#### **Investment Strategy**

The investment strategy of the Scheme will be to invest predominantly in open-ended diversified equity schemes of Mutual Funds, which are registered with SEBI after using intensive fundamental analysis both quantitative and qualitative, monitor the portfolio regularly but not so as to engage in excessive churning, and control risk by keeping portfolio adequately diversified.

The Scheme will invest a majority of its money in open-ended diversified equity schemes that have been in existence for at least 3 years at the time of making investments. The Scheme will not invest in any sector / thematic funds. Besides, it will not make any investments in the schemes of Quantum Mutual Fund. Furthermore, the schemes that get short-listed will be tested across the quantitative and qualitative parameters, set as a part of our fund selection process.

The AMC shall appoint a Designated Agency to provide periodically the recommended list of diversified equity schemes. The research methodology to be adopted by the Designated Agency for providing the recommended list shall be reviewed by the Portfolio/Investment Team. Any Change in the research methodology shall also be reviewed by the Portfolio / Investment Team. The Designated Agency may be a bank, which distributes financial products, a research house or a distribution house. The Portfolio will be reviewed and rebalanced on the receipt of the recommended list from the Designated Agency. Presently, the AMC has appointed Equitymaster Research Private Limited as designated agency to provide the recommended list.

The AMC has the right to designate an additional Agency for obtaining the recommended list. The AMC may also change the Designated Agency, if it deems fit.

The research methodology to be adopted by the Designated Agency for providing the recommended list shall be reviewed by the Board of Directors of AMC and Trustees. Any Change in the research methodology shall also be reviewed by the Board of AMC and Trustee.

#### **Investment Portfolio**

The Board of the AMC or investment committee of the board of the AMC will from time to time review and approve the overall investment policy and strategy of the portfolio held by the Scheme.

While the majority of the assets will be invested in the open-ended diversified equity schemes of Mutual Funds, which are registered with SEBI, the Scheme may also invest in money market instruments and liquid schemes of Mutual Funds for the purpose of having liquidity.

The portfolio will comprise of 5 to 10 different open-ended diversified equity mutual fund schemes, and the investment in any one mutual fund scheme will be in the range of 10% to 25% of the scheme's net assets.

#### Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

#### Risk Factors related to Equity Investments

- The Scheme proposes to invest predominantly in the diversified equity schemes of Mutual Funds, registered with SEBI. Hence the scheme's performance will depend upon the performance of the underlying schemes. Any change in the investment policies or the fundamental attributes of the underlying schemes may affect the performance of the scheme.
- 2. Investments in underlying equity schemes will have all the risks associated with such schemes including performance of underlying stocks, derivative investments, off shore investments, stock lending, etc.
- 3. The investors of the Scheme shall bear the recurring expenses and loads if any of the Scheme in addition to the expenses & loads of the underlying schemes. Hence the investor under the Scheme may receive lower pre-tax returns than that they could have received if they had invested directly in the underlying schemes in the same proportions.
- 4. The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying schemes where the Scheme has invested and will not include the investments made by the underlying schemes.
- 5. The changes in asset allocation may result in higher transaction costs.
- 6. The Portfolio of the Scheme will normally be comprised of schemes from the recommended list. Though adequate care will be taken to ensure that the methodology adopted by the Designated Agency is proper, there may be any analytical error (like assigning over weightage or under weightage to various risk - return parameters), execution error etc. by the Designated Agency, which may result in the suboptimal performance of the Scheme.
- Since the Scheme proposes to invest at least in 5 underlying schemes, the significant underperformance in even one of the underlying schemes may adversely affect the performance of the Scheme.

For details on risk factors and risk mitigation measures, please refer SID.
