distribution Expenses/ Commission charged during the year (Rs.) (d)	0.15	0
NAV after charging expense (b-c-d)	110.85	111
Net Return to the Investor	10.85%	11%

The purpose of the above illustration is to explain the impact of expense ratio of the scheme. Above calculations are based on assumed NAV and Expenses. The actual NAV, expenses and return on your investment may be more or less.

D. LOAD STRUCTURE

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. B. Risk Factors

Scheme specific Risk Factors

Risks Factors related to Investments in Quantum Nifty 50 ETF

- The Scheme will invest in the units of Quantum Nifty 50 ETF (Q Nifty), a mutual fund scheme Replicating / Tracking Nifty 50 Index - in the form of an Exchange Traded Fund. The Scheme's performance may depend upon the performance of Q Nifty. Any change in the investment policy or the fundamental attributes of Q Nifty could affect the performance of the Scheme. All risks associated with underlying scheme, including performance of their underlying stocks of Nifty 50 Index, asset class risk, passive investment risk, indirect taxation risk, etc., will therefore be applicable in this Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying scheme
- The Scheme's NAV will react to the stock market movements, and movements in the NAV and tracking error of Quantum Nifty 50 ETF. The investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices market movements, and over longer periods during market downturns.
- Investors will bear the recurring expenses of the Scheme in addition to the expenses of Quantum Nifty 50 ETF that means investors' are bearing expense ratio of two schemes. Thus, the Scheme returns may be lower than the returns investors may obtain by directly investing in the Quantum Nifty 50 ETF
- The Scheme's performance may be impacted by exit loads that may be charged at the time of redemption from the Underlying Scheme.
- The Portfolio disclosure of the Scheme will be limited to providing the particulars of the Quantum Nifty 50 ETF where the Scheme has invested and will not include the investments made by Quantum Nifty 50 ETF.

Risk Factors – Quantum Nifty 50 ETF

- Although the units of Quantum Nifty 50 ETF are listed on the stock exchange, there can be no assurance that an active secondary market for Quantum Nifty 50 ETF will develop or be maintained.
- Trading in units of Quantum Nifty 50 ETF on the stock exchanges may be halted because of market conditions or for reasons that in view of stock exchange authorities or SEBI, trading in the units of Quantum Nifty 50 ETF is not advisable. In addition, trading of units of Quantum Nifty 50 ETF is subject to trading halts caused by extraordinary market volatility and pursuant to circuit filter rules of the stock exchanges and SEBI. There can be no assurance that the requirements of stock exchanges necessary to maintain the listing of the units of Quantum Nifty 50 ETF will continue to be met or will remain unchanged
- The units of Quantum Nifty 50 ETF may trade above or below their NAV. The NAV of Quantum Nifty 50 ETF will fluctuate with changes in the market value of its holdings. The trading prices of the units of Quantum Nifty 50 ETF will fluctuate in accordance with changes in its NAV as well as market supply and demand for

the units of Quantum Nifty 50 ETF. However, given that units of Quantum Nifty 50 ETF can be created and redeemed in Creation Units Size directly with Fund, it is expected that large discounts or premiums to the NAV of Quantum Nifty 50 ETF will not sustain due to arbitrage opportunity available.

- Any changes in trading regulations by the stock exchanges or SEBI may affect the ability of market maker to arbitrage resulting into wider premium / discount to NAV of Quantum Nifty 50 ETF.

Risk Related to Debt & Money Market Instruments

- Interest Rate Risk/Market Risk:**

Changes in interest rate may affect the Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in the fixed income securities and thereby to possible movements in the NAV.

- Credit Risk or Default Risk:**

Credit risk or Default risk refers to the risk that an issuer of a debt instrument may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk, bonds issued by non-government agencies are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a debt instrument will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

- Liquidity Risks:**

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or even during rebalancing of the Scheme's investment portfolio.

- Concentration Risk:**

The Scheme will invest in certain securities of certain companies, industries, sectors, asset type etc. based on its investment objectives and policies as outlined in this Scheme Information Document. The funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments.

- Settlement Risk:**

Different segments of the financial markets have different settlement cycle/ periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods.

- **Re-investment Risk:**

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk refers to the fall in the rate for reinvestment of interim cash flows than earlier assumed.

Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the Scheme.

- **NAV Performance Risk:**

The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme’s portfolio of securities. The returns of the Scheme’s investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc.

Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme’s investment objective will be attained or that the Scheme shall be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances. Different types of securities in which the Scheme would invest as stated in the offer document carry different levels and types of risk. Accordingly, the Scheme’s risk may increase or decrease depending upon its investment pattern e.g. corporate bonds carry a higher amount of risk than Government securities. Further even amongst corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

Lower rated or unrated securities are more likely to react to developments affecting the market and carry a higher credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities. The Investment Manager will consider both credit risk and market risk in making investment decisions.

The Scheme will endeavour to invest in highly researched securities offering relative yield for the commensurate risks. However, the erosion in the value of the investments/portfolio in the case of the debt markets passing through a bearish phase is a distinct possibility.

The NAV of the Scheme is largely dependent on the performance of the various debt instruments wherein the investment has been made which may fluctuate from time to time. The Scheme may use techniques and instruments for efficient portfolio management and diversify to reduce the risk of such fluctuations. However, these techniques and instruments if imperfectly used have the risk of the Scheme incurring losses due to mismatches particularly in a volatile market. The Fund’s ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any).

Besides, the fact that skills needed to use these instruments are different from those needed to select the Scheme’s securities. The use of these techniques involves possible impediments to effective portfolio

management or the ability to meet repurchase/redemption requests or other short-term obligations because of the percentage of the Scheme's assets segregated to cover its obligations.

C. Risk mitigation strategies

Risk is an important part of the investment functions. Effective Risk Management is critical to Fund Management for achieving financial goals. Investments made by the Scheme shall be made in accordance with Investment Objective of the Scheme and provisions of SEBI (Mutual Funds) Regulations.

The Fund has identified the following Risks and designed Risk Management Strategies, which is the part of the Investment Process to manage such risks.

Risk Associated with Investments in Units of Quantum Nifty 50 ETF

Types of Risk	Risk Management Strategies
Risk of deviating away from the investment objective of tracking Nifty 50 Total Index prices through investments in units of Quantum Nifty 50 ETF	<p>The approach adapted to managing the Scheme would be a passive investment approach. The Scheme endeavors to stay near fully invested at all times.</p> <p>Brokerage paid for buying units on the exchange may also lead to increase in deviation. To mitigate the same, the Scheme will analyze from time to time different ways of taking exposure to units of Quantum Nifty 50 ETF from the perspective of risk and return and decide the same in the best interest of investors. For e.g.: Investing directly with the fund by cash creation / redemption in creation size whenever possible will help to avoid payment of double brokerage charges.</p> <p>However, the bid ask spreads in the underlying scheme units and time lag for availability of fund for deployment may lead to small deviations.</p>
Price Risk	<p>Buying / selling on the exchange:</p> <p>On account of the usual bid-ask spread, the Scheme may pay / receive premium / discount while purchasing / selling the underlying scheme units on the exchange.</p> <p>The fair value of the units of the Quantum Nifty 50 ETF would be calculated on a real time basis and orders would be placed near the real time fair value to avoid overpaying while purchases or receiving less while selling other than a reasonable bid ask spread.</p> <p>Buying / selling directly through the Quantum Nifty 50 ETF</p> <p>In case fund may opt to transact directly with the AMC for subscription/redemption in creation size, there is risk involved of difference between actual transaction cost (Real time NAV) and End of Day applicable NAV given to investor. This will lead positively / negatively to the NAV of the fund and Tracking Error.</p>

Liquidity Risk	<p>It is found that sufficient liquidity is available in the market in the units of Quantum Nifty 50 ETF.</p> <p>In case of liquidity issues, the fund can opt for the alternative way of buying / selling units of the underlying scheme in the stock exchange. The underlying scheme units can then be bought / sold in order to deploy funds or to raise cash for redemptions.</p>
-----------------------	---

Risk Associated with Debt & Money Market Instruments

Types of Risk	Risk Management Strategies
Interest Rate Risk	<p>Since the Scheme can invest in short term and long-term instruments; interest rate risk is inherent in the portfolio.</p> <p>The management of interest rate risk is then a function of the quality of the fixed income research inputs and the active investment management strategy.</p> <p>Since the Scheme will not invest in derivatives, the management of interest rate risk would be achieved by diversification and altering the Scheme maturity profile at appropriate times.</p>
Credit and Default Risk	<p>The Scheme investment strategy limits the investments in debt instruments issued by private (non-government) companies. This reduces the inherent credit / default risk of the portfolio.</p> <p>The internal guidelines of the AMC also limit the investment in lower rated instruments. The Scheme has to necessarily invest a major portion of its investments in Treasury securities, government bonds and/or PSU Bonds thus lowering the overall credit risk in the portfolio.</p>
Liquidity Risk	<p>With the overall improvement in the reporting and transparency of traded market data of all debt and money market instruments, the Investments Team can gauge the liquidity of individual instruments in the portfolio. By this, the Scheme can also determine the time taken to liquidate the position based on historical traded data.</p>
Concentration Risk	<p>Quantum Mutual fund has a well laid out investment policy, applicable to all its debt schemes, which has set pre-defined limits of exposure to each security based on its maturity and credit profile.</p> <p>This ensures that the portfolio is not overly concentrated to one issuer or industry.</p> <p>Adequate portfolio liquidity can also help limit the losses due from large portfolio redemption.</p>

Counterparty Risk	<p>The Fund has single party counter-party limits to limit the damages from a failed settlement or delayed settlement by counterparty.</p> <p>Counterparty risk is also a function of the nature of the instrument and mode of settlement being followed.</p> <p>For instance, in government securities, the settlement of all trades are done through a clearing corporation thus ensuring lower likelihood of failed settlements and counterparty risk.</p>
Settlement Risk	<p>Government securities, T-bills, SDLs, TRI-Party Repo are now settled through a counter party clearing mechanism operated and managed by CCIL (clearing Corporation of India Ltd). This has vastly reduced settlement failures in these securities.</p> <p>Although, corporate bonds are still settled on a DVP basis, but the trades are now routed through a clearing corporation. This limits settlement failures arising out of a bilateral settlement.</p> <p>Our counterparty exposure norms also limit the risks of a failed settlement on the overall portfolio.</p>

II. Information about the scheme

A. Where will the scheme invest?

III. Other Details

A. Data of Underlying Funds	Fund Name	Quantum Nifty 50 ETF
	Benchmark Name	Tier I Benchmark - Nifty 50 TRI
	Investment Objective	<p>The investment objective of the scheme is to invest in stocks of companies comprising Nifty 50 Index and endeavor to achieve returns equivalent to the Nifty by “passive” investment. The scheme will be managed by replicating the Index in the same weightage as in the Nifty 50 Index with the intention of minimizing the performance differences between the scheme and the Nifty 50 Index in capital terms, subject to market liquidity, costs of trading, management expenses and other factors which may cause tracking error.</p> <p>There is no assurance that the Investment Objective of the Scheme will be achieved.</p>
	Investment Strategy	<p>The AMC uses a “passive” or indexing approach to try and achieve Schemes Investment objective. Unlike other funds, the Scheme does not try to “beat” the markets they track and do not seek temporary defensive positions when markets decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks with regard to over/ underperformance vis-à-vis a benchmark. The scheme would alter the scrips/weights as and when the same are altered in the Nifty 50 Index. As long as a Scheme invests at least 95% of its total assets in the stocks of its Underlying Index, it may also invest in Money Market Instruments.
