This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website www.QuantumAMC.com.

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 2026, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

This Key Information Memorandum is dated June 30, 2026.

Investment Objective

The investment objective of the Scheme is to generate returns that are in line with the performance of physical gold in domestic prices, subject to tracking error.

There is no assurance that the Investment Objective of the Scheme will be achieved.

Asset Allocation Pattern of the scheme

Instruments	Indicative allocations (% of total assets)	
	Minimum	Maximum
Physical Gold	95	100
Money Market instruments	0	5

As the scheme invests 95% to 100% of the net assets into Gold, the scheme will, by and large, be passively managed fund. The scheme may invest in gold related securities including derivatives in accordance with SEBI Mutual Fund Regulations.

Investment in warehouse receipts and other permitted instruments linked to Gold Prices would be made as and when, and to the extent permitted by regulatory authorities.

Pursuant to Para No. 13.18.6. of the SEBI Master Circular for Mutual Funds dated March 20, 2026 read with SEBI letter no. SEBI/HO/IMD-II/DOF3/OW/P/2021/31487 /1 dated November 03, 2021, Cash and cash equivalents which includes T-bills, Government Securities and Repo on Government Securities having residual maturity of less than 91 Days, shall not be considered for the purpose of calculating gross exposure limit.

Portfolio Rebalancing in case of deviation from Asset Allocation Under Defensive Consideration

The asset allocation pattern indicated above may change from time to time, depending on liquidity considerations or on account of high levels of subscriptions or Repurchase / Redemptions relative to Scheme size, or upon various defensive considerations including market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and only for defensive considerations in accordance with Para No. 1.9.1. (b) of SEBI Master Circular for Mutual Funds dated March 20, 2026. In the event of deviations from the above asset allocation table, the Fund Manager will carry out rebalancing within 30 Calendar Days. However, at all the times the portfolio will adhere to the overall investment objective of the Scheme.

Investment Strategy

The AMC uses 'passive' approach to try and achieve the Scheme's investment objective. The Scheme does not try to "beat" the markets they track and do not seek temporary defensive positions when markets decline or appear overvalued. The AMC does not make any judgments about the investment merit of a particular gold investment nor will it attempt to apply any economic, financial or market analysis. Passive approach eliminates active management risks in regards to over / underperformance vis-à-vis the benchmark.

The AMC uses a "passive" approach to try and achieve the scheme investment objective. The scheme investing gold as an asset regardless of its investment merit.

Investment Process

The Scheme will endeavor to track the domestic prices of gold by investing in physical Gold.

Normally the Fund will receive physical Gold from the Market Makers / Eligible Investors against the exchange of Quantum Gold ETF units in Creation Unit size as defined by the Fund.

The AMC will analyse from time to time different ways of taking exposure in gold from the perspective of risk and returns and decide the same in the best interest of investors. The investment decisions of the scheme will be carried out by the Designated Fund Manager.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

- The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total returns and / or its ability to meet its objectives.
- The Scheme's NAV will react to the Gold price movements. The investor may lose money over short or long period due to fluctuation in scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in bullion prices, market movement and over longer periods during market downturns.
- Although the units described in this Scheme Information Document are listed on the Stock Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- The market price of ETF units, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV) and (2) demand and supply of units in the market.
- Sizable demand or supply of the units in Exchange may lead to market price of the units to quote at

premium or discount to NAV. Hence the price of Quantum Gold ETF units is less likely to hold significant variance (large premium or discount) from the latest declaration NAV all the time.

- Trading in Quantum Gold ETF units on the Exchange may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading in Quantum Gold ETF units is not advisable. In addition, trading in Quantum Gold ETF units is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI "circuit filter" rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Quantum Gold ETF units will continue to be met or will remain unchanged.
- Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of Authorized Participant to arbitrage resulting into wider premium / discount to NAV. Any changes in the regulations relating to import and export of gold or gold jewellery (including customs duty, sales tax and any other statutory levies) may affect the ability of the scheme to buy/sell gold against the purchase and redemption requests received.
- The units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Quantum Gold ETF units will fluctuate in accordance with changes in their NAV as well as market supply and demand for the units. However, given that Quantum Gold ETF units can be created and redeemed in creation units size directly with the fund, it is expected that large discounts or premiums to the NAV of Quantum Gold ETF units will not sustain due to arbitrage opportunity available.
- Tracking error may have an impact on the performance of the scheme. However, the AMC will endeavour to keep the tracking error as low as possible.
- There is no exchange for physical gold in India. The Fund may have to buy or sell gold from the open market, which may lead to counter party risks for the Fund for trading and settlement.
- The Fund has to sell gold only to bullion bankers/traders who are authorized to buy gold. Though, there are adequate numbers of players (commercial or bullion bankers) to whom the Fund can sell gold, the Fund may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs for redemption or expenses.
- There is a risk that part or all of the Scheme's gold could be lost, damaged or stolen. Access to the Scheme's gold could also be restricted by natural events or human actions.
- Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.
- The Trustee, in the general interest of the Unit holders of the Scheme offered under this Scheme Offer Document and keeping in view the unforeseen circumstances market conditions, may limit the total number of units which can be redeemed on any Business Day.
- The returns from physical Gold in which the Scheme invests may underperform returns from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of outperformance and under performance in comparison of the general securities markets.
- The Scheme is not actively managed. The Scheme may be affected by a general price decline in the Gold prices. The Scheme invests in the physical Gold regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets.
- Whereas the Indian Market was formerly restrictive, a process of deregulation has been taking place over recent years. This process has involved removal of trade barriers and protectionist measures, which could adversely affect the value of investments. It is possible that the future changes in the Indian political situation, including political, social or economic instability, diplomatic developments and changes in tax laws, changes in SEBI / Stock Exchange / RBI regulations and other applicable laws / regulations could have an effect on such investments and valuation thereof. Expropriation, confiscatory taxation or other relevant developments could affect the value of investments.
- **Risks attached with the use of derivatives:** As and when the Schemes trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of derivatives requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

For details on risk factors and risk mitigation measures, please refer SID.
