A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

The asset allocation under the Scheme, under normal circumstances, will be as follows:

Instruments	Indicative allocations (% of total assets)	
	Minimum	Maximum
Equity & Equity Related Instruments	65%	100%
Debt & Money Market Instruments	0%	35%

The cumulative gross exposure through all permissible investments viz. Equity & Equity Related Instruments and Debt & Money Market Instruments shall not exceed 100% of the net assets of the Scheme pursuant to para-No. 12.24 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

Cash and cash equivalents as per SEBI letter no. SEBI/HO/IMD-II/DOF3/OW/P/2021/31487/1 dated November 03, 2021, which includes T-bills, Government Securities and Repo on Government Securities having residual maturity of less than 91 Days, shall not be considered for the purpose of calculating gross exposure limit.

Indicative Table

Sr. No.	Type of Instruments	Percentage of Exposure	Circular Reference
1	Securities Lending	Upto 50% Net Asset Subject to 5% Overall Stock Lending to any one intermediary	Para 12.11 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024
2	Equity Derivatives Hedging Purpose	5%	Para 12.25 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024
3	Overseas Securities / ADRs / GDRs	10%	Para 12.19 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024

Portfolio Rebalancing in case of deviation from Asset Allocation Under Defensive Consideration

The asset allocation pattern indicated above may change from time to time, depending on liquidity considerations or on account of high levels of subscriptions or Repurchase / Redemptions relative to Scheme size, or upon various defensive considerations including market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary substantially depending upon the perception of the AMC the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and only for defensive considerations. In the event of deviations from the above asset allocation table, the Fund Manager will carry out rebalancing within 30 Calendar Days in accordance to para-No. 2.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. However, at all the times the portfolio will adhere to the overall investment objectives of the Scheme.

Portfolio Rebalancing in case of Passive Breach

Pursuant to para-No. 2.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, in the event of deviation from the above asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the rebalancing shall be done within 30 Business Days. In case the rebalancing is not done within 30 Business Days, then justification in writing including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desires, can extend the timelines upto 60 Business Days from the date of completion of 30 Business Days rebalancing period.

In case the portfolio of scheme is not rebalanced within the aforementioned mandated plus extended timelines, the AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- ii. not to levy exit load, if any, on the investors exiting from the scheme.

AMC shall report the deviation to Trustees at each stage. Further, in case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme:

1. AMCs shall immediately disclose the same to the investors through SMS and email / letter including details of portfolio not rebalanced.
2. AMCs shall also immediately communicate to investors through SMS and email / letter when the portfolio is rebalanced.

AMCs shall also disclose any deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.

B. WHERE WILL THE SCHEME INVEST?

Subject to the Regulations and the disclosures as made under the Section “HOW WILL THE SCHEME ALLOCATE ITS ASSETS?”, the corpus of the Scheme can be invested in any (but not exclusive) of the following securities / instruments:

- a) Equity and Equity Related Instruments
- b) Debt & Money market instruments.
- c) Any other Securities / asset class / instruments as permitted under SEBI Regulations in line with the Investment Objective of the Scheme subject to regulatory approval, if any required.

C. WHAT ARE THE INVESTMENT STRATEGIES?

Investment Philosophy/Strategy

The investment strategy of the Scheme will be to invest in a basket of stocks after using intensive fundamental analysis, both quantitative and qualitative, monitor the portfolio actively but not so as to engage in excessive trading, and control risk by keeping the portfolio adequately diversified (both in terms of the sectors included in the portfolio as well as with respect to the level of concentration of any particular investment).

The primary focus of the Scheme will be on companies that will typically be included in the BSE 200 Index. Valuations will be developed based on the business of the company, the environment in which it operates the skills and resources of its management, the strength of its balance sheet and cash flow relative to its long term goals, and other fundamental sector criteria. Investments will be made in companies whose shares are undervalued when compared to long term valuation expectations. Investments will be sold when the Investment Manager believes the market price of the shares has exceeded its assessment of the long term value of that company, or if there are adverse changes to that company's management, prospects or the markets in which that company operates. This evaluation against market prices will tend to be based on fundamental criteria (dividend yields, price to earnings, price to cash flow, price to book value, and other different measures of share price ratios), relative to a company's peer group, its history and the overall equity markets.

Market liquidity will be an important tool to mitigate investment risk. Accordingly, a number of the companies in the portfolio may be included in the BSE 200 TRI that the Investment Manager will use as a Tier II benchmark, but this will not be a criterion for including a company in the Scheme's portfolio and the portfolio may not include some of the companies in the BSE 200 TRI. There may, however, be situations where other factors make an investment attractive enough to cause the Investment Manager to purchase a stock despite a relatively low level of liquidity in that stock. In addition, as noted above, the Scheme may invest in securities which are to be listed.

The Scheme may seek investment opportunity in the ADR / GDR and Foreign Securities (maximum 10% of Net Assets) subject to SEBI (Mutual Funds) Regulations, 1996. The Scheme may use derivatives for the purpose of hedging and portfolio balancing (max. 5% of Net Assets) based on the opportunities available subject to SEBI (Mutual Funds) Regulations, 1996. The fund doesn't intend to take derivative positions in normal circumstances. If deemed necessary, the fund may take opportunistic exposure to stock derivatives or index derivatives. The derivative position may be used to ensure liquidity at specified limit prices or hedging purpose.

Investment Portfolio

The Scheme's investment portfolio typically will consist of investments made in shares of "Indian companies" (defined as a company that is listed on a stock exchange in India or elsewhere and, if not located in India, has over 50% of its assets, revenues, or profits generated from operations in India). The Scheme will invest primarily in equity securities of Indian issuers listed on an Indian stock exchange, or on an approved over-the-counter exchange, including in the form of Depository Receipts. From time to time the Scheme may also invest in synthetic instruments, such as derivatives, as permitted under the SEBI Regulations, which are used to gain exposure to the stocks listed on the Indian stock exchanges, and in the shares of companies that are to be listed. The Board of Quantum AMC will from time to time review and approve the overall investment policy and strategy of the portfolio held by the Scheme. The Scheme will be subject to the investment restrictions prescribed under the SEBI (Mutual Fund) Regulations 1996.

While the majority of the assets will be invested in the securities of Indian companies, the Scheme may also invest in Debt & money market instruments or in units of liquid schemes under the Quantum AMC or any other Mutual Fund, subject to the applicable SEBI Regulation limits, for brief periods of time pending investment in equities or other securities more generally associated with the Scheme's portfolio.

The Scheme will also have the ability to invest in the following derivative products (provided these products are listed on a stock exchange); equity and index options, derivatives (including single-stock futures, index futures and currency futures). The Scheme will make such investments only when potential returns are appropriately high enough to justify such investments, in light of the Scheme's objectives. These types of investments will be less than 5% of the total assets of the Scheme. Securities acquired by the Scheme will primarily be denominated in Indian Rupees, although investments may also be made in other currencies, if justified under circumstances then prevailing.

Generally speaking, the portfolio will tend to include shares of 25 to 40 different companies, and the value of the holdings of any one company will tend to be in the range of 2% to 6% of the value of the portfolio. Particular sectors or industries will not be a significant factor in the decision to add a company to the Scheme's portfolio.

INVESTMENT PROCESS AND RECORDING OF INVESTMENT DECISIONS

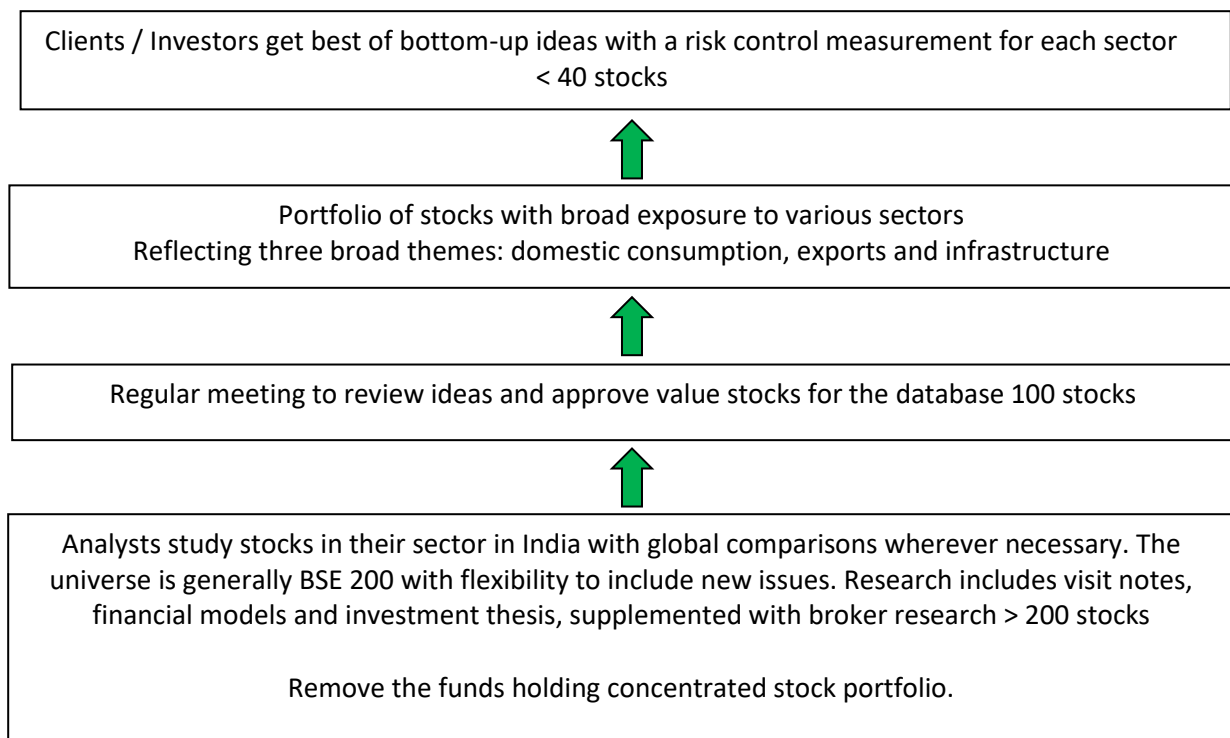

INVESTMENT PROCESS

The investment process consists of:

1. Stock selection
2. Portfolio construction

1. STOCK SELECTION

The AMC's stock selection approach is basically bottom up and is depicted below:

2. PORTFOLIO CONSTRUCTION

1. Stock liquidity shall be over US \$1 Million average daily trading volume over the last 1 year period.
2. Stock has to be under active and current coverage.
3. Every stock in the AMC's database has a pre – assigned Buy / Sell Limit. This is an INR price based on underlying fundamental sector criteria.
4. The AMC generally buys a new stock at the pre-determined Buy price (or below) and generally sells an existing stock at the pre-determined Sell price or above. It may add to a stock the Scheme already owns if it is between the pre-determined Buy and Sell price.
5. The AMC has adopted Tier II Benchmark – BSE 200 TRI which demonstrates the Investment Style / Strategy of the AMC. The AMC is indifferent to whether a stock, the Scheme owns, is in the BSE 200 TRI or not although it recognizes its effect on liquidity.
6. The AMC does not make sector calls. It makes stock calls.
7. With a range of 25 to 40 stocks the Schemes average holding is likely to be 2.5% to 4.0% per stock and the portfolio turnover is expected to be between 33% and 50% suggesting a 2.5 year's average holding period.

The Scheme will adopt a long-term approach to investing, typically holding stocks for a 2 to 3 year's period, suggesting an average portfolio turnover of between 33% and 50% subject to market conditions. For several of the stocks in the portfolio, the holding period has been longer than 3 years, resulting in lower turnover. The goal of the Scheme is not to achieve an absolute return but, instead, will aim to outperform the benchmark BSE 500 Total Return Index.

PROCEDURE AND RECORDING OF INVESTMENT DECISION

The investment decisions are made by the AMC's Portfolio Team. The Portfolio Team comprises of the Fund Manager, who heads the team, and the Associate Fund Manager. The final responsibility for the investment decisions rests with the Portfolio Team. The Equity Research team meets on a regular basis, with the research analysts presenting research reports on various stocks. The Portfolio Team reviews the research reports / presentations on the various stocks and keeping in mind the investment objective of the Scheme makes the investment decisions, recording the reasons and justification for each investment decision. The investment decisions of the Scheme will be carried out by the Designated Fund Manager/Associate Fund Manager.

The Chief Executive Officer is not involved in the investment decision making process. Record of all investment decisions will be maintained with justifications for the same as required under the regulations.

It is the responsibility of the AMC to ensure that the investments are made as per the internal / Regulatory guidelines, Scheme's investment objective and in the best interest of the Unit holders of the Scheme.

All investment decisions shall be recorded pursuant to para-No 12.23 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, or as may be revised by SEBI from time to time.

PERFORMANCE MEASUREMENT AND REPORTING

The Investment Committee of the AMC at its regular meeting shall review performance of the Scheme, compliance of the various investment restrictions and compliance with the investment objectives stipulated in the Scheme Information Document and all other applicable SEBI Regulations. The AMC and Trustees shall also review the performance of the scheme at their periodical Board Meetings. The performance would be compared with the performance of the Benchmark and with peer group in the industry.

The CEO/Fund Manager will make presentations to the Board of the AMC and the Trustees periodically, indicating the performance of the Scheme. The Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark.

The CEO/Fund Manager will bring to the notice of the AMC Board, specific factors if any, which are impacting the performance of the Scheme. The Board on consideration of all relevant factors may, if necessary, give appropriate directions to the AMC. Similarly, the performance of the Scheme will be submitted to the Trustees. The CEO/Fund Manager will explain to the Trustees, the details on the Schemes' performance vis-à-vis the benchmark returns. The Trustees and the AMC Board may also review the performance of the schemes vis-à-vis the benchmark and may take corrective action in case of unsatisfactory performance.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Tier I benchmark – Reflective of Value Category – BSE 500 TRI

Tier II benchmark - Demonstrating Investment Style / Strategy of the Fund Manager - BSE 200 TRI

The benchmark is representative of Fund's Investment Objectives and Asset Allocation and most suited for comparison for performance of the scheme.

The Tier II Benchmark demonstrates Investment Style / Strategy and represents closely resemble the investment objective of the scheme.

The Trustee/AMC reserves the right to change the benchmark for the evaluation of the performance of the Scheme from time to time, keeping in mind the Investment Objective & Asset Allocation of the Scheme and the appropriateness of the benchmark.

Sr. No.	Category of Persons	Net Value		Market Value (in Rs.)
		Units	NAV per unit*	
1.	Scheme's Fund Manager	35,162.85	128.61	45,22,294.14

*Average NAV (i.e. Market Value/units)

The Investment includes investments made under Alignment of Interest by Designated Employees in terms of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

For investments by key personnel and AMC directors including regulatory provisions in this regard kindly refer the SAI.

vi. INVESTMENTS OF AMC IN THE SCHEME

The AMC may invest in the Scheme at any time during the continuous offer period subject to the SEBI Regulations & Circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time. As per the existing SEBI Regulations, the AMC will not charge investment management and advisory fees on the investment made by it in the Scheme.

Further, the AMC shall, based on the risk value assigned to the scheme, invest minimum amount as a percentage of assets under management of the scheme, pursuant to para-No. 6.9.2 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. For details of such investments please refer the link: <https://www.quantumamc.com/downloads/AMC-Investment-in-schemes-of-Quantum-MF.pdf>

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit will be computed by dividing the net assets of the Scheme/Plan/Option by the number of units outstanding under the Scheme/Plan/Option on the valuation date.

The Net Assets Value (NAV) per unit under the Scheme/Plan/Option shall be calculated as follows:

$$\text{NAV (')} = \text{Market or Fair Value of Scheme's Investments} + \text{Current Assets including accrued income} - \text{Current Liabilities and Provisions including accrued expenses}$$

$$\text{No. of Units outstanding under Scheme/Plan/Option}$$

The numerical illustration of the above method is provided below:

Market or Fair Value of Scheme's investments (Rs.) = 10,00,000

Current Assets (Rs.) = 1,00,000

Current Liabilities and Provisions (Rs.) = 50,000

No. of Units outstanding under the Scheme = 1,00,000

$$\text{NAV per unit (Rs.)} = \frac{10,00,000 + 1,00,000 - 50,000}{1,00,000} = \frac{10,50,000}{1,00,000} = 10.50$$

The NAV will be calculated and announced as of the close of every Business Day by 11.00 p.m. The repurchase price shall not be lower than 95% of the NAV subject to SEBI regulation as amended from time to time. For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Sale (Subscription) and Repurchase (Redemption) Price Illustration:

Assumed NAV Rs.11.00 Per Unit, Entry Load – Nil, Exit Load – 1%

Sale Price = NAV + (Entry Load (%) (if any) * NAV)

Sale Price = 11 + (0% * 11)

Sale Price = 11 + 0

Sale Price = Rs.11/-

Repurchase Price = NAV – (Exit Load (%) * NAV)

Repurchase Price = 11 – (1% * 11)

Repurchase Price = 11 – 0.11

Repurchase Price = Rs.10.89

B. NEW FUND OFFER (NFO) EXPENSES

This section does not apply to the Scheme covered in this SID, as the ongoing offer of the Scheme has commenced after the NFO and the Units are available for continuous subscription and redemption.

C. ANNUAL SCHEME RECURRING EXPENSE

These are the fees and expenses for operating the scheme. These expenses include, Registrar and Transfer Agent fee, marketing and selling costs, custody fees etc.

The estimated recurring expenses of the Scheme are as under:

Expense Head	% of daily Net Assets
Investment Management and Advisory Fees	Up to 2.25%
Trustee fee	
Audit fees	
Custodian fees	
Registrar & Transfer Fees	
Marketing & Selling expense including agent commission	
Cost related to investor communications	
Cost of fund transfer from location to location	
Cost of providing account statements and IDCW redemption cheques and warrants	
Costs of statutory Advertisements	
Cost towards investor education & awareness (at least 2 bps)^	
Goods and Services tax on expenses other than investment and advisory fees	
Goods and Services tax on brokerage and transaction cost	
Other expenses*	
Maximum total expense ratio (TER) permissible under Regulation 52 (6) (C)	Up to 2.25%
Additional expenses for gross new inflows from specified cities under Regulation 52 (6A) (b)	NIL
Additional expenses under regulation 52 (6A) (c)	NIL

*as permitted under the Regulations.

^Investor Education and Awareness initiatives.

Pursuant to para-No. 10.1.16 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 the AMC shall annually set apart at least 2 basis points p.a. (i.e. 0.02% p.a.) on daily net assets of the Scheme within the limits of total expenses prescribed under Regulation 52 of SEBI (MF) Regulations for investor education and awareness initiatives undertaken by the Fund.

The Total Expense Ratio of Direct Plan will be lower to the extent of the distribution expenses / commission which is charged to the Regular Plan.

Goods & Service Tax (GST) / Statutory Levies if any, on Investment Management and Advisory Fees will be charged as permitted under the SEBI Regulations.

Brokerage and transaction cost incurred for the purpose of execution of trade will be expensed out in the scheme to the extent of 0.12% for cash market transactions. Brokerage and transaction costs exceeding of 0.12% for cash market transactions if any may be charged to the scheme within the maximum limit of TER as prescribed under regulation 52 of the Regulations.

The AMC has estimated that the above expense will be charged to the Scheme as permitted under Regulation 52 of SEBI (Mutual Funds) Regulations, 1996. The Fund will disclose the Total Expense Ratio (TER) of the Scheme on a daily basis on the website of the AMC (www.QuantumAMC.com) and of AMFI (www.amfiindia.com). Any change in the base TER charged to any scheme/plan will be communicated to investors of the scheme/plan through notice via email or SMS at least three working days prior to effecting such change. Investors can refer the aforesaid notice on the AMC website at the link: <https://www.quantumamc.com/total-expense-ratio>.

As per Regulation 52(6)(c) of SEBI (MF) Regulations, the total expenses of the Scheme, including Investment Management and Advisory Fees shall be subject to following limits as specified below:

Asset Under Management Slab	Expense Ratio (p.a.)
On the first Rs.500 Crores of the daily net assets	2.25
On the next Rs.250 Crores of the daily net assets	2.00
On the next Rs.1,250 Crores of the daily net assets	1.75
On the next Rs.3,000 Crores of the daily net assets	1.60
On the next Rs.5,000 Crores of the daily net assets	1.50
On the next Rs.40,000 Crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 Crores of daily net assets or part thereof
On balance of the assets	1.05%

The maximum recurring expenses of the Scheme, including the investment management and advisory fee, together with additional expenses if any, shall not exceed the limits prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations 1996 read with the SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

ILLUSTRATION OF IMPACT OF EXPENSE RATIO ON SCHEME'S RETURN:

Particular	Regular Plan	Direct Plan
Opening NAV at the beginning of the year (Rs.) (a)	100	100
Closing NAV before charging expense at the end of the year (b)	112	112
Scheme's gross returns for the year	12%	12%
Expense Charged during the year (other than Distribution Expenses/ Commission) (Rs.) (c)	1	1
Distribution Expenses/ Commission charged during the year (Rs.) (d)	0.15	0
NAV after charging expense (b-c-d)	110.85	111
Net Return to the Investor	10.85%	11%

The purpose of the above illustration is to explain the impact of expense ratio of the scheme. Above calculations are based on assumed NAV and Expenses. The actual NAV, expenses and return on your investment may be more or less.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.QuantumAMC.com) or may call at toll free no. (1800-22-3863 /1800-209-3863) or your distributor.

Exit Load	Load chargeable (as % of NAV)
10% of units if redeemed or switched out during exit load period i.e. 730 days from the allotment	NIL
Exit Load Period: 730 days from the date of allotment	
Remaining 90% of units in parts or full:	
(i) if redeemed or switched out on or before 365 days from the date of allotment	2%
(ii) if redeemed or switched out after 365 days but on or before 730 days from the date of allotment	1%
If units redeemed or switched out after 730 days from the date of allotment	NIL
Redemptions / Switch outs of units will be done on First In First Out (FIFO) basis. The above-mentioned load structure shall be equally applicable to the special facilities such as Systematic Withdrawal Plan (SWP) / Systematic Transfer Plan (STP) and Switches etc. However, no load shall be charged for switching between option / plan within the Scheme.	

I. Introduction

A. Definitions/interpretation

Please refer the link : [https://www.quantumamc.com/FileCDN/Pdf/Combined definitions & interpretations.pdf](https://www.quantumamc.com/FileCDN/Pdf/Combined%20definitions%20&%20interpretations.pdf)

B. Risk Factors

Scheme specific risk factors:

The Scheme proposes to invest primarily in equity and equity related securities. The Scheme will, to the extent required to meet Repurchase / Redemption obligations or for want of immediate appropriate investment opportunities in equity or equity related instruments, also hold the funds in money market instruments or, subject to the limits as prescribed under the SEBI (Mutual Fund) Regulations, 1996, invest in units of liquid schemes under the Quantum AMC or any other Mutual Funds. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to its inability to liquidate the cash equivalents in time could cause the Scheme to miss certain investment opportunities resulting, at times, in potential losses to the Scheme.

The Mutual Fund is not guaranteeing or assuring any returns. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.

Risks attached with the use of derivatives: As and when the Schemes trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of derivatives requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

Risks associated with stock lending: The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the Approved Intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities,

the inability of the Approved Intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the Approved Intermediary.

The Scheme may also invest in ADRs / GDRs as permitted by applicable government regulations, Reserve Bank of India and Securities and Exchange Board of India and with SEBI and RBI prior approvals as may be required. To the extent that some part of the assets of the Scheme may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment. Depending upon market conditions, there may be an increased risk of liquidity in the portfolio from time to time.

The Scheme may use derivatives instruments like Stock Index Futures or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines.

The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields. This may increase the absolute level of risk of the portfolio.

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in securities which are to be listed that have the potential to generate attractive yields.

Unitholders in the Scheme are not being offered any guaranteed / assured returns and Investors are advised to consult their Legal /Tax and other Professional Advisors in regard to tax/legal implications relating to their investments in the Scheme and before making decision to invest in or repurchase the Units.

Risk Related to Debt & Money Market Instruments:

- **Interest Rate Risk/Market Risk:**

Changes in interest rate may affect the Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in the fixed income securities and thereby to possible movements in the NAV.

- **Credit Risk or Default Risk:**

Credit risk or Default risk refers to the risk that an issuer of a debt instrument may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk, bonds issued by non-government agencies are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a debt instrument will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

- **Liquidity Risks:**

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of

particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or even during rebalancing of the Scheme's investment portfolio.

- **Concentration Risk:**

The Scheme will invest in certain securities of certain companies, industries, sectors, asset type etc. based on its investment objectives and policies as outlined in this Scheme Information Document. The funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments.

- **Settlement Risk:**

Different segments of the financial markets have different settlement cycle/ periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods.

- **Re-investment Risk:**

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk refers to the fall in the rate for reinvestment of interim cash flows than earlier assumed.

Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the Scheme.

- **NAV Performance Risk:**

The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc.

Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme shall be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances. Different types of securities in which the Scheme would invest as stated in the offer document carry different levels and types of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern e.g. corporate bonds carry a higher amount of risk than Government securities. Further even amongst corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

Lower rated or unrated securities are more likely to react to developments affecting the market and carry a higher credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated

securities. The Investment Manager will consider both credit risk and market risk in making investment decisions.

The Scheme will endeavour to invest in highly researched securities offering relative yield for the commensurate risks. However, the erosion in the value of the investments/portfolio in the case of the debt markets passing through a bearish phase is a distinct possibility.

The NAV of the Scheme is largely dependent on the performance of the various debt instruments wherein the investment has been made which may fluctuate from time to time. The Scheme may use techniques and instruments for efficient portfolio management and diversify to reduce the risk of such fluctuations. However, these techniques and instruments if imperfectly used have the risk of the Scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any).

Besides, the fact that skills needed to use these instruments are different from those needed to select the Scheme's securities. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase/redemption requests or other short-term obligations because of the percentage of the Scheme's assets segregated to cover its obligations.

Risks associated with Securities Lending and Short Selling:

Securities Lending: It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can also be temporary illiquidity of the securities that are lent out and the Scheme will not be able to sell such lent out securities until they are returned.

Risk Associated with Investing in Liquid Schemes:

The Scheme may invest in Liquid Schemes of Mutual Funds for liquidity purpose, hence all the risk associated with the underlying liquid schemes, including performance of the underlying liquid schemes, Interest Rate Risk/Market Risk, Credit Risk or Default Risk, Liquidity and Settlement Risks, Re-investment Risk, Performance Risk etc., will therefore be applicable to the scheme. Any changes in the investment policy or the fundamental attributes of the underlying liquid schemes could affect the performance of the Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying liquid schemes.

C. Risk mitigation strategies

Risk is an important part of the investment functions. Effective Risk Management is critical to Fund Management for achieving financial goals. Investments made by the Scheme shall be made in accordance with Investment Objective of the Scheme and provisions of SEBI (Mutual Funds) Regulations.

The Fund has identified the following Risks and designed Risk Management Strategies, which is the part of the Investment Process to manage such risks.

Risk Associated with Equity & Equity Related Instruments:

Type of Risks	Risk Management Strategies
Quality risk: Risk of investing in unsustainable /weak companies	Investment universe is selected carefully, based on the quality of business, management capabilities, nature of industry, history of the company, promoter background etc. and also meet regularly companies official to update the information about the companies.
Price risk: Risk for overpaying for a company	A number of valuation tools are applied to judge the fair value of the companies and investment is made only if there is good upside in the stock price. For deciding the valuation of the companies various tools is considered such as history of the companies, peers over 5-10 year periods, quantitative analysis.
Concentration risk	The investments are made in stocks across a number of sectors to ensure the diversification. Generally, there is stock wise limit that no investment is made more than 6% of portfolio.
Liquidity risk: High impact cost	The Investments are made only in such stocks which has high trading volume in the market.
Volatility risk: price volatility due to company or portfolio specific factors	For hedging the portfolio generally cash is used and when the stocks / markets go up sharply above the comfort level at that time stock has been sold and cash has been retained to invest for further good opportunity.
Event risk: Price risk due to company or sector specific events	Regular meetings with the companies and internal meetings of portfolio team helps to identify and resolve the Event Risk.

Risk Associated with Debt & Money Market Instruments:

Types of Risk	Risk Management Strategies
Interest Rate Risk	<p>Since the Scheme can invest in short term and long-term instruments; interest rate risk is inherent in the portfolio.</p> <p>The management of interest rate risk is then a function of the quality of the fixed income research inputs and the active investment management strategy.</p> <p>The management of interest rate risk would be achieved by diversification and altering the Scheme maturity profile at appropriate times.</p>
Credit and Default Risk	<p>The Scheme investment strategy limits the investments in debt instruments issued by private (non-government) companies. This reduces the inherent credit / default risk of the portfolio.</p> <p>The internal guidelines of the AMC also limit the investment in lower rated instruments. The Scheme has to necessarily invest a major portion of its investments in Treasury securities, government bonds and/or PSU Bonds thus lowering the overall credit risk in the portfolio.</p>

Liquidity Risk	<p>With the overall improvement in the reporting and transparency of traded market data of all debt and money market instruments, the Investments Team can gauge the liquidity of individual instruments in the portfolio. By this, the Scheme can also determine the time taken to liquidate the position based on historical traded data.</p>
Concentration Risk	<p>Quantum Mutual fund has a well laid out investment policy, applicable to all its debt schemes, which has set pre-defined limits of exposure to each security based on its maturity and credit profile.</p> <p>This ensures that the portfolio is not overly concentrated to one issuer or industry.</p> <p>Adequate portfolio liquidity can also help limit the losses due from large portfolio redemption.</p>
Counterparty Risk	<p>The Fund has single party counter-party limits to limit the damages from a failed settlement or delayed settlement by counterparty.</p> <p>Counterparty risk is also a function of the nature of the instrument and mode of settlement being followed.</p> <p>For instance, in government securities, the settlement of all trades are done through a clearing corporation thus ensuring lower likelihood of failed settlements and counterparty risk.</p>
Settlement Risk	<p>Government securities, T-bills, SDLs, Tri-Party Repo are now settled through a counter party clearing mechanism operated and managed by CCIL (clearing Corporation of India Ltd). This has vastly reduced settlement failures in these securities.</p> <p>Although, corporate bonds are still settled on a DVP basis, the trades are now routed through a clearing corporation. This limits settlement failures arising out of a bilateral settlement.</p> <p>Our counterparty exposure norms also limit the risks of a failed settlement on the overall portfolio.</p>
