A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

The asset allocation under the Scheme, under normal circumstances, will be as follows:

Instruments	Indicative allocations (% of total assets)	
	Minimum	Maximum
Securities covered by the Nifty 50 Index	95%	100%
Money Market Instruments	0%	5%

The Cumulative Gross Exposure across Equity and Money Market Instruments shall not exceed 100% of the net assets of the Scheme pursuant to para-No. 12.24 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

Cash and cash equivalents as per SEBI letter no. SEBI/HO/ IMD-II/DOF3/ OW/P/ 2021/ 31487 / 1 dated November 03, 2021, which includes T-bills, Government Securities and Repo on Government Securities having residual maturity of less than 91 Days, shall not be considered for the purpose of calculating gross exposure limit.

Indicative Table

Sr. No.	Type of Instruments	Percentage of Exposure	Circular Reference
1	Securities Lending / Short Selling	5%	Para 12.11 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024
2	Equity Derivatives Hedging / Non – Hedging Purpose	10%	Para 12.25 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024

PORTFOLIO REBALANCING

In case of change in constituents of the index due to periodic review, the portfolio of the scheme shall be rebalanced within 7 calendar days.

Any transactions undertaken in the scheme portfolio of the scheme in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

CHANGE IN INVESTMENT PATTERN

As an index linked scheme, the investment policy is primarily passive management. However, the above mentioned investment pattern is indicative and subject to the SEBI (MF) Regulations and Circulars issued thereunder, the same may vary from time to time. As per SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the Fund Manager, may deviate from the above investment pattern for short term period on defensive considerations. The same will be rebalanced within 7 Business Days.

As per SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations

shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time. In case of change in constituents of the index due to periodic review, the portfolio of the Scheme shall be rebalanced within 7 calendar days or such other timeline as may be prescribed by SEBI from time to time.

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed 2.00% p.a. (based on daily rolling returns for last 12 months). However, in case of events like, Dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket, etc. or in abnormal market circumstances, the tracking error may exceed the above mentioned limits.

B. WHERE WILL THE SCHEME INVEST?

Subject to the Regulations and the disclosures as made under the Section “HOW WILL THE SCHEME ALLOCATE ITS ASSETS?”, the corpus of the Scheme can be invested in any (but not exclusive) of the following securities / instruments:

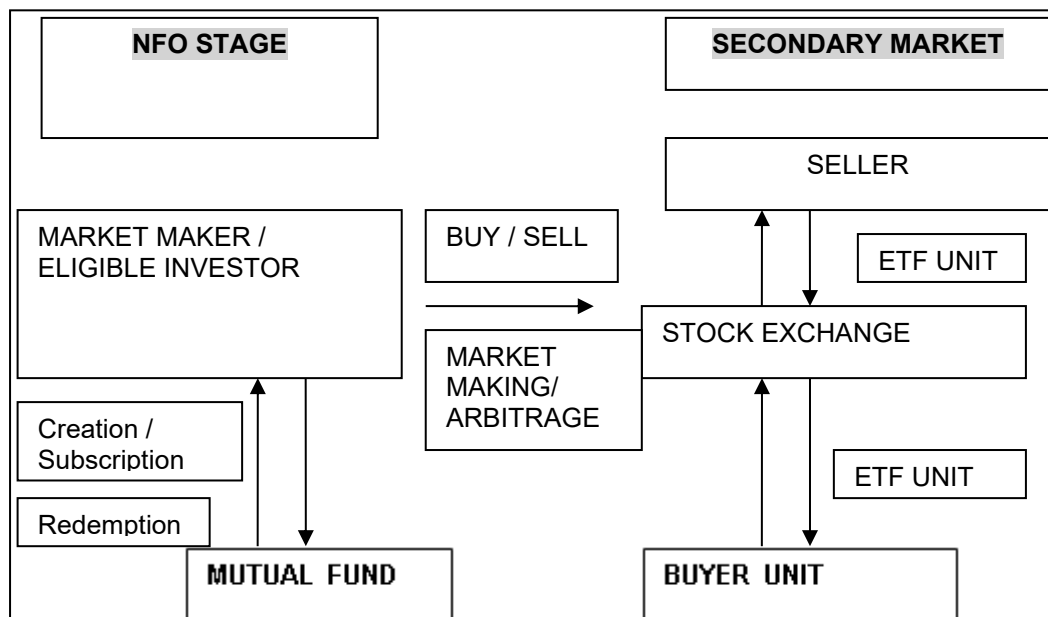

- a. Securities covered by the Nifty 50 Index
- b. Money Market Instruments
- c. Any other Securities / asset class / instruments as permitted under SEBI Regulations in line with the Investment Objective of the Scheme subject to regulatory approval, if any required.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The AMC uses a “passive” or indexing approach to try and achieve Scheme’s investment objective. Unlike other funds, the Scheme does not try to “beat” the markets they track and do not seek temporary defensive positions when markets decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks with regard to over/underperformance vis-à-vis a benchmark. The scheme would alter the scrips/weights as and when the same are altered in the Nifty 50 Index. As long as a Scheme invests at least 95% of its total assets in the stocks of its Underlying Index, it may also invest in Money Market Instruments.

The net assets of the scheme will be invested predominantly in stocks constituting the Nifty 50 and / or in Nifty 50 exchange traded derivatives. This would be done by investing in almost all the stocks comprising the Nifty 50 Index in approximately the same weightage that they represent in the Nifty 50 Index and / or investing in Nifty 50 exchange traded derivatives. A small portion of the net assets may be invested in Money Market Instruments and Tri-Party Repo to meet the liquidity requirements of the scheme.

INVESTMENT PROCESS AND RECORDING OF INVESTMENT DECISIONS

INVESTMENT PROCESS

The Scheme will track Nifty 50 Index and is a passively managed scheme. The investment decisions will be determined as per the Nifty 50 Index. Unlike other Fund, the Scheme does not try to “beat” the markets they track and do not seek temporary defensive positions when markets decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks in regard to over / underperformance vis-à-vis a benchmark. In case of any change in the index due to corporate actions or change in the constituents of Nifty 50 Index (as communicated by NSEIL), relevant investment decisions will be determined considering such changes.

As the Scheme will follow a passive investment strategy the endeavor will be to minimize portfolio turnover subject to the exigencies and needs of the schemes. Generally, as the scheme is open – ended, turnover will be confined to rebalancing of portfolio on account of new subscriptions, redemptions and change in the composition of the Nifty 50 Index. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

RECORDING OF INVESTMENT DECISIONS

The investment decisions will be taken for the Scheme keeping in view the market conditions, investment objective of the Scheme and all the relevant aspects. The AMC will review all the investments made by the Scheme. The investment decisions of the Scheme will be made by the AMC’s Portfolio Team and carried out by the designated Fund Manager. The final responsibility for the investment decisions rests with the portfolio team. All investment decisions of the scheme will be recorded in accordance with SEBI Regulations. It is the responsibility of the AMC to ensure that the investments are made as per the internal/Regulatory guidelines, Scheme investment objective and in the best interest of the Unitholders of the Scheme.

The Chief Executive Officer is not involved in the investment decision making process.

All investment decisions shall be recorded pursuant to para-No 12.23 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, or as may be revised by SEBI from time to time.

PERFORMANCE MEASUREMENT & REPORTING

The Investment Committee of the AMC at its regular meeting shall review performance of the Scheme, compliance of the various investment restrictions and compliance with the investment objective stipulated in the SID and all other applicable SEBI Regulations. The AMC and the Trustees shall also review the performance of the scheme at their periodical Board Meetings. The performance would be compared with the performance of the Benchmark and with peer group in the industry.

The CEO/Fund Manager will make presentations to the Board of the AMC and the Trustees periodically, indicating the performance of the Scheme. The Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark.

The CEO / the Fund Manager will bring to the notice of the AMC Board, specific factors if any, which are impacting the performance of the Scheme. The Board may after consideration of all relevant factors, if necessary, give appropriate directions to the AMC. Similarly, the performance of the Scheme will be submitted to the Trustees. The CEO / the Fund Manager will explain to the Trustees, the details on the Scheme's performance vis-à-vis the benchmark returns. The Trustees and the AMC Board may also review the performance of the scheme vis-à-vis the benchmark and may take corrective action in case of unsatisfactory performance.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Tier I Benchmark - Nifty 50 TRI

The benchmark is representative of Fund's Investment Objective and Asset Allocation and most suited for comparison for performance of the scheme.

The Trustee/AMC reserves the right to change the benchmark for the evaluation of the performance of the Scheme from time to time, keeping in mind the investment objective and Asset Allocation of the Scheme and the appropriateness of the benchmark.

vi. INVESTMENTS OF AMC IN THE SCHEME

The AMC may invest in the Scheme at any time during the continuous offer period subject to the SEBI Regulations & Circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time. As per the existing SEBI Regulations, the AMC will not charge investment management and advisory fees on the investment made by it in the Scheme.

Further, the AMC shall, based on the risk value assigned to the scheme, invest minimum amount as a percentage of assets under management of the scheme, pursuant to para-No. 6.9.2 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. For details of such investments, please refer the link: <https://www.quantumamc.com/downloads/AMC-Investment-in-schemes-of-Quantum-MF.pdf>

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit will be computed by dividing the net assets of the Scheme/Plan/Option by the number of units outstanding under the Scheme/Plan/Option on the valuation date.

The Net Assets Value (NAV) per unit under the Scheme/Plan/Option shall be calculated as follows:

$$\text{NAV (₹)} = \text{Market or Fair Value of Scheme's Investments} + \text{Current Assets including accrued income} - \text{Current Liabilities and Provisions including accrued expenses}$$

$$\text{No. of Units outstanding under Scheme/Plan/Option}$$

The numerical illustration of the above method is provided below:

Market or Fair Value of Scheme's investments (Rs.) = 15,00,000

Current Assets (Rs.) = 7,00,000

Current Liabilities and Provisions (Rs.) = 5,00,000

No. of Units outstanding under the Scheme = 1,30,000

$$\text{NAV per unit (Rs.)} = \frac{15,00,000 + 7,00,000 - 5,00,000}{1,30,000} = \frac{17,00,000}{1,30,000} = 13.0769$$

The NAV will be calculated and announced as of the close of every Business Day by 11.00 p.m. The repurchase price shall not be lower than 95% of the NAV subject to SEBI regulation as amended from time to time. For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

INDICATIVE NAV:

Indicative NAV (iNAV) is the per unit NAV based on the current market value of its portfolio during the trading hours of the scheme.

iNAV shall be disclosed on a continuous basis on the stock exchange(s), where the units of the scheme are listed and traded. The iNAV shall be updated within a maximum time lag of 15 seconds from underlying market.

Calculation for determination of NAV (As on September 30, 2025)

Portfolio Value (A)	72,25,86,327.13
Cash & Cash Equivalents (B)	50,921.54
Net Assets of the Scheme (A+B)	72,26,37,248.67
No. of Units of the Scheme (C)	2,69,146
NAV per unit (A+B)/C	2,684.9266

Pursuant to para-No. 10.1.16 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, read with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024, the AMC shall allocate 5% of Total TER charged to direct plans, subject to maximum of 0.5 bps of AUM funds towards Investor Education and Awareness Initiatives.

Goods & Service Tax (GST) / Statutory Levies if any, on Investment Management and Advisory Fees will be charged as permitted under the SEBI Regulations.

Brokerage and transaction cost incurred for the purpose of execution of trade will be expensed out in the scheme to the extent of 0.12% for cash market transactions. Brokerage and transaction costs exceeding of 0.12% for cash market transactions if any may be charged to the scheme within the maximum limit of TER as prescribed under regulation 52 of the Regulations.

The AMC has estimated that the above expense will be charged to the Scheme as permitted under Regulation 52 of SEBI (Mutual Funds) Regulations, 1996. The Fund will disclose the Total Expense Ratio (TER) of the Scheme on a daily basis on the website of the AMC (www.QuantumAMC.com) and of AMFI (www.amfiindia.com). Any change in the base TER charged to any scheme/plan will be communicated to investors of the scheme/plan through notice via email or SMS at least three working days prior to effecting such change. Investors can refer the aforesaid notice on the AMC website at the link: <https://www.quantumamc.com/total-expense-ratio>.

As per Regulation 52(6)(b) of SEBI (MF) Regulations, the total expenses of the Scheme, including Investment Management and Advisory Fees shall not exceed 1% of the daily net asset of the scheme.

The maximum recurring expenses of the Scheme, including the investment management and advisory fee, together with additional expenses if any, shall not exceed the limits prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations 1996 read with the SEBI Master Circular dated June 27, 2024.

ILLUSTRATION OF IMPACT OF EXPENSE RATIO ON SCHEME' S RETURN:

Opening NAV at the beginning of the year (Rs.) (a)	100
Closing NAV before charging expense at the end of the year (b)	112
Scheme's gross returns for the year	12%
Total Expense Charged during the year (Rs.) (c)	1
NAV after charging expense (b-c)	111
Net Return to the Investor	11%

The purpose of the above illustration is to explain the impact of expense ratio of the scheme. Above calculations are based on assumed NAV and Expenses. The actual NAV, expenses and return on your investment may be more or less.

B. Risk Factors

Scheme Specific Risk Factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total returns and / or its ability to meet its objective.

- The Scheme's NAV will react to the stock market movements. The investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices market movements, and over longer periods during market downturns.
- Although Q Nifty Units described in this Scheme Information Document is listed on the Stock Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- Trading in Q Nifty Units on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange Authorities or SEBI. In addition, trading in Q Nifty Units is subject to trading halts caused by extraordinary market volatility and pursuant to NSE and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Q Nifty Units will continue to be met or will remain unchanged.
- The units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Q Nifty Units will fluctuate in accordance with changes in their NAV as well as market supply and demand for Q Nifty Units. However, given that Q Nifty Units can be created and redeemed in Creation Unit Size directly with the fund, it is expected that large discounts or premiums to the NAV of Q Nifty Units will not sustain due to arbitrage possibility available.
- The market price of ETF units, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV), and (2) demand and supply of units in the market. Sizeable demand or supply of the units in Exchange may lead to market price of the units to quote at premium or discount to NAV. Hence the price of Q Nifty units is less likely to hold significant variance (large premium or discount) from the latest declared NAV all the time.
- Any changes in trading regulations by the Stock Exchange/s or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV.
- The units will be issued only in dematerialized form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder.

- Investors may note that even though this is an open-ended scheme, the scheme would only in case of Market Makers and Eligible Investors repurchase units and that too only in Creation Unit Size. Thus, unit holdings less than the Creation Unit Size can only be sold through the secondary market on the exchange.
- The returns from the types of securities in which the Scheme invests may underperform returns from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under performance in comparison of the general securities markets.
- The Scheme is not actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its Underlying Index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Risks attached with the use of derivatives

As and when the Schemes trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of derivatives requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

Tracking Error Risk Factors such as the fees and expenses of the Scheme, Corporate Actions, Cash balance, changes to the Underlying Index and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The Scheme's returns may therefore deviate from those of its Underlying Index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the index and the NAV of the Scheme. Tracking Error may arise due to the following reasons: -

- a. Expenditure incurred by the fund.
- b. The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions of securities in the index.
- c. Securities trading may halt temporarily due to circuit filters.
- d. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- e. Rounding off quantity of shares underlying the index.
- f. Payout of Income Distribution cum Capital Withdrawal.
- g. NSEIL undertakes a periodical review of the scrips that comprise the Underlying Index and may either drop or include new scrips. In such an event, the Fund will try to reallocate its portfolio but the available

investment / reinvestment opportunity may not permit absolute mirroring immediately.

Given the structure of Q Nifty Units, the AMC expects the tracking error to be lower.

The Securities lending activity by the Scheme will have the inherent probability of collateral value drastically falling in time of strong downward market trends or due to it being comprised of tainted/ forged securities, resulting in inadequate value of collateral until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and / or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Also, the risk could be in the form of non-availability of ready stock for sale during the period stock is lent.

The Scheme may use various Nifty 50 index related derivative products in an attempt to protect the value of portfolio and enhance the unit holder interest. As and when the Scheme trades in derivative market, there are risk factors and issues concerning the use of derivatives that the investors should understand. Derivative products are specialized instruments that require investment technique and risk analysis different from those associated with stocks. The use of derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivative requires the maintenance of adequate controls to monitor the transactions entered into, the ability to access the risk that a derivative adds to the portfolio and the ability to forecast price. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "Counter Party") to comply with the terms of the derivative contract. Other risks in using derivative include the risk of mis-pricing or improper valuation of derivative and the inability of derivative to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. The risk of loss associated with future contracts is potentially unlimited due to the low margin deposits required and the extremely high degree of leverage involved in future pricing. As a result, a relatively small price movement in a futures contract may result in an immediate and substantial loss or gain. However, the Scheme will not use derivative instruments for speculative purposes or to leverage its net assets. There may be a cost attached to buying index futures or other derivative instrument. Further there could be an element of settlement risk, which could be different from the risk in settling physical shares. The possible lack of liquid secondary market for futures contract or listed option may result in inability to close futures or listed position prior to these maturity date.

Repurchase / Redemption by the unit holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise.

Risk Related to Debt & Money Market Instruments

- **Interest Rate Risk/Market Risk:**

Changes in interest rate may affect the Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in the fixed income securities and thereby to possible movements in the NAV.

- **Credit Risk or Default Risk:**

Credit risk or Default risk refers to the risk that an issuer of a debt instrument may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk, bonds issued by non-government agencies are sold at a higher yield above those offered on Government Securities which

are sovereign obligations and free of credit risk. Normally, the value of a debt instrument will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

- **Liquidity Risks:**

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or even during rebalancing of the Scheme's investment portfolio.

- **Concentration Risk:**

The Scheme will invest in certain securities of certain companies, industries, sectors, asset type etc. based on its investment objectives and policies as outlined in this Scheme Information Document. The funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments.

- **Settlement Risk:**

Different segments of the financial markets have different settlement cycle/ periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods.

- **Re-investment Risk:**

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk refers to the fall in the rate for reinvestment of interim cash flows than earlier assumed.

Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the Scheme.

- **NAV Performance Risk:**

The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc.

Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme shall be in a position to maintain the model

percentage of investment pattern particularly under exceptional circumstances. Different types of securities in which the Scheme would invest as stated in the offer document carry different levels and types of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern e.g. corporate bonds carry a higher amount of risk than Government securities. Further even amongst corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

Lower rated or unrated securities are more likely to react to developments affecting the market and carry a higher credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities. The Investment Manager will consider both credit risk and market risk in making investment decisions.

The Scheme will endeavour to invest in highly researched securities offering relative yield for the commensurate risks. However, the erosion in the value of the investments/portfolio in the case of the debt markets passing through a bearish phase is a distinct possibility.

The NAV of the Scheme is largely dependent on the performance of the various debt instruments wherein the investment has been made which may fluctuate from time to time. The Scheme may use techniques and instruments for efficient portfolio management and diversify to reduce the risk of such fluctuations. However, these techniques and instruments if imperfectly used have the risk of the Scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any).

Besides, the fact that skills needed to use these instruments are different from those needed to select the Scheme's securities. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase/redemption requests or other short-term obligations because of the percentage of the Scheme's assets segregated to cover its obligations.

C. Risk mitigation strategies

Risk is an important part of the investment functions. Effective Risk Management is critical to Fund Management for achieving financial goals. Investments made by the Scheme shall be made in accordance with Investment Objective of the Scheme and provisions of SEBI (MF) Regulations.

The Fund has identified the following Risks and designed Risk Management Strategies, which is the part of the Investment Process to manage such risks.

Type of Risks	Risk Management Strategies
Tracking Error Risk - Risk of deviating away from the investment objective of tracking Nifty 50 Index	The Fund follows a passive investment approach and invests as per the Nifty Index. The Fund does not try to beat the markets and do not seek temporary defensive positions when markets decline or appear overvalued.
Liquidity Risk - High impact cost	At the time of rebalancing of the portfolio of the scheme in case required quantity of stocks are not available due to low volume in some stocks in such cases the quantity of stocks will be broken down across proportionally in all stocks comprises in Nifty 50 Index so that no stock will have more weightage than the required at such time.
Changes in composition: Addition / deletion of stocks in Nifty 50 Index	The rebalancing of stocks shall be done at the appropriate time within 7 calendar days so that tracking error can be minimized.
Changes in weightage of stock due to corporate action like merger, demerger or issue of QIP	The rebalancing of stocks shall be done at the appropriate time within 7 calendar days so that tracking error can be minimized.

Risk Associated with Debt & Money Market Instruments

Types of Risk	Risk Management Strategies
Interest Rate Risk	<p>Since the Scheme can invest in short term and long-term instruments; interest rate risk is inherent in the portfolio.</p> <p>The management of interest rate risk is then a function of the quality of the fixed income research inputs and the active investment management strategy.</p> <p>Since the Scheme will not invest in derivatives, the management of interest rate risk would be achieved by diversification and altering the Scheme maturity profile at appropriate times.</p>
Credit and Default Risk	<p>The Scheme investment strategy limits the investments in debt instruments issued by private (non-government) companies. This reduces the inherent credit / default risk of the portfolio.</p> <p>The internal guidelines of the AMC also limit the investment in lower rated instruments. The Scheme has to necessarily invest a major portion of its</p>

	investments in Treasury securities, government bonds and/or PSU Bonds thus lowering the overall credit risk in the portfolio.
Liquidity Risk	With the overall improvement in the reporting and transparency of traded market data of all debt and money market instruments, the Investments Team can gauge the liquidity of individual instruments in the portfolio. By this, the Scheme can also determine the time taken to liquidate the position based on historical traded data.
Concentration Risk	<p>Quantum Mutual fund has a well laid out investment policy, applicable to all its debt schemes, which has set pre-defined limits of exposure to each security based on its maturity and credit profile.</p> <p>This ensures that the portfolio is not overly concentrated to one issuer or industry.</p> <p>Adequate portfolio liquidity can also help limit the losses due from large portfolio redemption.</p>
Counterparty Risk	<p>The Fund has single party counter-party limits to limit the damages from a failed settlement or delayed settlement by counterparty.</p> <p>Counterparty risk is also a function of the nature of the instrument and mode of settlement being followed.</p> <p>For instance, in government securities, the settlement of all trades are done through a clearing corporation thus ensuring lower likelihood of failed settlements and counterparty risk.</p>
Settlement Risk	<p>Government securities, T-bills, SDLs, TRI-Party Repo are now settled through a counter party clearing mechanism operated and managed by CCIL (clearing Corporation of India Ltd). This has vastly reduced settlement failures in these securities.</p> <p>Although, corporate bonds are still settled on a DVP basis, but the trades are now routed through a clearing corporation. This limits settlement failures arising out of a bilateral settlement.</p> <p>Our counterparty exposure norms also limit the risks of a failed settlement on the overall portfolio.</p>

II. INFORMATION ABOUT THE SCHEME

A. Where will the scheme invest?

Subject to the Regulations and the disclosures as made under the Section “HOW WILL THE SCHEME ALLOCATE ITS ASSETS?”, the corpus of the Scheme can be invested in any (but not exclusive) of the following securities / instruments:

The scheme shall not invest more than:

- a. 10% of its NAV in debt and money market securities rated AAA; or
- b. 8% of its NAV in debt and money market securities rated AA; or
- c. 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of its NAV of the Scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to overall limit of 12% of its NAV of the Scheme for a single issuer.

Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and Tri-party Repos on Government securities or treasury bills (TREPS).

6. The Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments.

Provided that the Scheme may invest in unlisted non- convertible debentures up to a maximum of 10% of the debt portfolio of the Scheme subject to such conditions as may be specified by SEBI from time to time.

7. The Mutual Fund under all its Scheme(s) will not own more than 10% of any Company's paid-up capital carrying voting rights.

Provided that the Sponsor of the Fund, its associate or group company including the asset management company of the Fund, through the Scheme(s) of the Fund or otherwise, individually or collectively, directly or indirectly, shall not have 10% or more of the shareholding or voting rights in the asset management company or the trustee company of any other mutual fund.

8. Transfer of investments from one scheme to another scheme in the same Mutual Fund, shall be allowed only if:-

- (i) Such transfers are made at the prevailing market price for quoted Securities on spot basis

Explanation: spot basis shall have the same meaning as specified by Stock Exchange for spot transactions

Provided that inter scheme transfer of money market or debt security (irrespective of maturity) shall take place based on prices made available by valuation agencies as prescribed by SEBI from time to time.

- (ii) The securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.

10. The Scheme shall abide by the following guidelines for parking of funds in short term deposits Pursuant to para-No. 12.16 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

- (i) "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
- (ii) Such short-term deposits shall be held in the name of the Scheme.
- (iii) The Scheme(s) shall not park more than 15% of the net assets in short term deposit(s) of all the scheduled commercial banks put together. However, such limit may be raised to 20% with prior approval of the Trustee.
- (iv) Parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
- (v) The Scheme shall not park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
- (vi) The Scheme shall not park funds in short-term deposit of a bank, which has invested in the Scheme. Trustees/ AMC shall also take steps to ensure that a bank in which the Scheme has short term deposit does not invest in the Scheme until the Scheme has short term deposit with such bank.
- (vii) No investment management and advisory fees will be charged for such investments in the respective Scheme.

11. The Scheme shall not make any investments in:

- a. any unlisted security of an associate or group company of the Sponsors;
- b. any security issued by way of private placement by an associate or group company of the Sponsors;
- c. the listed securities of group companies of the Sponsors which is in excess of 25% of the net assets;
- d. any fund of funds scheme.

12. The Scheme shall not invest more than 10% of its NAV in case of the equity shares or equity related instruments of any company. Provided that, the limit of 10% shall not be applicable for Index Fund.

13. The Scheme shall only invest in equity shares or equity related instruments which are listed or to be listed.

The AMC/Trustee may alter these above stated restrictions from time to time to the extent the SEBI (MF) Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its investment objective. The AMC/Trustee may from time to time alter these restrictions in conformity with the SEBI (MF) Regulations. All investment restrictions shall be applicable at the time of making investment.

C. Fundamental Attributes

Following are the Fundamental Attributes of the scheme, in terms of Clause 1.14 of SEBI Master Circular for Mutual Funds dated June 27, 2024:

(i) Type of a scheme

An Open-ended Scheme Replicating/Tracking Nifty 50 Index.

(ii) Investment Objective

(a) Main Objective

The investment objective of the scheme is to invest in stocks of companies comprising Nifty 50 Index and endeavour to achieve return equivalent to the Nifty by “passive” investment. The Scheme will be managed by replicating the index in the same weightage as in the Nifty 50 Index with the intention of minimizing the performance differences between the scheme and the Nifty 50 Index in capital terms, subject to market liquidity, costs of trading, managing expenses and other factors which may cause tracking error.

There is no assurance that the Investment Objective of the Scheme will be achieved.

(b) Investment pattern

The tentative securities covered by the Nifty 50 Index and Money Market Instruments.

(iii) Terms of Issue

1. Liquidity provisions such as listing, repurchase, redemption:

The Scheme is an open-ended Exchange Traded Fund and is listed on the National Stock Exchange of India Limited (NSE). The trading will be as per the normal settlement cycle. In addition, mutual fund will repurchase units from Market Makers and Eligible Investors in Creation Unit Size on a daily basis.

2. Aggregate fees and expenses charged to the scheme:

The aggregate fees and expenses charged to the Scheme are provided under Part III - Other Details – Annual Scheme Recurring Expenses.

3. The Scheme is not guaranteed or assured returns scheme and hence no safety net or guarantee is provided.

In accordance with Regulation 18(15A) of the Regulations, the Trustees shall ensure that no change in the fundamental attributes of the Scheme and the Plan(s) / option(s) thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme and the Plan(s) / option(s) thereunder and affect the interests of Unit Holders is carried out unless:

- a. SEBI has reviewed and provided its comments on the proposal.
- b. A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nation-wide circulation as well as in a newspaper published in the language of the region where the head office of the Mutual Fund is situated; and
- c. The Unit Holders are given an option for a period of 30 (thirty) days to exit at the prevailing NAV without any Exit Load.

Fundamental Attributes will not cover such actions of the Trustees of the Fund or the Board of Directors of the AMC, made in order to conduct the business of the Trust, the Scheme or the AMC, where such business is in the nature of discharging the duties and responsibilities with which they have been charged. Nor will it include changes to the Scheme made in order to comply with changes in Regulations with which the Scheme has been required to comply.

D. Index Methodology –

About the Index

The Nifty 50 Index comprises of 50 companies and is a free float market capitalization weighted index. Stocks are selected based on their market capitalization and liquidity. An important aspect of Nifty 50 index is that the impact cost (cost of executing the entire set of Nifty 50 securities) is low. Nifty 50 stocks represent about 62.9% of the Total Free Float Market Capitalization of universe of stock traded on NSE as on March 31, 2017. The Nifty 50 index has a base date of November 03, 1995 with a base index value of 1000. The index is reviewed quarterly.

Attributes of the Index

The Nifty 50 Index is a broad based diversified index.

Index Service Provider

NSE Indices Limited (NSEIL) is a 100% subsidiary of the National Stock Exchange of India Ltd. (NSE). NSEIL has been formed with the objective of providing a variety of indices and index related services and products for the capital market.

E. Principles of incentive structure for market makers

Incentive, if any, will be paid to Market Makers based on trading volume, bid-ask spread, liquidity and time frame for market making. Incentives, if any, to Market Maker shall be charged to the Scheme within the maximum permissible limit of TER.
