Portfolio Rebalancing in case of deviation from Asset Allocation Under Defensive Consideration

The asset allocation pattern indicated above may change from time to time, depending on liquidity considerations or on account of high levels of subscriptions or Repurchase / Redemptions relative to Scheme size, or upon various defensive considerations including market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and only for defensive considerations in accordance with Para No. 1.9.1. (b) of SEBI Master Circular for Mutual Funds dated March 20, 2026. In the event of deviations from the above asset allocation table, the Fund Manager will carry out rebalancing within 30 Calendar Days. However, at all the times the portfolio will adhere to the overall investment objective of the Scheme.

Portfolio Rebalancing in case of Passive Breach

Pursuant to Para No. 3.11. of SEBI Master Circular for Mutual Funds dated March 20, 2026, in the event of deviation from the above asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the rebalancing shall be done within 30 Business Days. In case the rebalancing is not done within 30 Business Days, then justification in writing including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desires, can extend the timelines upto 60 Business Days from the date of completion of mandated rebalancing period (i.e. 30 Business Days).

In case the portfolio of scheme is not rebalanced within the aforementioned mandated plus extended timelines, the AMC shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- ii. not levy exit load, if any, on the investors exiting the scheme.

The AMC shall report the deviation to Trustees at each stage. The reporting to Trustees shall be initiated immediately after the expiry of the mandated rebalancing period (i.e. 30 Business Days). Further, in case the

AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme, the AMC shall immediately after the expiry of the mandated rebalancing period (i.e. 30 Business Days):

1. disclose the same to the investors through SMS and email / letter including details of portfolio not rebalanced.
2. communicate to investors through SMS and email / letter when the portfolio is rebalanced.

Deviation of the portfolio, beyond the specified limits, from the mandated asset allocation beyond 30 Business Days shall also be disclosed on the website of the AMC.

The AMC shall also disclose any deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.

B. WHERE WILL THE SCHEME INVEST?

Subject to the SEBI (MF) Regulations and the disclosures as made under the Section “HOW WILL THE SCHEME ALLOCATE ITS ASSETS?”, the corpus of the Scheme can be invested in any (but not exclusive) of the following securities / instruments:

- (a) Equity & Equity Related Instruments of Companies identified based on ESG theme following Best In Class Strategy
- (b) Equity & Equity Related Instruments other than above including REITs based on ESG theme following Best In Class Strategy
- (c) Debt & Money Market Instruments
- (d) Units of InvITs
- (e) Any other securities / asset class / instruments as permitted under SEBI (MF) Regulations in line with the Investment Objective of the Scheme subject to regulatory approval, if any required.

C. WHAT ARE THE INVESTMENT STRATEGIES?

Investment Philosophy/Strategy

India has embarked upon a national level cleanliness movement- “Swachh Bharat Abhiyan”. The aim was to clean length and breadth of country, provide cleaner natural resources, improve hygiene and health and contribute towards achieving the sustainable development goal established by the United Nations in 2015.

Supporting the mass movement for cleanliness and sustainability, Quantum ESG Best In Class Strategy Fund is a step towards ensuring that investments flow into greener and cleaner business. The focus of this scheme would be on investing in businesses, which are ensuring sustainable management of natural and human resources, diversity within the organizational structure, prudent management and socially responsible framework of business. The aim of this scheme is to provide the investors an opportunity to have an exposure to sustainable investment option.

The sustainability objectives of the ESG Strategy to achieving positive and above-average ESG profile, mitigating ESG risks and harnessing ESG opportunities, and influencing overall positive behavior by investing in companies that promote sustainable products and services.

The investment strategy determines sector weightages to reflect that of broad well diversified indices for the Indian equity markets. Further, the strategy aims to invest in companies within each sector that stand high on the Environmental, Social and Governance parameters assessed through Quantum Best In Class Strategy.

The investment strategy of the Scheme will be to invest in a basket of stocks after intensive analysis on the environmental, social and governance aspects of the company. The aim is to follow a comprehensive 'ESG Framework' in order to develop deeper understanding into a company's management practices, sustainable businesses and risk profile, which would thereby help us in understanding the impact on long-term sustainability that drives performance.

The primary focus of the Scheme will be on companies based on two criteria. First is for selecting companies under coverage and second is for selecting companies in the portfolio. The first criteria are selecting companies generally trading with liquidity of minimum US \$ 1 million on an average over the last 12 months and second criteria based on their ESG score.

Each security, which is filtered on the basis of first criteria, will be scored on ESG parameters using data sources such as sustainability reports (GRI Framework), Business Responsibility Reports (BRR) and other publicly available documents. Active weights of a security within their respective sector will be determined by a composite Best in Class ESG score. A higher ESG score of a security within the sector will have higher relative weight and vice versa. The selection process ensures eliminating exposure to companies that rank poorly on ESG criteria completely. The sum total of the weights of securities in a sector will equal to track sector weights of broad well-diversified indices subject to companies meeting our threshold Best in Class ESG score. The allocations focus on governance and sustainability; hence will be agnostic to valuations.

The investment strategy is broadly a combination of the following Best In Class ESG approach:

- The Fund uses a best-in-class screening strategy for the companies assessed based on proprietary framework on ESG metrics which generally covers more than 200 parameters which are material to the company's ESG performance. The companies meeting a threshold ESG score is considered for inclusion in the portfolio.
- The metric tracked by the fund to determine the best in class performance of investee companies is an aggregate ESG score determined through a materiality based assessment of companies E,S and G factors. Within each of the pillars there are certain materiality driven metric that would determine companies performance on each of the pillars. However, the factors chosen or its assessment may change based on the sector or its materiality to companies operations. Examples of various metrics tracked under each pillar of ESG are given here: Emissions, carbon footprint, renewable energy mix, etc. under Environment, gender diversity, gender pay parity, human rights, etc. under Social and board composition and diversity, CSR spending, data privacy, etc. under Governance. This is not an exhaustive list but examples to provide understanding of metrics under each E,S,G factor.
- The strategy would tend to exclude companies in the sectors like Alcohol, Gambling and Tobacco. While the ESG factors determine the quality and sustainability of potential investee companies, it would also scan for financial soundness of companies to ascertain its viability as a good investment. Along with material factors, financial filter including long term return on capital employed, leverage and growth rates are analysed to ensure the financial soundness and operational longevity of the company.
- The composite ESG score meeting our internal threshold assigned to the company on the basis of best-in-class ESG strategy is the one that broadly determines portfolio selection and corresponding weight is assigned to the company based on relative scores of companies within the respective sector, subject to investment guardrails.

The contribution to 'positive environmental change', an investor might reasonably expect:

- The Scheme fund invests in companies that meet Quantum ESG criteria and has a positive Best In Class ESG score which means the company stands relatively better as compared to other companies in their sectors on their ESG performance. While evaluating companies, the Team assess if the company has gone beyond their traditional remit and have made conscious effort to recognize the environment and society as important stake holders and have achieved a reasonable progress on their environmental footprint and social recognition and contribution. The Team also looks for companies' efforts in adapting and mitigating climate change and thereby reducing the carbon footprint, improving the resource efficiency, water usage and waste reduction and disposal. Similarly, on the social aspects, companies should work towards being more equitable, encourage diversity, positively contribute towards the society through judicious use of CSR, encouraging worker representation and health & safety at workplace, upholding best standards for data privacy and cyber security.
- The Team do not only measure these aspects through the ESG framework but monitor and engage companies to become better at their ESG performance. One can reasonably expect a gradual improvement and many of these material ESG measures impacting the companies' operations.

Decision-making process for Investing:

- Decision-making process for investing is based on the use of proprietary Best in Class ESG scoring methodology. The broad comparisons made by the analysts of various companies within the sector and also taking clues from global companies evolution provides great insights into any ambiguous claims made by the company being researched. The Research is not restricted. We do not restrict our research to self-declared company disclosures. We try to do a 360-degree company check by talking to various stakeholders like suppliers, vendors, customers, channel checks, employees, etc. to get more information to get a granular understanding of the true state of the company's affairs. We also try to get the information is also obtained from unorthodox sources like pollution control boards, NGOs, local communities in our bid to gather more information to try and verify the sustainability claims made by the company.

Investment Portfolio

- The Scheme's investment portfolio typically will consist of investments made in shares of Indian companies listed on a stock exchange in India identified based on the Best In Class ESG Strategy. The Scheme will invest primarily in equity securities of Indian issuers listed on an Indian stock exchange.
- While the majority of the assets will be invested in the securities of Indian companies, the Scheme may also invest in money market instruments or in units of liquid schemes under the Quantum AMC or any other Mutual Fund, subject to the applicable SEBI (MF) Regulation limits, for brief periods of time pending investment in equities or other securities more generally associated with the Scheme's portfolio. The Scheme shall endeavor to have a higher proportion of the assets under the Best In Class ESG Strategy.

Generally speaking, the portfolio will tend to include shares of all companies above a particular threshold Best In Class ESG composite score derived as a result of a thorough analysis of Best In Class Strategy assessing the Environment, Social and Governance factors relevant to the company and the sector in which it operates.

The Fund might also have exposure to REITs and InvITs depending on the opportunities that broad markets provide from time to time.

INVESTMENT PROCESS AND RECORDING OF INVESTMENT DECISIONS

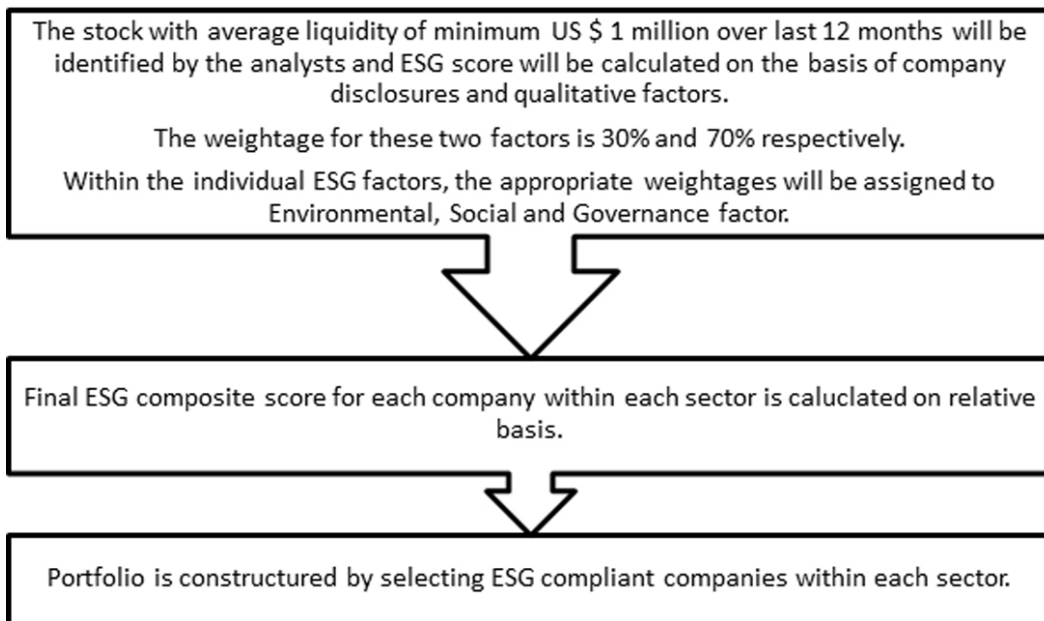

INVESTMENT PROCESS

The investment process consists of:

- Benchmarking Sector weights to that of broad well diversified indices in the Indian equity markets
- Stock selection
- Portfolio Construction

STOCK SELECTION

The AMC's stock selection approach is basically based on Best In Class ESG scores subject to them meeting our internal threshold.

PORTFOLIO CONSTRUCTION

The stock should generally have an average liquidity of minimum US\$ 1 million over last 12 months.

Every Stock with Best In Class ESG composite score equal to or above the threshold ESG score will be part of the portfolio.

The AMC would generally not try to time the market and will add stocks that meet the Best In Class ESG criteria on set rebalancing dates. Every stock in portfolio will be bought and sold on the basis of weights allotted to it and will be value agnostic.

The AMC will set sector weights for the portfolio in accordance with sector weights of a broad well diversified India equity Index.

In case, there are no stocks with ESG score greater than or equal to the set threshold Best In Class ESG composite score in a particular sector, the weightage of that sector is redistributed on a relative basis among other sectors, where the stocks meet the Best In Class ESG criteria. Consequently, the weightages of individual stocks qualifying for the Best In Class ESG criteria within those sectors will also change accordingly.

The AMC will periodically review and if necessary, rebalance the portfolio typically coinciding with rebalancing of the underlying indices and / or quarterly. The AMC will also seek to periodically rebalance the portfolio on account of a new addition of stock, company specific events and in case of change in the view of the sector or the company.

Portfolio Turnover Policy:

The Scheme adopts a long-term approach to investing, typical holding period has been 3 to 5 year's guided by relative Best in Class ESG scores, financial checks and investment guardrails. This long term approach to owning quality stocks could result in an average portfolio turnover of between 20% and 50% subject to relative performance of portfolio holdings. For several of the stocks in the portfolio, the holding period has been greater than 3 years, resulting in lower turnover. Depending on relative and absolute ESG and Financial performance of the portfolio companies, the Portfolio Turnover Ratio can change for the coming year as both the parameters could undergo changes.

PROCEDURE AND RECORDING OF INVESTMENT DECISIONS:

The investment decisions for the scheme will be carried out by the designated fund manager(s).

The Chief Executive Officer is not involved in the investment decision making process.

It is the responsibility of the AMC to ensure that the investments are made as per the Internal / Regulatory guidelines, Scheme's investment objective and in the best interest of the Unit holders of the Scheme.

All investment decisions shall be recorded in accordance with provisions of Para No. 7.16. of SEBI Master Circular for Mutual Funds dated March 20, 2026, or as may be amended by SEBI from time to time.

PERFORMANCE MEASUREMENT AND REPORTING

The Investment Committee of the AMC at its regular meeting(s) shall review performance of the Scheme, compliance of the various investment restrictions and compliance with the investment objective stipulated in the Scheme Information Document in accordance with SEBI (MF) Regulations.

The Fund Manager(s) will present the performance of the Scheme to the Board of the AMC and Trustees at their respective periodical Board Meetings.

The Board of AMC and Trustee will review the performance of the Scheme in comparison to the performance of Benchmark and industry peers.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Tier I Benchmark - NIFTY100 ESG TRI

The benchmark is representative of Fund's Investment Objective and Asset Allocation and most suited for comparison for performance of the scheme.

The Trustee/AMC reserves the right to change the benchmark for the evaluation of the performance of the Scheme from time to time, keeping in mind the Investment Objective & Asset Allocation of the Scheme and the appropriateness of the benchmark.

The Investment includes investments made under Alignment of Interest by Designated Employees in terms of SEBI Master Circular for Mutual Funds dated March 20, 2026.

For investments by key personnel and AMC directors including regulatory provisions in this regard, kindly refer the SAI.

i. INVESTMENTS OF AMC IN THE SCHEME

The AMC may invest in the Scheme at any time during the continuous offer period subject to the SEBI (MF) Regulations & Circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time. As per the existing SEBI (MF) Regulations, the AMC will not charge investment management and advisory fees on the investment made by it in the Scheme.

Further, the AMC shall, based on the risk value assigned to the scheme, invest minimum amount as a percentage of assets under management of the scheme, pursuant to Para No. 7.13.1. of SEBI Master Circular for Mutual Funds dated March 20, 2026. For details of such investments please refer the link: <https://www.quantumamc.com/fileCDN/pdf/MUTUAL-FUND-INVESTMENT-SCHEMEWISE-DATA.pdf>

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per unit will be computed by dividing the net assets of the Scheme/Plan/Option by the number of units outstanding under the Scheme/Plan/Option on the valuation date.

The Net Assets Value (NAV) per unit under the Scheme/Plan/Option shall be calculated as follows:

$$\text{NAV (₹)} = \text{Market or Fair Value of Scheme's Investments} + \text{Current Assets including accrued income} - \text{Current Liabilities and Provisions including accrued expenses}$$

$$\text{No. of Units outstanding under Scheme/Plan/Option}$$

The numerical illustration of the above method is provided below:

Market or Fair Value of Scheme's investments (Rs.) = 10,00,000

Current Assets (Rs.) = 1,00,000

Current Liabilities and Provisions (Rs.) = 50,000

No. of Units outstanding under the Scheme = 1,00,000

$$\text{NAV per unit (Rs.)} = \frac{10,00,000 + 1,00,000 - 50,000}{1,00,000} = \frac{10,50,000}{1,00,000} = 10.50$$

The NAV will be calculated and disclosed on all Business Days by 11.00 p.m. The repurchase price shall not be lower than 97% of the NAV subject to SEBI (MF) Regulations, as amended from time to time. For other details such as policies w.r.t computation of NAV, rounding off, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Sale (Subscription) and Repurchase (Redemption) Price Illustration:

Assumed NAV Rs.11.00 Per Unit, Entry Load – Nil, Exit Load – 1%

Sale Price = NAV + (Entry Load (%) (if any) * NAV)

Sale Price = 11 + (0% * 11)

Sale Price = 11 + 0

Sale Price = Rs.11/-

Repurchase Price = NAV – (Exit Load (%) * NAV)

Repurchase Price = 11 – (1% * 11)

Repurchase Price = 11 – 0.11

Repurchase Price = Rs.10.89

B. NEW FUND OFFER (NFO) EXPENSES

This section does not apply to the Scheme covered in this SID, as the ongoing offer of the Scheme has commenced after the NFO and the Units are available for continuous subscription and redemption.

C. ANNUAL SCHEME RECURRING EXPENSE

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc.

The AMC may charge up to 2.10% of the daily net assets of the scheme as Base Expense Ratio (BER). For the actual current expenses being charged, the investor should refer to the website of the Mutual Fund (www.QuantumAMC.com).

Expense Head	% of daily Net Assets

Cost related to investor communications	
Cost of fund transfer from location to location	
Cost towards investor education, awareness and financial inclusion	
Costs of statutory advertisements	
Other expenses (as per Regulation 66 of SEBI MF Regulations)	
Maximum Base Expense Ratio (BER) permissible under Regulation 66	Up to 2.10%
Statutory levies (including GST) on all expenses excluding brokerage and transaction cost	GST of 18% or any other rate as may be levied from time to time on the Taxable Invoice/Contract amount
Statutory levies (including GST) on brokerage and transaction cost	Additionally Levies such as Stamp Duty, STT etc

- **Brokerage Cost** for the purpose of execution of trade, over and above the Base Expense Ratio subject to a maximum of 0.06 per cent of trade value in case of cash market transactions and 0.02 per cent of trade value in case of derivatives transactions. Expense charged towards brokerage, over and above the specified limit, shall be part of the BER limit specified as above.
- **Transaction cost** incurred for the purpose of execution of a trade shall mean regulatory levies and any other expenses charged by the stock exchanges, clearing corporation, and clearing house, as applicable. Such transaction costs shall be over and above the Base Expense Ratio.
- **Statutory levy** means levy imposed by State Government and Central Government.

The total of all expenses charged to the investors of the scheme shall include: Base Expense Ratio limit specified under Regulation 66(7); brokerage cost permitted under Regulation 66(9); transaction cost incurred for the purpose of execution of trade as referred under Regulation 66(10), and statutory levies charged to the investors.

- No charges other than the base expense ratio, brokerage cost, transaction cost, statutory levy and exit load including levies as may be specified by the Board, shall be charged to the investors.

- Any expenditure in excess of the base limits specified in the SEBI (MF) Regulations shall be borne by the AMC or Trustee or Sponsor. If any expense of the scheme is borne by the AMC or by the Trustees or Sponsor, the same shall be done only after the investment and advisory fees charged to the scheme, if any, is fully reversed.

Pursuant to Para No. 11.9.1. of SEBI Master Circular for Mutual Funds dated March 20, 2026, the AMC shall annually set apart at least 0.02% of daily net assets of the Scheme for investor education, awareness and financial inclusion initiatives within the maximum Base Expense Ratio limits specified for mutual fund schemes under Regulation 66(7) of SEBI (MF) Regulations.

Following AUM slab wise base expense ratio limits shall be applicable to the Scheme:

Assets under management Slab (In Rs. crore)	Base Expense Ratio Limits
on the first Rs.500 crores of the daily net assets	2.10%
on the next Rs.250 crores of the daily net assets	1.90%
on the next Rs.1,250 crores of the daily net assets	1.60%
on the next Rs.3,000 crores of the daily net assets	1.50%
on the next Rs.5,000 crores of the daily net assets	1.40%
On the next Rs.40,000 crores of the daily net assets	Expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof.
On balance of the assets	0.95%

Additional Commission to Distributors:

Pursuant to Para No. 11.6 of SEBI Master Circular for Mutual Funds dated March 20, 2026, as amended from time to time, Mutual Fund distributors who mobilize new investments / inflows from the following categories of investors at the mutual fund industry level shall be eligible for additional commission:

- new individual investors (new PAN) from B-30 cities;
- new women individual investors (new PAN) from both T-30 and B-30 cities.

Investment in the name of minor child is excluded from the applicability of incentive payment.

The structure of such additional commission shall be as under:

Investment Mode	Commission Structure
Lump Sum Investment	1% of the amount of the first application subject to a maximum of ₹2,000, provided the investor remains invested for a minimum period of one year
Systematic Investment Plan (SIP)	1% of the total investment made during the first year, subject to a maximum of ₹2,000

The additional distribution commission shall be paid from the 2 basis points on daily net assets, mandated to be set apart annually by AMCs for investor education, awareness and financial inclusion initiatives, subject to adequate claw back provisions. Such commission shall be in addition to the existing trail commission paid to the distributor from the scheme; and shall be granted only once per PAN, and no dual incentives shall be allowed in respect of the same investor or the same investment. The additional commission shall be paid after the period of completion of 1 year from the date of allotment of units.

Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc. and no commission for distribution of Units will be paid/ charged under Direct Plan.

The Fund will disclose the Total Expense Ratio (TER) of the Scheme on a daily basis on the website of the AMC (www.QuantumAMC.com) and of AMFI (www.amfiindia.com). Any change in the Base Expense Ratio charged to any scheme/plan shall be communicated to investors of the scheme/plan through notice via email or SMS at least three working days prior to effecting such change. Investors can refer the aforesaid notice on the AMC website at the link: <https://www.quantumamc.com/total-expense-ratio>.

ILLUSTRATION OF IMPACT OF EXPENSE RATIO ON SCHEME'S RETURN:

Particular	Regular Plan	Direct Plan
Opening NAV at the beginning of the year (Rs.) (a)	100	100
Closing NAV before charging expense at the end of the year (b)	112	112
Scheme's gross returns for the year	12%	12%
Expense Charged during the year (other than Distribution Expenses/ Commission) (Rs.) (c)	1	1
Distribution Expenses/ Commission charged during the year (Rs.) (d)	0.15	0

The purpose of the above illustration is to explain the impact of expense ratio of the scheme. Above calculations are based on assumed NAV and Expenses. The actual NAV, expenses and return on your investment may be more or less.

D. LOAD STRUCTURE

Pursuant to Para No. 11.7. of SEBI Master Circular for Mutual Funds dated March 20, 2026, there shall be no entry load charged to the scheme of the Mutual Fund.

Exit Load is an amount which is paid by the investor to redeem the units for the scheme. Load amount are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC www.QuantumAMC.com or may call at toll free no. (1800-22-3863 /1800-209-3863) or your distributor.

Particular	Load chargeable (as % of NAV)
Exit Load/ Switch Out Load:	
10% of units If redeemed or switched out on or before 365 days from the date of allotment.	NIL
Remaining 90% of units if redeemed or switched out on or before 365 days from the date of allotment.	1
If redeemed or switched out after 365 days from the date of allotment.	NIL

Redemptions / Switch outs of units will be done on First In First Out (FIFO) basis. The above-mentioned load structure shall be equally applicable to the special facilities such as Systematic Withdrawal Plan (SWP) / Systematic Transfer Plan (STP) and Switches etc. However, no load shall be charged for switching between option / plan within the Scheme.

The AMC/ Trustee reserves the right to change / modify the Load structure, if it so deems fit, in the interest of smooth and efficient functioning of the Scheme subject to provisions of SEBI (MF) Regulations. Any imposition or enhancement in the Load shall be applicable on prospective investments only.

For any change in load structure, the AMC will issue an addendum and display it on the website/Investor Service Centers.

The repurchase price shall not be lower than 97% of the NAV subject to SEBI (MF) Regulations, as amended from time to time.

I. Introduction

A. Definitions/interpretation

Please refer the link: https://www.quantumamc.com/FileCDN/Pdf/Combined_definitions_&_interpretations.pdf

B. Risk Factors:

Scheme Specific Risk Factors:

Greenwashing:

- Greenwashing is the process of conveying a false impression or providing misleading information about how a company's business/products/services are more environmentally sound. The Team is well aware that there are many "greenwashing" incentives for companies from brand building to attracting investment flows. It is our fiduciary duty as custodians of investor capital to navigate any greenwashing attempts and endeavor to deliver investors true sustainability geared portfolio.
- ESG Audits are not yet popular in India. Therefore, companies may provide different baselines, scopes and boundaries of disclosures which make comparisons difficult. In such exceptional circumstances, the Fund may not be able to detect such practices and may buy/continue to hold such companies as part of the portfolio.

Risk of divergence in third-party rating providers' and Quantum MF's view on ESG scores/controversies etc:

The companies under ESG coverage of Quantum MF are assessed based on Quantum's Best in Class proprietary ESG framework. There is a high likelihood that the assessment provided by the third party provider and Quantum's Best in Class proprietary assessment differs materially. For instance, the depth of engagement with company, stakeholders, peers, third parties, vendors etc. would differ and that contributes to the overall ranking of the company. Therefore, it may happen that companies with low ESG score or stocks in excluded sectors as per Quantum's Best In Class assessment may go up in value and that may lead to lag in returns of the fund as compared to the market returns.

Liquidity risk

- Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to its inability to liquidate the cash equivalents in time could cause the Scheme to miss certain investment opportunities resulting, at times, in potential losses to the Scheme.

Equity and equity-related risk

- The Mutual Fund is not guaranteeing or assuring any returns. The trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. In the event investments are made in unlisted securities, the ability to liquidate such investments would be further limited. Along with liquidity risk, the NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.

Price risk

- The inclusion or exclusion of security depends entirely on the comprehensive analysis of the company based on the Environmental, Social and Governance criteria. Hence, the buying or selling of a security is

independent of valuations. Therefore, the price risk is comparatively higher.

Allocation risk

- In the scheme, the portfolio allocations (or weights) are done on two levels: one on sector level and second at security level. The sectoral allocations in the Scheme will track the sectoral allocations of a broad well-diversified index to ensure portfolio diversification. The proportion of the scheme portfolio invested in each type of security within the sector will vary depending upon a comprehensive analysis of the company based on the Environmental, Social and Governance factors impacting the company and their peer group within its sector of operations. Therefore, the underlying security allocation may be under or overweight as compared to that in the broad well-diversified Index. There is a risk that the returns from the Scheme may not be exactly equivalent to the returns from the broad well-diversified Index.

Risks associated with stock lending:

- The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the Approved Intermediary, to comply with the terms of agreement entered into between the lender of securities i.e., the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the Approved Intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the Approved Intermediary.
- It may be noted that stock lending activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can also be temporary illiquidity of the securities that are lent out and the Scheme will not be able to sell such lent-out securities until they are returned.

Risk Factors Associated with Fixed Income and Money Market Instruments:

Credit risk

- The Scheme will hold funds in Money Market Instruments. These instruments are subject to credit risk, which is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

Interest Rate risk

- Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. The price of long-term securities fluctuate more in response to such interest rate changes than short-term securities. The volatility in the prices may lead to possible movements in the NAV.

Reinvestment risk

- The reinvestment risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received. These rates are subject to interest rate risk.

Liquidity risk

- In case of debt instruments, the ability of resell the instrument depends on the depth of the secondary

market. The secondary market in India is still developing. This could be a factor limiting the liquidity of disposing off the instrument.

Performance risk

- Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme shall be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances. The Scheme will endeavor to invest in highly researched securities offering relative yield for the commensurate risks. However, the erosion in the value of the investments / portfolio in the case of the debt markets passing through a bearish phase is a distinct possibility.

Risk Associated with Investing in Liquid Schemes:

The Scheme may invest in Liquid Schemes of Mutual Funds for liquidity purpose, hence all the risk associated with the underlying liquid schemes, including performance of the underlying liquid schemes, Interest Rate Risk/Market Risk, Credit Risk or Default Risk, Liquidity and Settlement Risks, Re-investment Risk, Performance Risk etc., will therefore be applicable to the scheme. Any changes in the investment policy or the fundamental attributes of the underlying liquid schemes could affect the performance of the Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying liquid schemes.

Risk associated with REITs/InvITs:

- **Interest Rate Risk/Market Risk:** Changes in interest rate may affect the Scheme's net asset value. Generally, the REITs/InvITs are valued on annuity model, and the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. REITs /INVITs securities markets can be volatile leading to the possibility of price movements up or down and thereby to possible movements in the NAV.
- **Credit Risk or Default Risk:** Credit risk or Default risk refers to the risk that an issuer of a REIT or INVIT instrument may default (i.e. the issuer will be unable to make timely distributions). Because of this risk, investors may demand higher dividend or payout yield. Normally, the value of a REITs/INVITs instruments will fluctuate depending upon the changes in the perceived level of such risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.
- **Liquidity Risks:** This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or even during rebalancing of the Scheme's investment portfolio.
- **Concentration Risk:** The Scheme will invest in certain securities of certain companies, industries, sectors, asset type etc. based on its investment objectives and policies as outlined in this Scheme Information Document. The funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments.

- **Settlement Risk:** Different segments of the financial markets have different settlement cycle/ periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods.
- **Counterparty Risk:** This risk refers to default from counterparty at the time of settlement due to mismatch or inadequate cashflows for distribution. This risk emerges during economic slowdown or upon losing a tenant(s) or default by existing tenant(s) that causes missing or delaying a payout to unitholders.
- **NAV Performance Risk:** The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc.

C. Risk mitigation strategies

Risk is an important part of the investment functions. Effective Risk Management is critical to Fund Management for achieving financial goals. Investments made by the Scheme shall be made in accordance with Investment Objective of the Scheme and provisions of SEBI (Mutual Funds) Regulations, 1996.

The Fund has identified the following Risks and designed Risk Management Strategies, which is the part of the Investment Process to manage such risks.

Type of Risks	Risk Management Strategies
Liquidity Risk	The Investments are made only in such stocks which has high trading volume in the market.
Quality Risk	Investment universe is selected based on ESG score and the scoring process takes into consideration the nature of industry, quality of business, history of company, management capabilities, promoter background, etc. Regular meetings are attended by analysts to be updated about the Company's information.
Price Risk	The investment process is valuation agnostic, but emphasis is on investing in sustainable business to drive long term performance.
Volatility Risk	External factors like liquidity flows, changes in the business environment, economic policy, corporate governance etc. contributed largely to the volatility. The scheme will manage volatility risk through diversification.
Concentration Risk	The concentration risk and volatility risk both are managed through diversification. The investments are made across various sectors to diversify and within the sector; there is a limit on the allocation to each stock at maximum 5% at cost and 10% at market value.

Allocation Risk	The emphasis is on investing in sustainable business which should do well over the long term. Also, the portfolio is well diversified at the sector level and considers allocation of a broad diversified index for investing. At the time of rebalancing of the portfolio, the sector weights are rebalanced to reflect the Index exposure. In case of changes in sectoral composition, a sector is included or excluded from the portfolio. In case of addition of new sector, the underlying stocks are added in proportion to their respective ESG score ensuring that the sum total of the weights of stocks in that sector will be equal to respective sector weight.
Corporate Actions	In case of corporate actions like merger, demerger or issue of QIP, the rebalancing of stocks shall be done on the next set date to maintain the sectoral weights and stock weight limit.
Volatility risk	External factors like liquidity flow, changes in the business environment, economic policy, corporate governance, etc. contributed largely to the volatility. The scheme will manage volatility risk through diversification.
Risks related to greenwashing	Greenwashing is the process of conveying a false impression or providing misleading information about how a company's business/products/services are more environmentally sound. The Team We are well aware that there are many "greenwashing" incentives for companies from brand building to attracting investment flows. It is our fiduciary duty as custodians of investor capital to navigate any greenwashing attempts and deliver investors true sustainability geared portfolio. The Team We understand that ESG is not a "tick the box" desk research. The Team We do not restrict our the research to self-declared company disclosures. The Team We try to do a 360-degree company check by talking to various stakeholders like suppliers, vendors, customers, channel checks, employees, etc. to get more information to get a granular understanding of the true state of the company's affairs. The Team We also try to get information from unorthodox sources like pollution control boards, NGOs, local communities in our bid to leave no stone unturned. There is also an attempt to verify the information with other available data and map with other companies in the sector and globally to identify any red flags.

Risk associated with REITs/InvITs:

Types of Risk	Risk Management Strategies
Interest Rate Risk	Change in interest rates can lead to rise/fall in securities prices. Extent of the fall will be determined by duration of the cash flows, higher the duration steeper the rise/fall. Interest rate risk will be mitigated by diversification across securities and duration.
Credit and Default Risk	Higher debt burden or interest outgo can impact cash flows of the REIT/INVIT. This can lead to higher credit or default risk. The Scheme investment strategy limits the investments in REIT/InvIT instruments reduces the inherent credit / default risk of the portfolio.
Liquidity Risk	With the overall improvement in the reporting and transparency of traded market data of all debt and money market instruments, the Investments Team can gauge the liquidity of individual instruments in

	the portfolio. By this, the Scheme can also determine the time taken to liquidate the position based on historical traded data.
Counterparty Risk	<p>The Fund has single party counter-party limits to limit the damages from a failed settlement or delayed settlement by counterparty.</p> <p>Counterparty risk is also a function of the nature of the instrument and mode of settlement being followed.</p>

3. Save as otherwise expressly provided under SEBI (MF) Regulations, the Mutual Fund shall not advance any loans for any purpose.
4. The Mutual Fund shall get the securities purchased/ transferred in the name of the Mutual Fund on account of the Scheme, wherever the investments are intended to be of a long - term nature.
5. The Scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorised to carry out such activity under the Act subject to the below limits at rating level:

The scheme shall not invest more than:

- a. 10% of its NAV in debt and money market securities rated AAA; or
- b. 8% of its NAV in debt and money market securities rated AA; or
- c. 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of its NAV of the Scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to overall limit of 12% of its NAV of the Scheme for a single issuer.

Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and Tri-party Repos on Government securities or treasury bills (TREPS).

6. The Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments.

Provided that the Scheme may invest in unlisted non-convertible debentures (NCDs) up to a maximum of 10% of the debt portfolio of the Scheme subject to such conditions as may be specified by SEBI from time to time.

7. The Mutual Fund under all its Scheme(s) will not own more than 10% of any Company's paid-up capital carrying voting rights.

Provided that the Sponsor of the Fund, its associate or group company including the asset management company of the Fund (through the Scheme(s) of the Fund or otherwise, individually or collectively), or any shareholder holding 10% or more of the shareholding or voting rights in the asset management company or the trustee company of a mutual fund, directly or indirectly, shall not have 10% or more of the shareholding or voting rights in the asset management company or the trustee company of any other mutual fund.

8. Transfer of investments from one scheme to another scheme in the same Mutual Fund, shall be allowed only if:-
 - (i) Such transfers are made at the prevailing market price for quoted instruments on spot basis

Explanation: spot basis shall have the same meaning as specified by Stock Exchange for spot transactions

- (ii) The securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.

9. The Scheme may invest in another scheme(s) under the same mutual fund or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes of the Mutual Fund under the same management or in schemes under the management of any other AMC shall not exceed 5% of the net asset value of the Mutual Fund.
