Investment Strategy

The investment objective of the scheme is to generate income and capital appreciation through active management of a portfolio consisting of short term and long term debt and money market instruments.

The investment objective would be achieved in the following order of priority:

- Legality & compliance Ensuring that the portfolio is at all times completely compliant with all rules and regulations – internal and external.
- Portfolio Liquidity Ensuring that the Portfolio can be liquidated at minimal impact cost to the investors.
- Yield and Return Enhancement After meeting the above objectives, the rigorous and in-depth research
 and analysis of the macro economic situation and fixed income markets should provide for timely
 investment opportunities which would enhance the total returns for an investor on a risk adjusted basis.
- Capital Preservation Ensuring that the investments are made in a manner to minimize market risks and choosing securities which have low default/downgrade risk.

Debt markets tend to be volatile and especially so in a developing market like in India where market depth and liquidity may not be consistent. Longer tenor instruments tend to be more volatile than short term instruments. And that the interest rates and bond prices generally tend to have an inverse relationship.

Thus, when interest rates rise, the price of a bond falls; and in that the price of a bond with longer maturity falls more than the one which has a shorter maturity.

This is also true when interest rates fall, the price of the bond rises; and in that the price of a bond with longer maturity rises more than the one which has a short term maturity.

The Quantum Dynamic Bond Fund has the flexibility to invest across the maturity curve. It can invest in short term as well as long term instruments. And based on the asset allocation table provided, it can invest in government as well as corporate bonds.

The investment strategy thus is to dynamically manage only the duration of the Scheme. Thus the Scheme has the flexibility to invest in short term and long term instruments. But the Scheme has limited ability to take credit exposures. As given in the asset allocation table, despite the dynamic nature of the Scheme, it is restricted in taking exposures in corporate bonds, especially those issued by private sector and there are pre-defined limits for all instruments and investment categories. This is to ensure that the portfolio has better liquidity and is of relatively high credit quality.

The Scheme will thus be actively managed and the Fund Manager and the investment team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy as well as developments in global markets.

Thus if the Fund Manager and the Investment Team believe that long term interest rates are going to rise, the Scheme can move to instruments which have low maturity and thus low duration and help protect the Scheme's performance.

Conversely, if the Fund Manager and Investment Team believe that long term interest rates are going to fall, the Scheme can invest in longer tenor instruments and thus benefit out of the larger rise in prices of longer tenor bonds.

Given that Indian macro data points and hence interest rates tend to be volatile, the flexibility of optimal maturity management is key to superior risk adjusted performance.

Risk Profile of the Scheme

Mutual Fund Units are subject to market risks. Please read the Scheme Information Document carefully for details on risk factors and other details before investment. Scheme specific risk factors are summarized below.

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems. As the Scheme will be investing in debt and money market instruments which involves interest / market risk, Credit / default risk, liquidity, concentration, settlement, re-investment risk etc.

The NAV of the Scheme is largely dependent on the performance of the various debt instruments wherein the investment has been made which may fluctuate from time to time. The Scheme may use techniques and instruments for efficient portfolio management and attempt to hedge or reduce the risk of such fluctuations. However these techniques and instruments if imperfectly used have the risk of the Scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any).

Risk Mitigation Factors

Risk is an important part of the investment functions. Effective Risk Management is critical to Fund Management for achieving financial goals. Investments made by the Scheme shall be made in accordance with Investment Objective of the Scheme and provisions of SEBI (Mutual Funds) Regulations.

The Fund has identified the following Risks and designed Risk Management Strategies which is the part of the Investment Process to manage such risks.

Type of Risks	Risk Mitigation / Risk Management Strategies
Interest Rate Risk	Measured through Average Maturity/ Duration / Portfolio Sensitivity to interest rate changes (Pv01). Since the Scheme can invest in short term and long term instruments; interest rate risk is inherent in the portfolio. The management of interest rate risk is then a function of the quality of the fixed income research inputs and the active investment management strategy. Since the Scheme will not invest in derivatives, the management of interest rate risk would be achieved by altering the Scheme maturity profile at appropriate times.
Credit and Default Risk	Measured through Portfolio credit quality. % allocation to instruments rated AAA / AA and so forth. The Scheme broad asset allocation limits the investments in debt instruments issued by private (non-government) companies. This reduces the inherent credit / default risk of the portfolio. The internal guidelines of the AMC also limit the investment in lower rated instruments. The Scheme has to necessarily invest a major portion of its investments in government bonds and/or PSU Bonds thus lowering the overall credit risk in the portfolio.
Liquidity Risk	Measured through Trading Data / Portfolio Liquidity Report. With the overall improvement in the reporting and transparency of traded market data of all debt and money market instruments, the Investments Team can gauge the liquidity of individual instruments in the portfolio. By this, the Scheme can also determine the time taken to liquidate the position based on historical traded data. A portfolio liquidity report can help address any illiquid securities in the portfolio.
Concentration Risk	Measured through Portfolio holdings report and unit holder report Quantum Mutual fund has a well laid out investment policy, applicable to all its debt schemes, which has set pre-defined limits of exposure to each security based on its maturity and credit profile. This ensures that the portfolio is not overly concentrated to one issuer or industry. The other concentration risk of few investors holding a large share of the schemes corpus is addressed in some measure by SEBI's rule of 20/25. Adequate portfolio liquidity can also help limit the losses due from large portfolio redemption.
Counterparty risk	Measured through single counterparty exposure The Fund has single party counter-party limits to limit the damages from a failed settlement or delayed settlement by counterparty. Counterparty risk is also a function of the nature of the instrument and mode of settlement being followed. For instance, in government securities, the settlement of all trades are done through a clearing corporation thus ensuring lower likelihood of failed settlements and counterparty risk.
Settlement Risk	Measured through post trade failure in settlements Government securities, T-bills, SDLs, Tri-Party Repo are now settled through a counter party clearing mechanism operated and managed by CCIL (Clearing Corporation of India Ltd). This has vastly reduced settlement failures in these securities. Although, corporate bonds are still settled on a DVP basis, but the trades are now routed through a clearing corporation. This limits settlement failures arising out of a bilateral settlement. Our counterparty exposure norms also limit the risks of a failed settlement on the overall portfolio.

Investors are requested to provide the following details along with the mandatory requirement of bank account details (bank, branch address, and account type and account no.) in the application form for electronic fund transfer (EFT) of income distribution / redemption amount to the unit holders bank account. Quantum AMC will automatically extend this facility to all unit holders in case the bank account as communicated by the unit holder is with any of the bank providing EFT facility.

The 11 digit IFSC (Indian Financial System Code) is to be mandatorily given.

Based on the above information AMC will enable secure transfer of redemption and income distribution via the various electronic modes of transfers (RTGS /NEFT / Direct Credit mode that are available in the banking system).

This facility of EFT is safe and fast and eliminates the potential risk of loss of instruments in transit through physical mode. The Mutual Fund, however, reserves the right to issue a cheque / demand draft to unit holders where this facility is not available. "If the remittance is delayed or not affected for reasons of incomplete or incorrect information, Quantum AMC cannot be held responsible". For validation of IFSC, investor shall attach the cancelled cheque/ copy of cheque. If these documents are not provided the fund will not be responsible for consequent delay in receipt of payment. Fund is also not responsible for bankers delay.

Systematic Investment Plan (SIP) - SIP facility is available only in respect of income distribution payments and not in the case of Redemption of Units. Based on the bank particulars, investors will receive a direct credit of the amount due to them in their notified account with intimation to the unit holder.
